Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences. Autism does not apply if a child's educational performance is adversely affected primarily because the child has an emotional disturbance. A child who manifests the characteristics of autism after age 3 could be identified as having autism if the criteria in this definition are satisfied.

AVERAGE DAILY ATTENDANCE (ADA): The aggregate days of attendance (based on five clock hours of school work per day) of a given school during a reporting period divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers are considered as days in session.

BOND: A written promise, generally under seal, to pay a specified sum of money (called the face value) at a fixed time in the future (called the date of maturity).
