

1 AN ACT concerning health.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 5. The Newborn Metabolic Screening Act is amended
5 by changing Section 2 and by adding Section 3.4 as follows:

6 (410 ILCS 240/2) (from Ch. 111 1/2, par. 4904)

7 Sec. 2. General provisions. The Department of Public Health
8 shall administer the provisions of this Act and shall:

9 (a) Institute and carry on an intensive educational program
10 among physicians, hospitals, public health nurses and the
11 public concerning disorders included in newborn screening.
12 This educational program shall include information about the
13 nature of the diseases and examinations for the detection of
14 the diseases in early infancy in order that measures may be
15 taken to prevent the disabilities resulting from the diseases.

16 (a-5) Require that all newborns be screened for the
17 presence of certain genetic, metabolic, and congenital
18 anomalies as determined by the Department, by rule.

19 (a-5.1) Require that all blood and biological specimens
20 collected pursuant to this Act or the rules adopted under this
21 Act be submitted for testing to the nearest Department
22 laboratory designated to perform such tests. The following
23 provisions shall apply concerning testing:

1 (1) Beginning July 1, 2015, the base fee for newborn
2 screening services shall be \$118. The Department may
3 develop a reasonable fee structure and may levy additional
4 fees according to such structure to cover the cost of
5 providing this testing service and for the follow-up of
6 infants with an abnormal screening test. Fees collected
7 from the provision of this testing service shall be placed
8 in the Metabolic Screening and Treatment Fund. Other State
9 and federal funds for expenses related to metabolic
10 screening, follow-up, and treatment programs may also be
11 placed in the Fund.

12 (2) Moneys shall be appropriated from the Fund to the
13 Department solely for the purposes of providing newborn
14 screening, follow-up, and treatment programs. Nothing in
15 this Act shall be construed to prohibit any licensed
16 medical facility from collecting additional specimens for
17 testing for metabolic or neonatal diseases or any other
18 diseases or conditions, as it deems fit. Any person
19 violating the provisions of this subsection (a-5.1) is
20 guilty of a petty offense.

21 (3) If the Department is unable to provide the
22 screening using the State Laboratory, it shall temporarily
23 provide such screening through an accredited laboratory
24 selected by the Department until the Department has the
25 capacity to provide screening through the State
26 Laboratory. If screening is provided on a temporary basis

1 through an accredited laboratory, the Department shall
2 substitute the fee charged by the accredited laboratory,
3 plus a 5% surcharge for documentation and handling, for the
4 fee authorized in this subsection (a-5.1).

5 (a-5.2) Maintain a registry of cases, including
6 information of importance for the purpose of follow-up services
7 to assess long-term outcomes.

8 (a-5.3) Supply the necessary metabolic treatment formulas
9 where practicable for diagnosed cases of amino acid metabolism
10 disorders, including phenylketonuria, organic acid disorders,
11 and fatty acid oxidation disorders for as long as medically
12 indicated, when the product is not available through other
13 State agencies.

14 (a-5.4) Arrange for or provide public health nursing,
15 nutrition, and social services and clinical consultation as
16 indicated.

17 (a-5.5) Utilize the Genetic and Metabolic Diseases
18 Advisory Committee established under the Genetic and Metabolic
19 Diseases Advisory Committee Act to provide guidance and
20 recommendations to the Department's newborn screening program.
21 The Genetic and Metabolic Diseases Advisory Committee shall
22 review the feasibility and advisability of including
23 additional metabolic, genetic, and congenital disorders in the
24 newborn screening panel, according to a review protocol applied
25 to each suggested addition to the screening panel. The
26 Department shall consider the recommendations of the Genetic

1 and Metabolic Diseases Advisory Committee in determining
2 whether to include an additional disorder in the screening
3 panel prior to proposing an administrative rule concerning
4 inclusion of an additional disorder in the newborn screening
5 panel. Notwithstanding any other provision of law, no new
6 screening may begin prior to the occurrence of all the
7 following:

8 (1) the establishment and verification of relevant and
9 appropriate performance specifications as defined under
10 the federal Clinical Laboratory Improvement Amendments and
11 regulations thereunder for U.S. Food and Drug
12 Administration-cleared or in-house developed methods,
13 performed under an institutional review board-approved
14 protocol, if required;

15 (2) the availability of quality assurance testing
16 methodology for the processes set forth in item (1) of this
17 subsection (a-5.5);

18 (3) the acquisition and installment by the Department
19 of the equipment necessary to implement the screening
20 tests;

21 (4) the establishment of precise threshold values
22 ensuring defined disorder identification for each
23 screening test;

24 (5) the authentication of pilot testing achieving each
25 milestone described in items (1) through (4) of this
26 subsection (a-5.5) for each disorder screening test; and

1 (6) the authentication of achieving the potential of
2 high throughput standards for statewide volume of each
3 disorder screening test concomitant with each milestone
4 described in items (1) through (4) of this subsection
5 (a-5.5).

6 (a-6) (Blank).

7 (a-7) (Blank).

8 (a-8) (Blank).

9 (b) (Blank).

10 (c) (Blank).

11 (d) (Blank).

12 (e) (Blank).

16 (410 ILCS 240/3.4 new)

17 Sec. 3.4. Adrenoleukodystrophy. In accordance with the
18 timetable specified in this Section, the Department shall
19 provide all newborns with screening tests for the presence of
20 adrenoleukodystrophy (ALD). The testing shall begin within 18
21 months following the occurrence of all of the following:

22 (1) the development and validation of a reliable
23 methodology for screening newborns for ALD using dried
24 blood spots and quality assurance testing methodology for
25 such test or the approval of a test for ALD using dried

1 blood spots by the federal Food and Drug Administration;

2 (2) the availability of any necessary reagents for such
3 test;

4 (3) the establishment and verification of relevant and
5 appropriate performance specifications as defined under
6 the federal Clinical Laboratory Improvement Amendments and
7 regulations thereunder for Federal Drug
8 Administration-cleared or in-house developed methods,
9 performed under an institutional review board approved
10 protocol, if required;

11 (4) the availability of quality assurance testing and
12 comparative threshold values for ALD;

13 (5) the acquisition and installment by the Department
14 of the equipment necessary to implement the initial pilot
15 and statewide volume of screening tests for ALD;

16 (6) the establishment of precise threshold values
17 ensuring defined disorder identification for ALD;

18 (7) the authentication of pilot testing achieving each
19 milestone described in items (1) through (6) of this
20 Section for ALD; and

21 (8) the authentication of achieving the potential of
22 high throughput standards for statewide volume of ALD
23 concomitant with each milestone described in items (1)
24 through (6) of this Section.

25 The Department is authorized to implement an additional fee
26 for the screening prior to beginning the testing in order to

1 accumulate the resources for start-up and other costs
2 associated with implementation of the screening and thereafter
3 to support the costs associated with screening and follow-up
4 programs for adrenoleukodystrophy.

5 Section 99. Effective date. This Act takes effect July 1,
6 2015.
