WHEREAS, High-speed Internet access service, referred to
generically as "broadband advanced communication services,"
including both wired and wireless technologies, is essential in
the 21st century for economic competitiveness and quality of
life; and

WHEREAS, The State of Illinois relies on broadband services
to communicate with constituents, to enable city residents to
interact with city services, and to permit voters to monitor
and communicate with elected city leaders and appointed
officials; and

WHEREAS, Broadband infrastructure is vital to the
operation and management of other critical infrastructures,
including energy generation systems, the power grid, water
supply systems, smart cities, the Internet of Things, public
safety and emergency response systems, medical facilities,
educational institutions, and libraries; and

WHEREAS, Studies confirm that open Internet policies lead
to increases in market-driven broadband deployment through the
virtuous cycle; open Internet spurs innovation by users and
online service providers, which increases the demand for
broadband capacity, thus spurring more broadband
infrastructure deployment, which in turn promotes additional innovation by users and service providers; and

WHEREAS, The provision and maintenance of equitable access to technology, broadband Internet access services, digital content, and classroom management tools are necessary for all students, teachers, and school administrators in Illinois in order to provide equal educational resources to all students at all education levels; and

WHEREAS, The Federal Communications Commission (FCC) adopted open Internet rules on February 26, 2015 to protect free expression and innovation on the Internet and to promote investment in the nation's broadband networks; and

WHEREAS, Those open Internet rules ensure that consumers and businesses have access to a fast, fair, and open Internet by imposing three bright-line rules: (1) Broadband providers shall not block access to lawful content, applications, services, or nonharmful devices, (2) Broadband providers shall not impair or degrade lawful Internet traffic on the basis of content, application, or service, or use of a nonharmful device, and (3) Broadband providers shall not favor some lawful Internet traffic over other lawful Internet traffic in exchange for consideration of any kind; and
WHEREAS, Elimination of open Internet protections for consumers dampens the incentive for ISPs to increase broadband capacity at lower cost and increases the likelihood that ISPs will charge both consumers and content providers for transmission; and

WHEREAS, Because the Internet must be a place in which companies, large and small, as well as individual developers, can compete on a level playing field, the State of Illinois supports net neutrality as a principle that underpins a fast, fair, and open Internet for consumers and businesses to ensure equal access to lawful content by prohibiting paid prioritization, throttling, and blocking; therefore, be it

RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE ONE HUNDREDTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that the State of Illinois respectfully urges the President of the United States and Members of the United States Congress, and all relevant federal offices to continue to protect net neutrality and open Internet access.
