The Legislative Research Unit is the central general research agency for the General Assembly. A board of 12 legislators, appointed by the Joint Committee on Legislative Support Services, supervises its operations.

A staff of researchers handles inquiries from legislators, legislative committees, and partisan staff. The staff’s areas of expertise include law generally, science and technology, taxation, education, local government, economics and fiscal affairs, and the political and social history of Illinois.

Introduction

The Legislative Research Unit is pleased to present the sixth edition of its County Data Book. This reference collects in one place the major demographic, economic, and political statistics for each county. It is intended for legislators and others who want to become more familiar with the state of Illinois and its counties.

Part 1 describes Illinois as a whole and contains maps shaded to show some important data about counties. Part 2 gives a separate compilation of statistics for each county. Part 3 ranks all counties for most of these statistics. Part 4 contains sources and methodology, and lists of counties by representative, legislative, and Congressional districts. Your suggestions for additions and improvements are appreciated.

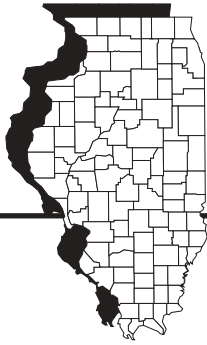

Patrick D. O'Grady
Executive Director

Illinois in Perspective

POPULATION

Illinois' population increased by 988,691 from 1990 to 2000, roughly 8.6%. This was below the national growth rate of 13.2%. Illinois' share of the total U.S. population decreased 0.2 percentage points. Cook County's population increased by 5.3%, and there were large population gains in counties surrounding Cook. Downstate counties showed the largest decreases in population. See Map 1 on page 5.

2000 Census	12,419,293	8.6%	281,421,906	13.2%	4.4%

The 2000 Census showed Illinois with a smaller proportion of all races except black in comparison to the nation, and a population with a median age slightly below to the national average. Educationally, Illinois was above national levels.

ELECTIONS

More voters have taken Democratic than Republican primary ballots since 1992, but the Republican gubernatorial candidate carried the state in 1994 and 1998. In the last three Presidential elections, a majority of those voting cast Democratic ballots. Democratic voters outnumber Republicans in Cook County and many southern Illinois counties, although Republicans are more dominant in the collar counties.

ECONOMY

Illinois' per-capita income decreased from 109.3% of the U.S. average in 1990 to 108.1% in 2000. Income varies widely among the counties throughout the state, ranging from more than 158% of the national average to less than 55%. See Map 2 on page 6 for per-capita income and Map 3 on page 7 for unemployment rates.

Per-capita income

Year	Illinois	U.S.	Ill. % of U.S.
1990	\$20,433	\$18,696	109.3%
1995	25,293	23,196	109.0

Lowest county 2000 (Johnson)	16,140		54.8
Highest county 2000 (Lake)	46,640		158.3

Illinois has 4.5% of the total U.S. workforce and an unemployment rate that is higher than the national rate.

The distribution of jobs by kind of industry in Illinois mirrors the national distribution; two categories (services and wholesale and retail trade) comprise over half. Illinois showed a decline in farm jobs although the national figure showed an increase. See Map 4 on page 8.

REVENUES AND EXPENDITURES

Illinois state government relies mainly on sales tax, income tax, and motor fuel taxes. Local governments rely mainly on property taxes. (The figures below are totals for the most recent years for which data are available or estimates could be made for individual counties.)

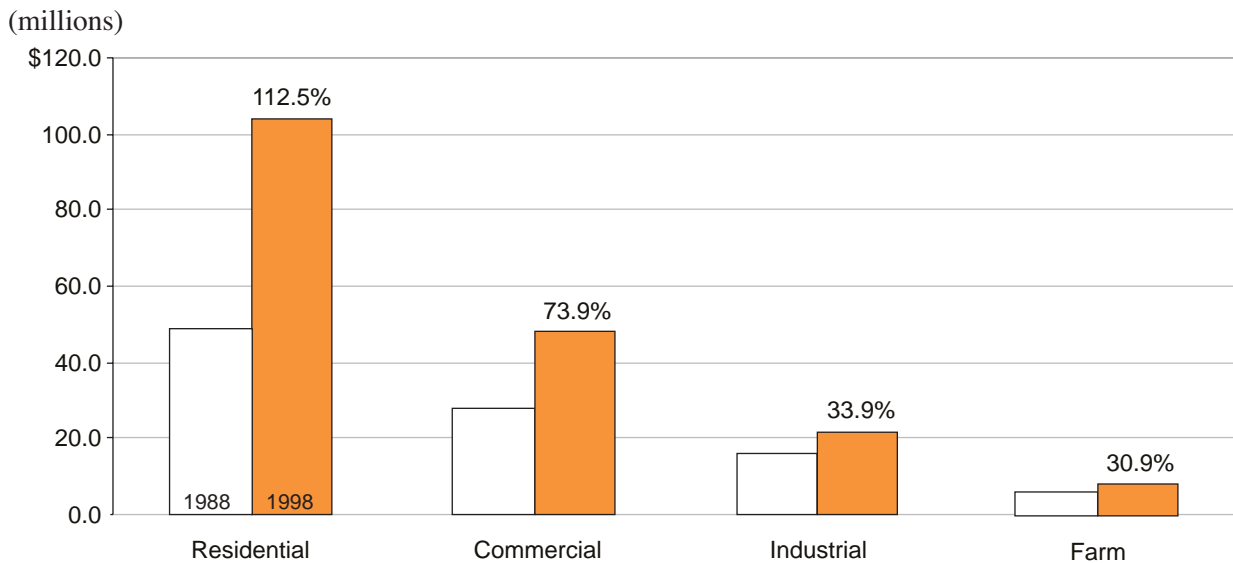

<i>Revenue collections (after refunds)</i>	<i>(millions)</i>
State sales & use tax (2001)	\$5,709.3
Individual income tax (est. FY 01)	8,606.9
State motor fuel tax (est. FY 01)	1,366.6
Local property tax (1998)	14,396.5
<i>State expenditures</i>	<i>(millions)</i>
Elementary and secondary education (1999-2000)	\$5,024.5
Public aid (est. FY 01)	6,253.1
State payroll (2001)	3,889.7
Number of state employees, excluding those at state universities (2001)	102,975
(See Map 5 on page 9)	

LAND USE

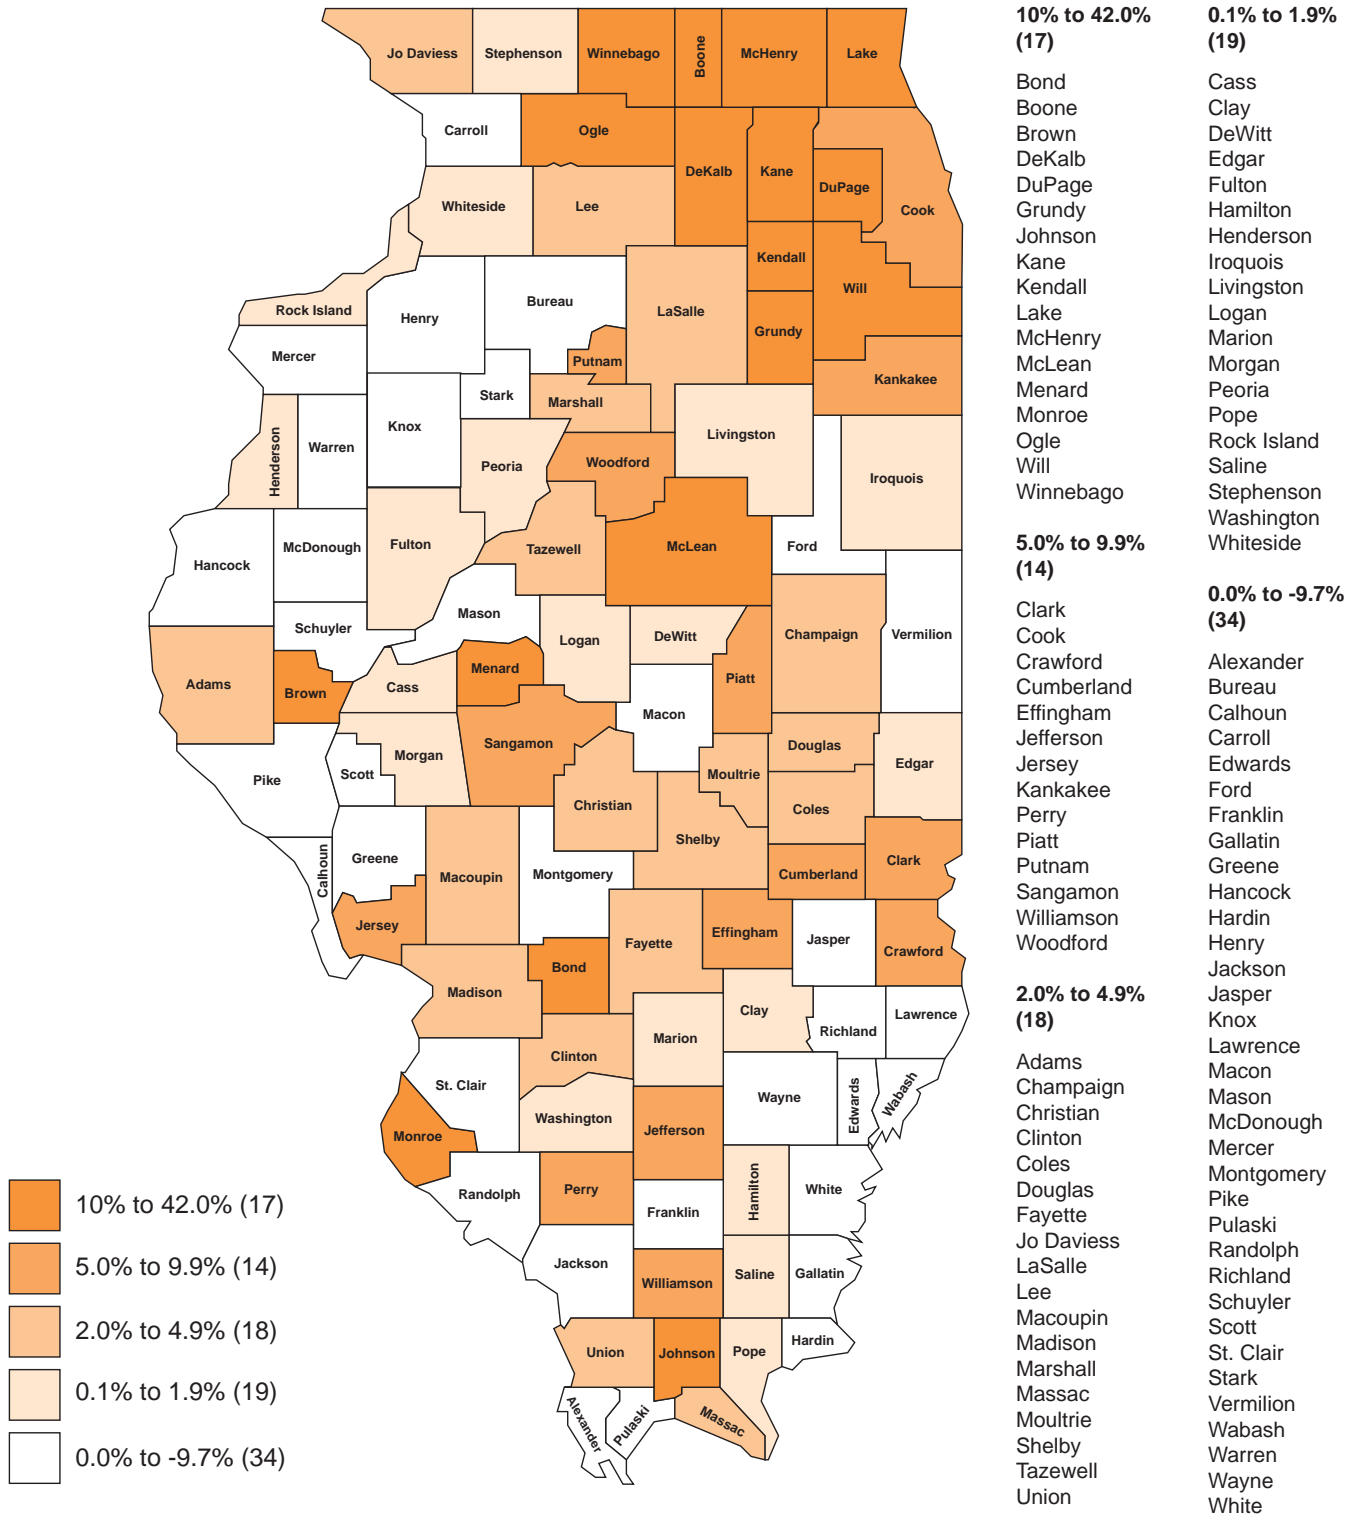

The most striking feature of Illinois land use was the increase in the value of residential property. Figures from 1988-1998 show an increase of over 112%. Farmland showed the smallest increase at 30.9%.

1998 Illinois children under 18 in poverty: U.S. Department of Commerce, Bureau of the Census, "County estimates for people under age 18 in poverty for Illinois: 1998" (downloaded June 3, 2002 from the Census Bureau Internet site).

U.S. and Illinois income per capita:

1990 U.S.: U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, April 1986.

1995 U.S. and Illinois: U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, September 1997.

1990 and 2000 Illinois: U.S. Department of Commerce, Bureau of Economic Analysis, "*Local Area Personal Income*" (downloaded May 20, 2002 from Bureau's Internet site).

U.S. and Illinois Elections: Illinois State Board of Elections, *Official Vote Cast at the General Election* (various years) and *Official Vote Cast at the General Primary Election* (various years).

2001 U.S. Employment: U.S. Department of Labor, Bureau of Labor Statistics, "Household Data - Annual Averages" (downloaded May 20, 2002 from Bureau of Labor Statistics Internet site).

1991 Illinois Employment: Illinois Department of Employment Security, "1990-1999 County and Municipal Labor Force Report" (July 2000).

2001 Illinois Employment: Illinois Department of Employment Security, "Local Area Unemployment Statistics" (downloaded May 9, 2002 from Department's Internet site).

U.S. and Illinois Jobs by industry: U.S. Department of Commerce, Bureau of Economic Analysis, "Full-time and Part-time Employees by Major Industry 1995" (downloaded April 1, 1998 from Regional Economic Information Internet site). The amounts for county are the county's percentages of the type of jobs in the county. The amounts for state are the county's percentages of that type of job in the whole state.

State sales and use tax: Illinois Department of Revenue, "Sales Tax Receipts Reported by Standard Industrial Classification for the Liability Period(s) of January 1, 2001 thru December 31, 2001" (March 7, 2002).

Individual income tax: Estimates for counties are based on each county's proportional share of total FY 2001 state personal income, calculated from U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business* May 2001, pp. 62-63. Please note that these figures are estimates.

State motor-fuel tax: Estimates for counties are based on each county's proportional share of total FY 2001 motor-fuel tax, calculated from Office of the Secretary of State, "County Statistical Report for Motor Vehicle License Units and Transactions Received for 1999" (printout, April 1, 2000). These figures are estimates.

Local property tax: Illinois Department of Revenue, "Comparison of Taxes Extended and Collected by Selected Classes of Property," *Illinois Property Tax Statistics 1998* (January 2002), pp. 184-185, Table 19.

Sources & Methodology (cont'd)

Education: Illinois State Board of Education, Center for School Financial Services, *Illinois Public Schools Financial Statistics and Local Property Tax Data 1999-2000 School Year* (April 2002).

Public Aid: Illinois Department of Human Services, Bureau of Research and Analysis, "Public Aid Grants and Medical Assistance Amounts" (printout, undated). Data are for fiscal year 2001.

State payroll and number of employees: Office of the Comptroller, "County List Summary as of 12/31/01." These amounts overstate total employment costs to the state because it is impossible to separate state employees paid in whole or in part with federal funds from those paid entirely with state funds. The number includes full- and part-time employees who were on the state payroll for any part of calendar year 2001. The number excludes state college and university employees. The number of state employees in each county is based on their place of residence, not where they work.

Land use: Equalized assessed values from Illinois Department of Revenue, "Comparison of Equalized Assessed Valuations by Class of Property," *Illinois Property Tax Statistics 1988* (Aug. 1990), p. 39 Table 15, and *Illinois Property Tax Statistics 1998* (Jan. 2002), pp. 166-167, Table 15.

Number of farms: U.S. Department of Agriculture, "County Summary Highlights: 1997" From 1997 Census of Agriculture (downloaded July 3, 2002 from Department's Internet site).

Foreign ownership of agricultural land: Illinois Department of Agriculture, "Foreign Ownership of Illinois Agricultural Land" (June 12, 2002), Table 5.
