### Independent Accountant's Report on State Compliance and on Internal Control Over Compliance

The Honorable Frank J. Mautino Auditor General State of Illinois

#### Compliance

As Special Assistant Auditors for the Auditor General, we have examined the State of Illinois (State), Office of the Treasurer, Fiscal Officer Responsibilities' (the Treasurer) compliance with the requirements listed below, as more fully described in the Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide) as adopted by the Auditor General, during the year ended June 30, 2018. The management of the Treasurer is responsible for compliance with these requirements. Our responsibility is to express an opinion on the Treasurer's compliance based on our examination.

- A. The Treasurer has obligated, expended, received, and used public funds of the State in accordance with the purpose for which such funds have been appropriated or otherwise authorized by law.
- B. The Treasurer has obligated, expended, received, and used public funds of the State in accordance with any limitations, restrictions, conditions or mandatory directions imposed by law upon such obligation, expenditure, receipt or use.
- C. The Treasurer has complied, in all material respects, with applicable laws and regulations, including the State uniform accounting system, in its financial and fiscal operations.
- D. State revenues and receipts collected by the Treasurer are in accordance with applicable laws and regulations and the accounting and recordkeeping of such revenues and receipts is fair, accurate and in accordance with law.
- E. Money or negotiable securities or similar assets handled by the Treasurer on behalf of the State or held in trust by the Treasurer have been properly and legally administered and the accounting and recordkeeping relating thereto is proper, accurate, and in accordance with law.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants; the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States; the Illinois State Auditing Act (Act); and the Audit Guide as adopted by the Auditor General pursuant to the Act (the Audit Guide). Those standards, the Act, and the Audit Guide require that we plan and perform the examination to obtain reasonable assurance about whether the Treasurer complied, in all material respects, with the specified requirements listed above. An examination involves performing procedures to obtain evidence about whether the Treasurer complied with the specified requirements listed above. The nature, timing and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error.

We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. Our examination does not provide a legal determination on the Treasurer's compliance with specified requirements.

In our opinion, the Treasurer complied, in all material respects, with the compliance requirements listed in the first paragraph of this report during the year ended June 30, 2018.

The purpose of this report on compliance is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the Audit Guide issued by the Illinois Office of the Auditor General. Accordingly, this report is not suitable for any other purpose.

### **Internal Control**

Management of the Treasurer is responsible for establishing and maintaining effective internal control over compliance with the requirements listed in the first paragraph of this report. In planning and performing our examination, we considered the Treasurer's internal control over compliance with the requirements listed in the first paragraph of this report to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with the Audit Guide, issued by the Illinois Office of the Auditor General, but not for the purpose of expressing an opinion on the effectiveness of the Treasurer's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Treasurer's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the requirements listed in the first paragraph of this report on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a requirement listed in the first paragraph of this report will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

As required by the Audit Guide, immaterial findings excluded from this report have been reported in a separate letter to your office.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Audit Guide, issued by the Illinois Office of the Auditor General. Accordingly, this report is not suitable for any other purpose.

# Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

The Honorable Frank J. Mautino Auditor General State of Illinois

As Special Assistant Auditors for the Auditor General, we have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the State of Illinois (State), Office of the Treasurer, Fiscal Officer Responsibilities (the Treasurer), which are comprised of the Statement of Assets and Other Debits, Liabilities and Accountabilities as of June 30, 2018, the related Statement of Investment Income for the year then ended and the related notes to the financial statements, and have issued our report thereon dated January 10, 2019. As described in Note B of the financial statements, the financial statements are prepared by the Treasurer on the basis of the financial reporting provisions determined by the Illinois Office of the State Comptroller, which is a basis of accounting other than accounting principles generally accepted in the United States of America to meet the requirements of the State of Illinois. Our opinion was not modified with respect to this matter.

### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Treasurer's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Treasurer's internal control. Accordingly, we do not express an opinion on the effectiveness of the Treasurer's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Treasurer's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Treasurer's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Treasurer's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

### Fiscal Officer Responsibilities Schedule of Findings For the Year Ended June 30, 2018

### **Prior Finding Not Repeated**

#### A. Finding - Internal Controls Over Financial Statement Reporting Needs Improvement

During the prior audit, the Office did not fully analyze the pricing sources and methods used to determine the fair value of investments and, as a result, reported certain investments in debt securities, totaling \$5.1 billion, as Level 1 investments. Following auditor inquiry, those investments were subsequently reported as Level 2. Level 1 investments are investments whose fair value is determined based on quoted prices in an active market. Level 2 investments are investments whose fair value is determined based on observable inputs other than quoted prices in an active market.

In the current year, we noted the Office properly disclosed those investments in debt securities as Level 2 investments. (Finding Code No. 2017-001)

### Fiscal Officer Responsibilities For the Years Ended June 30, 2018 and 2017

#### **Financial Statement Report**

### **Summary**

The audits of the accompanying financial statements of the State of Illinois, Office of the Treasurer, Fiscal Officer Responsibilities (Treasurer) as of and for the years ended June 30, 2018 and 2017 were performed by Crowe LLP.

Based on their audits, the auditors expressed an unmodified opinion on the Treasurer's financial statements. The financial statements are special purpose framework financial statements prepared on a basis of accounting determined by the Illinois Office of the State Comptroller that is not in conformity with accounting principles generally accepted in the United States of America (GAAP) (see Note B).

#### **Exit Conference**

The Treasurer's Office waived an exit conference in correspondence dated December 6, 2018 by Leighann Manning, Chief Internal Auditor.

#### **Independent Auditor's Report**

The Honorable Frank J. Mautino Auditor General State of Illinois

#### **Report on the Financial Statements**

As Special Assistant Auditors for the Auditor General, we have audited the accompanying financial statements of the State of Illinois, Office of the Treasurer, Fiscal Officer Responsibilities (the Treasurer), which comprise the Statements of Assets and Other Debits, Liabilities and Accountabilities as of June 30, 2018 and 2017, the related statements of Investment Income for the years then ended and the related notes to the financial statements.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the financial reporting provisions determined by the Illinois Office of the State Comptroller as described in Note B. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the Assets and Other Debits, Liabilities and Accountabilities of the Treasurer, as of June 30, 2018 and 2017, and the Investment Income for the years then ended in accordance with the financial reporting provisions determined by the Illinois Office of the State Comptroller described in Note B of the financial statements.

#### Emphasis of Matter

#### Basis of Accounting

We draw attention to Note B of the financial statements, which describes the basis of accounting. The financial statements are prepared by the Treasurer on the basis of the financial reporting provisions determined by the Illinois Office of the State Comptroller, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of the State of Illinois. Our opinion is not modified with respect to this matter.

#### Other Matters

#### Other Information

Our audits were conducted for the purpose of forming an opinion on the financial statements of the Treasurer. The accompanying Supplementary Information (pages 47-60) and the Other Information (pages 61-108) as listed in the table of contents are presented for the purpose of additional analysis and are not a required part of the financial statements.

The accompanying Supplementary Information (pages 47-60) is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The accompanying Supplementary Information (pages 47-60) has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying Supplementary Information (pages 47-60) is fairly stated, in all material respects, in relation to the financial statements as a whole.

The Other Information (pages 61-108) has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 10, 2019 on our consideration of the Treasurer's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Treasurer's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Treasurer's internal control over financial reporting and compliance.

### Restricted Use of this Auditor's Report

This report is intended solely for the information and use of the Auditor General, the General Assembly, the Legislative Audit Commission, the Governor, the Comptroller and Treasurer Management and is not intended to be and should not be used by anyone other than these specified parties.

#### NOTE A. AUTHORIZING LEGISLATION

The State of Illinois, Office of the Treasurer (Treasurer), is authorized by the State Treasurer Act (15 ILCS 505/et seq.). The Treasurer shall receive the revenue and all other public monies of the State, and all monies authorized by law to be paid to him and safely keep the same.

#### NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

<u>Financial Reporting Entity</u>: The Treasurer is not a legally separate entity. It is an office of the primary government, which is the State of Illinois (the State) and is considered part of the State financial reporting entity. As such, it is included in the State of Illinois reporting entity. The Treasurer is custodian of the State's cash and investments comprised of the balances in the separate funds, which are considered to be either in the State Treasury or outside the State Treasury. Accounting control for funds outside the State Treasury is the responsibility of other State agencies. Further, the Treasurer is not responsible for determining that all cash received by State agencies is deposited in the State Treasury.

<u>Basis of Presentation and Accounting</u>: The basis of the presentation of the financial statements for the Treasurer is to have a set of financial statements that present the financial position of the State's assets that the Treasurer is custodian of and responsible for safeguarding and investing as well as State liabilities including general obligation indebtedness that the Treasurer is responsible for making payments.

The format of the Fiscal Officer Responsibilities financial statements was created to aid the Illinois Office of the State Comptroller (Comptroller) in the preparation of the State's Comprehensive Annual Financial Report (CAFR). The Comptroller, acting as the State's accountant, designates which agencies are considered part of the primary government required to prepare financial statements (SAMS 27.10.10-B). The basis of presentation, Statements of Assets and Other Debits, Liabilities and Accountabilities and Statements of Investment Income have been determined by the Comptroller.

The Treasurer's financial statements consist of the Statements of Assets and Other Debits, Liabilities and Accountabilities and Statements of Investment Income. These financial statements are not presented in the traditional framework of Generally Accepted Accounting Principles (GAAP) because the statements only present those assets and activities for which the Treasurer is held accountable by his fiscal officer responsibilities. Exceptions to the traditional GAAP framework are the securities, funds and other assets of The Illinois Funds, College Savings Program, and the ABLE Program and amounts receivable from inheritance tax assessments are not included in the Fiscal Officer financial statements. In addition, the Fiscal Officer financial statements do not include financial statements of the various funds administered by the Fiscal Officer. The Illinois Funds, the College Saving Program, and the ABLE Program are audited annually and reported upon separately. Other exceptions to the traditional GAAP framework are that a traditional presentation of the Statement of Net Position is not included, a Statement of Revenues, Expenses and Changes in Net Position and, where applicable, a Statement of Cash Flows, are excluded entirely, some note disclosures required by GAAP are not included in the Fiscal Officer financial statements, and Management's Discussion and Analysis is not presented.

The basis of accounting is essentially a full accrual basis in that investment revenues are reported when earned, regardless of when the related cash flow takes place, subject to certain exceptions as described in the sections that follow.

### NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

State Treasury Funds: The accounting for the State Treasury Fund group, with the exception of general obligation indebtedness and the related amount of future general revenue obligated for debt service, is presented on a basis whereby: (a) assets in the State Treasury and the related liability to the Comptroller for available balances on deposit are recognized at the time the Comptroller "orders" cash into the State Treasury; (b) the liability to the Comptroller is reduced as warrants are presented to the Treasurer for countersignature; and (c) the cash in the State Treasury is reduced as warrants are paid by the Treasurer.

<u>Funds Outside the State Treasury</u>: Funds outside the State Treasury consist of State assets held by the Treasurer, primarily deposits in clearing accounts, demand deposits and temporary investments, which are not under the accounting control of the Comptroller. Such funds and the related liabilities or accountabilities to the depositing State agencies are recognized when the funds are deposited in clearing accounts or certain demand deposit accounts with the Treasurer. This liability or accountability is transferred to funds available for appropriation or expenditure when the Comptroller orders the funds into the State Treasury.

General Obligation Indebtedness: The liability for general obligation indebtedness is the aggregate amount of all future principal and interest payments necessary to retire such outstanding debt. The amount to be derived from future revenue for debt service (the "Other Debits") is the difference between the currently outstanding certificates and bonded indebtedness and available balances in the bond redemption and interest fund. The expenditures from the proceeds of the certificates and bond issues are accounted for by other State agencies. This balance represents a liability that is not in compliance with accounting principles generally accepted in the United States of America. It represents the future revenue that will be needed to provide for future debt service.

<u>Investment Income</u>: Investment income is recorded by the Treasurer using the accrual basis of accounting whereby income is recognized and an accountability established as income is earned. Funds participating in the investment pool are allocated income monthly based on their proportionate share of the pooled investment base. As authorized by statute, segregated funds are individually invested and specifically credited with the income earned on those investments.

<u>Cash and Cash Equivalents</u>: Cash and cash equivalents include deposits and short-term, highly liquid investments readily convertible to cash, with a maturity of 90 days or less at the time of purchase. Demand deposit accounts are the principal accounts used to process cash and investment transactions within the State Treasury. The clearing accounts are used to process collected receipts and to identify nonsufficient fund checks.

Other Assets: Items reported in the Statement of Assets and Other Debits, Liabilities and Accountabilities as "Other Assets" are transactions in process and assets not available for investment. Receivables from Universities and Agencies for Monies Advanced represent unreimbursed amounts advanced for statutorily authorized imprest funds. The cash balance of the Universities and Agencies imprest funds is reclassified to "Demand Deposits" under Cash and Cash Equivalents on the Statement of Assets, Liabilities and Accountabilities.

The noninterest-bearing amount, reported as "Receivable from the City of Edwardsville," is reported as an Other Asset and is the unpaid balance of funds advanced to the City in 1967 for the planning and construction of a water main. The receivable from the City of Edwardsville is also reported as an "Accountability." Investment income earned but not received is reported as an "Other Asset" and represents accrued income on investments not yet matured or collected. Investment income earned but not received, net of cumulative market adjustments, is reported as an "Accountability."

### NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

<u>Protested Taxes:</u> The fund balance of the Protest Fund is reported separately from funds available for appropriation and is recorded as a liability for balances on deposit called "Protested Taxes."

<u>Available for Appropriation or Expenditure</u>: This amount is the State of Illinois' balance available to be appropriated by the general assembly or expended by State agencies at June 30.

<u>Use of Estimates</u>: In preparing financial statements, management is required to make estimates and assumptions that affect the reported amount of assets and liabilities during the reporting period. Actual results could differ from those estimates.

#### NOTE C. COMPENSATING BANKS FOR SERVICES

The principal method of payment for receipt and disbursement processing services provided by banks is by warrant from the Treasurer's Bank Services Trust Fund appropriation.

#### NOTE D. DEPOSITS AND INVESTMENTS

<u>Overview</u>: The Treasurer's investment activities are governed by the Treasurer's published investment policy that was developed in accordance with State statute. In addition, the Treasurer's Office has adopted its own investment practices that supplement the statutory requirements.

Governmental Accounting Standards Board (GASB) Statement No. 72, Fair Value Measurement and Application, generally requires state and local governments to measure assets that meet the definition of an investment at fair value. GASB defines an investment asset as a security or other asset that a government holds primarily for the purpose of income or profit and its present service capacity is based solely on its ability to generate cash or to be sold to generate cash. In addition, GASB Statement No. 72 defines fair value as the price that would be received for the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Investments exempt from fair value measurement include the following:

- Money market investments and participating interest-earning investment contracts (non-negotiable CDs) that have remaining maturity at time of purchase of one year or less and are held by governments other than external investment pools should be measured using amortized cost.
- Qualified state and local government external investment pools should be measured at amortized cost.
- Certain short-term investments that have a maturity date of less than one year from the date of acquisition should be measured at amortized cost.

## Fiscal Officer Responsibilities Notes to the Financial Statements For the Years Ended June 30, 2018 and 2017

### NOTE D. DEPOSITS AND INVESTMENTS (CONTINUED)

Investments are recorded at fair market value, with the exception of Commercial Paper, Money Market Mutual Funds, Repurchase Agreements, The Illinois Funds, U.S. Agency Discount Notes, and U.S. Treasury Bills which are valued at amortized cost. Certain short-term investments have a maturity date of less than one year from the date of acquisition and are valued at amortized cost as permitted by GASB Statement No. 72. The Treasurer's investments in U.S. Treasury Bills and U.S. Agency Discount Notes are short-term investments with no coupon payments. The investments in repurchase agreements have maturities less than one year from date of acquisition. The Illinois Funds meets the criteria established in GASB Statement No. 79 and, thus, reports all investments at amortized cost.

GASB Statement No. 72 also established a hierarchy of valuation inputs based on the extent to which the inputs are observable in the marketplace. Inputs are used in applying the various valuation techniques and take into account the assumptions that market participants use to make valuation decisions. Inputs may include price information, credit data, interest and yield curve data, and other factors specific to the financial instrument. Observable inputs reflect market data obtained from independent sources. In contrast, unobservable inputs reflect the entity's assumptions about how market participants would value the financial instrument. Valuation techniques should maximize the use of observable inputs to the extent available.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The following describes the hierarchy of inputs used to measure fair value and the primary valuation methodologies used for financial instrument measured at fair value on a recurring basis:

Level 1	Investments whose values are based on quoted prices (unadjusted) for identical assets in active markets that a government can access at the measurement date.
Level 2	Investments with inputs – other than quoted prices included within Level 1 – that are observable for an asset, either directly or indirectly.
Level 3	Investments classified as Level 3 have unobservable inputs for an asset and may require a degree of professional judgment.

## Fiscal Officer Responsibilities Notes to the Financial Statements For the Years Ended June 30, 2018 and 2017

### NOTE D. DEPOSITS AND INVESTMENTS (CONTINUED)

Illinois Technology Development I and II (ITD I and ITD II) investments are privately-held limited partnership equity investment funds that invest in privately-held companies in accordance with the Technology Development Act (TDA) (30 ILCS 265). The TDA Accounts invest in venture capital firms. A "venture capital" firm makes equity financings for starting up, expanding, or relocating a company, or for related purposes such as financing for seed capital, research and development, introduction of a product or process into the marketplace, or similar needs requiring risk capital. This includes, but is not limited to, financing classified as venture capital, mezzanine, buyout and/or growth. The firms will have a strong Illinois presence with an overall goal to attract, assist and retain quality technology businesses in Illinois.

These investments cannot be redeemed with the funds. Instead, the nature of these investments is that distributions are received through the liquidation of the underlying assets of the fund over the contractual term lives of the investments. The contractual terms of these investments generally range between 10-15 years from the original investment date depending upon whether optional extensions are exercised by the managers of the partnerships. Based on the terms of the limited partnership investments, it is anticipated that the last of the proceeds of these investments will be returned no later than February 10, 2024 for ITD I and June 24, 2027 for ITD II, with the bulk of the proceeds being received sooner. The fair values of the ownership interests in the various limited partnership investments have been determined based on the most recent capital account balances provided by the respective general partners of each limited partnership. Due to the uniqueness and illiquid nature of the underlying privately-held investments, general partners use valuation techniques that rely on unobservable inputs such as estimates and appraisals derived from comparable market transactions to determine the net asset value per share for limited partner investors.

Interest Rate Risk: Interest rate risk is the risk that changes in the interest rates will adversely affect the fair value of an investment. As a means of limiting its exposure to fair value losses arising from rising interest rates, the Treasurer's investment policy limits the investment portfolio to maturities not to exceed ten years with no limit to the amount allocated to investments with less than a two-year maturity. No more than 55% of the investment portfolio shall be allocated to investments with a 2 to 3 year maturity band. No more than 30% of the investment portfolio shall be allocated to investments with a 3 to 4 year maturity band (not including Foreign Government Securities). No more than 15% of the investment portfolio shall be allocated to investments with a 4 to 5 year maturity band. No more than 5% of the investment portfolio shall be allocated to investments with a 5 to 10 year maturity band. The portfolio shall not deviate from these guidelines unless specifically authorized by the Treasurer in writing. The Treasurer's Office uses the segmented time distribution method to identify and manage interest rate risk.

<u>Investments</u>: Most of the Treasurer's investments at June 30, 2018 and 2017 are short-term due to the responsibility to keep funds "liquid" to reimburse banks for warrants paid.

Investments in the Treasurer's pooled accounts are authorized by statute. Certain investments are held in segregated accounts and are purchased at the request of the agency administering the segregated trust fund.

Excluding Time Deposits, the Treasurer had the following investments, stated at fair value except as noted below and maturities as of June 30. Unrealized gains and losses are accounted for in the investment in which the change in fair value occurred. (Expressed in thousands.)

#### NOTE D. DEPOSITS AND INVESTMENTS (CONTINUED)

The amount of the deposit not covered by Federal deposit insurance for all time deposits is required to be collateralized. Securities pledged as collateral to secure these deposits are required to have a market value at an established percentage of the deposit based on the type of security pledged. Securities that may be pledged as collateral are obligations of the United States and its agencies and obligations of the State and its municipalities and school districts, which require a market value of at least 105% of the deposit. If the obligation of the United States and its agencies is a mortgage backed security, the securities pledged as collateral are required to have a market value of at least 110% of the deposit.

Other securities that may be pledged as collateral to secure time deposits are MBIA Certificates (issued by the Municipal Bond Investors Assurance Corporation), Letters of Credit (issued by Federal Home Loan Bank (FHLB)), and Share Certificates (issued by credit unions), which require a market value of at least 102% of the deposit.

Obligations pledged to secure deposits must be delivered to a bank other than the institution in which the deposit was made. Written custodial agreements are required that provide, among other things, that the collateral securities are held separate from the assets of the custodial bank. Prior to placing the deposit and at least monthly thereafter, the Treasurer determines that the collateral has a market value adequate to secure the deposit.

The Treasurer has established accounts with The Illinois Funds for investment of State funds. The Illinois Funds participation provides comparable yields, a source of liquidity and requires less administrative intervention than other short-term investments. The management, custodianship and operation of The Illinois Funds are under the supervision of the State of Illinois, Office of the Treasurer. The fair value of the pool position is the same as the value of pool shares.

The Treasurer purchased investments in eight mutual funds in both 2018 and 2017. These mutual funds provide a comparable yield to other investments, particularly during times of falling interest rates and are a source of liquidity when cash is needed. Investments to the mutual funds can be made daily and interest income is received monthly.

Repurchase agreements are purchased from various financial institutions and rated brokerage firms located in the State. Securities pledged as collateral to secure these agreements are required to have a fair value of at least 102% of the agreement. The agreements require both parties to maintain an acceptable margin on underlying securities to ensure the agreements are adequately collateralized. The Treasurer accepts only obligations of the United States government or its sponsored agencies as collateral for repurchase agreements (other than within the securities lending program).

All securities pledged to secure repurchase agreements are required to be delivered to a bank other than the institution from which the investment was acquired. A written custodial agreement with the banks that hold the Treasurer's repurchase agreement collateral requires, among other things, that the collateral securities be held separately from the assets of the bank.

Commercial paper is purchased from various brokerage firms located in the State and is held in safekeeping by a bank for the Treasurer. A written custodial agreement requires, among other things, that the safekeeping bank hold the commercial paper separately from the assets of the bank.

#### NOTE D. DEPOSITS AND INVESTMENTS (CONTINUED)

The Treasurer's investment in the State of Illinois Secondary Pool Investment Program was deposited in a trust to purchase a security interest in a pool of Small Business Administration (SBA), Federal Home Loan Mortgage Corporation Adjustable Rate Mortgage (FHLMC ARM), and Federal National Mortgage Association Adjustable Rate Mortgage (FNMA ARM) loans. The securities have a floating rate indexed to the prime rate as quoted in *The Wall Street Journal* and are adjusted quarterly. The pool is guaranteed by the U.S. Government and/or the respective agency.

The Treasurer has purchased investments in Supranational Bonds, U.S. Treasury Obligations and U.S. Agency Securities. These purchases permit greater portfolio diversification, provide comparable yields to other investment options, and provide liquidity due to the active secondary market.

The Treasurer's net increase (decrease) in the fair value of investments during 2018 and 2017 was (\$65,014,767) and \$4,758,544, respectively. This amount takes into account all changes in fair value (including purchases and maturities) that occurred during the year and is reported as investment income earned in the Statements of Investment Income.

In allocating funds for short-term investment, the portions allocated to time deposits (certificates of deposit) commercial paper, mutual funds, and bank notes are based on forecasts of anticipated receipts and disbursements to determine funds not needed for at least 30 days from date of investment. Substantially all remaining available funds are invested in repurchase agreements with banks and brokerage firms.

The average yield for investments including amounts listed as cash equivalents on the 2018 and 2017 financial statements was 1.51% and .79%, respectively.

The master repurchase agreements utilized by the Treasurer require the broker or financial institution to maintain the market value of collateral securities at 102% of the agreement. The carrying amount of repurchase agreements, including accrued interest, was \$1,474,973,589 and \$1,954,797,989, and the fair value of the collateral securities under the repurchase agreements was \$1,506,747,520 and \$1,993,367,968, as of June 30, 2018 and 2017, respectively.

<u>Investment Commitment</u>: The Illinois Technology Development Account I and II (TDA I and II) are administered by the Treasurer in accordance with 30 ILCS 265 and have made commitments totaling approximately \$213 million as of June 30, 2018 and \$133 million as of June 30, 2017. The remaining unfunded commitment was approximately \$99.1 million as of June 30, 2018 and \$43.1 million as of June 30, 2017.

The Illinois Technology Development Account I has made commitments totaling approximately \$73 million as of June 30, 2018 and \$73 million as of June 30, 2017. The remaining unfunded commitment amount was approximately \$4.6 million as of June 30, 2018 and \$4.7 million as of June 30, 2017.

The Illinois Technology Development Account II (also known as the Illinois Growth and Innovation Fund) has made commitments totaling \$140 million as of June 30, 2018 and \$60 million as of June 30, 2017. The remaining unfunded commitment amount was approximately \$94.5 million as of June 30, 2018 and \$38.4 million as of June 30, 2017.

It is anticipated that additional commitments will be made in the coming years for TDA II up to or near to the limits established in the Act. No additional future commitments are anticipated for TDA I.

<u>Concentration of Credit Risk</u>: Concentration of credit risk is the risk of loss attributed to the magnitude of the Treasurer's investment in a single issuer. The following investments exceeded 5 percent of the total investments at June 30, 2018 and 2017. (Expressed in thousands.)

<u>Securities Lending Transactions</u>: The State Treasurer lends securities to broker-dealers and other entities for collateral that will be returned for the same securities in the future. The State Treasurer has, through a Securities Lending Agreement, authorized Deutsche Bank AG to lend the State Treasurer's securities to broker-dealers and banks pursuant to a form of loan agreement.

During fiscal year 2018 and 2017, Deutsche Bank AG lent U.S. Agency securities and U.S. Treasury securities and received as collateral U.S. dollar denominated cash. Borrowers were required to deliver collateral for each loan equal to at least 100% of the aggregate fair value of the loaned securities. Loans are marked to market daily. If the fair value of collateral falls below 100%, the borrower must provide additional collateral to raise the fair value to 100%.

The State Treasurer did not impose any restrictions during fiscal years 2018 and 2017 on the amount of loans of available, eligible securities. In the event of borrower default, Deutsche Bank AG provides the State Treasurer with counterparty default indemnification. In addition, Deutsche Bank AG is obligated to indemnify the State Treasurer if Deutsche Bank AG loses any securities, collateral or investments of the State Treasurer in Deutsche Bank AG's custody. There were no losses during fiscal years 2018 and 2017 resulting from a default of the borrowers or Deutsche Bank AG.

During fiscal years 2018 and 2017, the State Treasurer and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested in repurchase agreements with approved counterparties collateralized with securities approved by Deutsche Bank AG and marked to market daily at no less than 102%. Because the loans are terminable at will, their duration did not generally match the duration of the investments made with cash collateral. The State Treasurer had no credit risk as a result of its securities lending program as the collateral held exceeded the fair value of the securities lent. The securities lending collateral invested in repurchase agreements and the fair value of securities on loan for the State Treasurer as of June 30, 2018 were \$4,521,091,000 and \$4,451,198,793, respectively. The securities lending collateral received that was invested in repurchase agreements and the fair value of securities on loan for the State Treasurer as of June 30, 2017 were \$3,522,922,500 and \$3,475,790,990, respectively.

#### NOTE E. DEFEASED DEBT

During fiscal year 2018, the State of Illinois did not issue General Obligation Refunding Bonds. During fiscal year 2017, the State of Illinois issued \$1,303,145,000 General Obligation Refunding Bonds which were called by April 1, 2017.

For financial reporting purposes, the obligations under the defeased bonds have been fully liquidated by the escrow deposit of the funds from the refunding bonds, resulting in a net reduction of General Obligation Indebtedness of \$159,385,493 during fiscal year 2017, as follows:

	Balances at June 30, 2017					
		Principal		Interest		Total
Balance of Defeased Bond Issues	\$ 1	,374,170,000	\$	575,455,650	\$	1,949,625,650
General Obligation Refunding Bonds	1,303,145,000			487,095,157		1,790,240,157
Net Decrease	\$	71,025,000	\$	88,360,493	\$	159,385,493

The advance refunding resulted in an economic gain (difference between the present value of the debt service payments on the old and new debt) of \$106,356,419 during fiscal year 2017.

In prior fiscal years, the State of Illinois defeased certain general obligation and other bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the State of Illinois' financial statements. At June 30, 2018 and 2017, no bonds outstanding were considered defeased.

#### NOTE F. SECURITIES UNDER CUSTODIAL RESPONSIBILITY OF THE TREASURER

At June 30, 2018 and 2017, the Treasurer was responsible for \$115,028,010 and \$114,641,685, respectively, of securities held in safekeeping for various State departments, agencies and institutions. These amounts are not reflected in the Statements of Assets and Other Debits, Liabilities and Accountabilities.

The account balances of warrants cashed but not canceled and the receivable from universities and agencies represent cash expenditures from the State Treasury which were in the process of being recorded by the Comptroller at June 30, 2018 and 2017. The balances in these accounts will vary significantly from day to day, depending on the availability of investable funds and the timing of warrant presentation for payment.

The noninterest-bearing amount receivable from the City of Edwardsville (City) is stated as the unpaid balance of funds advanced to the City in 1967 for the planning and construction of a water main. The repayment terms require the City to pay into the State Treasury ten cents per one thousand gallons of water sold by the City to users receiving water from this main.

Repayments received for the years ended June 30, 2018 and 2017, were \$5,860 and \$6,326, respectively.

Investment income earned but not received represents accrued income on investments not yet matured or collected. The balance fluctuates based on market adjustments, total investments and investment maturity dates.

#### Other Information:

#### Inheritance and Estate Taxes

The Treasurer's Fiscal Officer Responsibilities include joint responsibility with the Attorney General of the State of Illinois (Attorney General) for the collection of inheritance and estate taxes assessed by the circuit courts and the Attorney General, respectively.

Public Act 97-732 went into effect July 1, 2012. As a result, all Illinois Estate and Inheritance taxes are paid directly to the State Treasurer's Office by the estate rather than flowing through the county treasurers. Additionally, county treasurers no longer receive a monthly six percent estate tax distribution for collection services. Instead, six percent of all estate tax collections is deposited in the Estate Tax Refund Fund to be used exclusively for paying estate tax refunds.

Gross inheritance and estate tax receipts for the fiscal years ended June 30, 2018 and 2017, were \$388,954,961 and \$268,012,085, respectively.

The State Treasurer's Office did not receive any new monies to fund its new collection responsibilities.

This Policy applies to all investments entered into on or after the adoption of this instrument. Until the expiration of investments made prior to the adoption of this Policy, such investments will continue to be governed by the policies in effect at the time such investments were made.

This policy applies to any investment under the control of the Treasurer for which no other specific investment policy exists.

#### 2.0 OBJECTIVE:

The primary objective in the investment of state funds is to ensure the safety of principal, while managing liquidity to pay the financial obligations of the State, and providing the highest investment return using authorized instruments.

#### 2.1 SAFETY:

The safety of principal is the foremost objective of the investment program. State investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the portfolio. To achieve this objective, diversification, as defined in Section 8.0 of this Policy, is required to ensure that the Treasurer prudently manages market, interest rate and credit risks.

#### 2.2 LIQUIDITY:

The investment portfolio shall remain sufficiently liquid to enable the State to meet all operating requirements that might be reasonably projected.

#### **2.3 RETURN ON INVESTMENT:**

The safety of principal and the availability of sufficient liquidity are the foremost objectives of the investment program. The investment portfolio shall be designed to obtain the highest available return given the foremost objectives. The Director of the State Portfolio and Banking shall seek to obtain the highest available return using authorized investments during budgetary and economic cycles as mandated in Section 1.0 of this Policy. When the Treasurer deposits funds in support of community development efforts, the rate of return shall include benefits other than direct investment income as authorized by Section 7 of the Deposit of State Moneys Act (15 ILCS 520/7).

The rate of return achieved on the Treasurer's portfolio is measured at regular intervals against relevant industry benchmarks established by the Investment Policy Committee (see Section 2.4 of this Policy), to determine the effectiveness of investment decisions in meeting investment goals. Benchmarks shall be reviewed at a minimum of every two years to ensure accuracy and relevance.

#### 2.4 INVESTMENT POLICY COMMITTEE:

The Investment Policy Committee is chaired by the Treasurer and includes the following members of the Treasurer's office staff: Deputy Treasurer, Chief Investment Officer, General Counsel, Director of Accounting/Budget/Warrant, Director of State Portfolio and Banking, Portfolio Manager & Director of Portfolio Operations, Director of Illinois Funds & E-Pay, the Portfolio Investments & Cash Management Officer, and anyone else deemed appropriate by the Treasurer.

The Chief Investment Officer, who bears responsibility for the administration, planning, development and implementation of all financial and investment strategies per the direction of the Treasurer, shall assist the Treasurer in executing the duties and activities of the Investment Policy Committee.

#### 3.0 ETHICS AND CONFLICTS OF INTEREST:

Authorized investment officers and employees in policy-making positions shall refrain from personal business activity that could conflict, or give the appearance of a conflict with proper execution of the investment program, or that could impair their ability to make impartial investment decisions. Such individuals shall disclose to the Treasurer any material financial interests in financial institutions that conduct business within the State, and they shall further disclose any personal financial investment positions that could be related to the performance of the investment portfolio. In addition, such individuals shall subordinate their personal investment transactions to those of the investment portfolio, particularly with regard to the time of purchases and sales.

#### 4.0 AUTHORIZED BROKERS/DEALERS AND FINANCIAL INSTITUTIONS:

A list shall be maintained of approved financial institutions, which shall be utilized by authorized investment officers. No state funds may be deposited in any financial institution until receipt of a current satisfactory or outstanding rating under the Community Reinvestment Act of 1977 and investment officers have conducted a safety and soundness review of the financial institution by consulting various bank rating services, unless the financial institution has not yet been rated by the bank rating services, in which case the institution may be eligible for a deposit that at maturity will not exceed \$250,000. The amount and duration of deposits shall be based on the safety and soundness review in accordance with guidelines established by the Investment Policy Committee and the diversification limits set forth in Section 8.0 of this Policy. Furthermore, the financial institution's record and current level of financial commitment to its local community will be considered when deciding whether to deposit state funds in that financial institution. No public deposit may be made except in a qualified public depository as defined by the Deposit of State Moneys Act (15 ILCS 520/et seq.).

In addition, a list shall be maintained of approved security brokers/dealers selected according to their creditworthiness, and their financial significance in the state, which shall be measured in terms of the location of the broker/dealer's corporate office, the number of full-time employees, the size of its payroll, or the extent that the broker/dealer has an economic presence in the state. The list may include "primary" dealers or regional dealers who qualify under Securities and Exchange Commission Rule 17 CFR § 15Cc3-1 (Net Capital Requirements for Brokers or Dealers).

All broker/dealers who wish to qualify to bid for investment transactions shall initially, and on a periodic basis upon request, provide to the Treasurer's credit review staff the following, where applicable:

- a) Audited financial statements or a published Statement of Condition;
- b) Proof of minority-, woman-, disabled-, and/or veteran-owned broker/dealer status;
- c) A signed copy of the Treasurer's trading authorization;
- d) Proof of State of Illinois registration;
- e) Proof of registration with the Securities and Exchange Commission;
- f) Completed Broker/Dealer Questionnaire;
- g) Certification of notice and knowledge of this Policy; and
- h) Any other documentation determined necessary by the Treasurer.

The Treasurer's Office shall seek to accord preference to qualified brokers/dealers that provide proof of minority-, female-, disabled-, and/or veteran-owned status. The Treasurer's Office shall establish a process by which said specially designated statuses are verified, and a review shall be conducted at fixed intervals to ensure that special statuses continue to apply.

An annual review of the financial condition and registration of qualified bidders will be conducted by the Treasurer's authorized investment officer(s). More frequent reviews may be conducted if warranted.

To the extent that the Investment Policy Committee deems it advisable to hire external investment consultants, it may do so in accordance with the procurement rules at 44 III. Adm. Code 1400.
