MEMORANDUM

TO: The Honorable John F. Curran, Senate Minority Leader
The Honorable Don Harmon, Senate President
The Honorable Tony McCombie, House Minority Leader
The Honorable Emanuel "Chris" Welch, Speaker of the House

FROM: Grace B. Hou 
Secretary
Illinois Department of Human Services

SUBJECT: **Psychotropic Medication Refusals**

The Illinois Department of Human Services respectfully submits the annual Psychotropic Medication Refusals Report on behalf of the Division of Mental Health in order to fulfill the requirements set forth in P.A. 94-1066, 405 ILCS 5/2-107.3.

If you have any questions or comments, please contact Laura Godinez, Deputy Director of Licensing and Quality Management at Laura.Godinez@illinois.gov.

cc: The Honorable JB Pritzker, Governor
John W. Hollman, Clerk of the House
Tim Anderson, Secretary of the Illinois Senate
Legislative Research Unit
State Government Report Center

State of Illinois
 Department of Human Services
 Division of Mental Health
Psychotropic Medication Refusals
Annual Report Fiscal Year 2023

The Illinois Mental Health and Developmental Disabilities Code section 405 ILCS 5/2-107.3 requires that “each facility director of a State operated health facility shall prepare a quarterly report stating the number of persons who were determined to meet the standard for administration of psychotropic medication or electroconvulsive therapy but for whom it was determined that the filing of such a petition was not warranted as provided for in subsection (h) of Section 5/2-107 of this Code and the reasons for each such determination. The Department shall prepare and publish an annual report summarizing the information received under the section. The Department’s report shall include the data from each facility filing such a report shall separately report the data from each such facility identified by facility.”

Summary FY2023

General Information

	Alton	Chester	Chicago Read	Choate	Elgin	Madden	Packard
Average Daily Census	109	284	145	43	390	95	116
Clients Served	210	536	333	106	858	1627	280
Number of Refusals	1378	506	28	408	994	628	198
Patient Days	39,742	103,745	52,897	12,751	142,360	34,512	42,319
Rate of Refusal per 1000 patient days	34.6	4.9	0.53	32.0	7.0	18.2	4.7

In 2023, there were at **total of 4140 medication refusals incidents** by **526 individual patients** (unduplicated) across all 7 state-operated psychiatric hospitals. Of these only 8 individuals (14 incidents) met the criteria for filing a petition for court ordered medication. 3 petitions were filed and 1 was granted.

The attached annual and quarterly reports show the data by hospital and specifies where refusals occurred, how many posed an imminent risk of harm, how many petitions were filed or the reasons a petition was not filed, and how many petitions were granted.

In summary, Alton Mental Health Center documented the highest number of medication refusal incidents followed by Elgin and Madden. Elgin is the largest hospital so while their number of refusals may be high, the rate of refusals in comparison to the number of patients served is lower. Madden services primarily acute, short-term patients who may initially refuse medication but after a short time are able to agree to medications or who stabilized enough to be discharged without filing a petition. Chicago Read, who serves longer term more stable patients has the fewest number of medication refusals. Though Alton had the highest number of incidents reported, they also had the highest number petitions in progress, and it appears as though they continued to report medication refusal incidents after the petition was already granted.

The number of people refusing medication who posed an imminent risk was relatively low compared to total refusals suggesting that medication refusal alone does not necessarily indicate a person will meet criteria for court ordered medications. Of those who did pose an imminent risk only a very small number individuals had petitions for involuntary medication filed. The reason most often given for not filing a petition is that “other less restrictive services are more appropriate.”
