

104TH GENERAL ASSEMBLY

State of Illinois

2025 and 2026

SB2720

Introduced 10/28/2025, by Sen. Andrew S. Chesney

SYNOPSIS AS INTRODUCED:

20 ILCS 3855/1-30.4 new
20 ILCS 3855/1-75
20 ILCS 3855/1-128 rep.
220 ILCS 5/4-616 new
220 ILCS 5/4-605 rep.
415 ILCS 5/3.207
415 ILCS 5/9.15a new
415 ILCS 5/9.15 rep.

Specifies that the amendatory Act may be referred to as the Uncap Affordable Power Act. Amends the Illinois Power Agency Act, the Public Utilities Act, and the Environmental Protection Act. Provides, in each of those Acts, that it is the policy of the State not to regulate carbon dioxide emissions that arise from the combustion of fossil fuels for the purpose of generating electrical power. Provides that, beginning on the effective date of the amendatory Act, the Illinois Power Agency, the Illinois Commerce Commission, and the Illinois Environmental Protection Agency shall not regulate carbon dioxide emissions that arise from the combustion of fossil fuels for the purpose of generating electrical power. Removes carbon dioxide from the list of regulated greenhouse gases in the Environmental Protection Act. Repeals from the Environmental Protection Act a provision that provides for the regulation of greenhouse gas emissions from electric generating units and large greenhouse gas-emitting units. Makes other conforming changes. Effective immediately.

LRB104 15726 AAS 28909 b

1 AN ACT concerning safety.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 1. References to Act. This Act may be referred to
5 as the Uncap Affordable Power Act.

6 Section 5. The Illinois Power Agency Act is amended by
7 adding Section 1-30.4 and changing Sections 1-75 and 1-128 as
8 follows:

9 (20 ILCS 3855/1-30.4 new)

10 Sec. 1-30.4. Regulation of carbon dioxide emissions
11 prohibited. Beginning on the effective date of this amendatory
12 Act of the 104th General Assembly, it is the policy of this
13 State not to regulate carbon dioxide emissions that arise from
14 the combustion of fossil fuels for the purpose of electrical
15 power generation. Notwithstanding any other provision of this
16 Act, beginning on the effective date of this amendatory Act of
17 the 104th General Assembly, the Agency's procurement planning
18 and other activities shall not address or in any manner
19 regulate carbon dioxide emissions that arise from fossil fuel
20 combustion for the purpose of generating electrical power
21 except as otherwise required by federal law.

1 (20 ILCS 3855/1-75)

2 Sec. 1-75. Planning and Procurement Bureau. The Planning
3 and Procurement Bureau has the following duties and
4 responsibilities:

5 (a) The Planning and Procurement Bureau shall each year,
6 beginning in 2008, develop procurement plans and conduct
7 competitive procurement processes in accordance with the
8 requirements of Section 16-111.5 of the Public Utilities Act
9 for the eligible retail customers of electric utilities that
10 on December 31, 2005 provided electric service to at least
11 100,000 customers in Illinois. Beginning with the delivery
12 year commencing on June 1, 2017, the Planning and Procurement
13 Bureau shall develop plans and processes for the procurement
14 of zero emission credits from zero emission facilities in
15 accordance with the requirements of subsection (d-5) of this
16 Section. Beginning on the effective date of this amendatory
17 Act of the 102nd General Assembly, the Planning and
18 Procurement Bureau shall develop plans and processes for the
19 procurement of carbon mitigation credits from carbon-free
20 energy resources in accordance with the requirements of
21 subsection (d-10) of this Section. The Planning and
22 Procurement Bureau shall also develop procurement plans and
23 conduct competitive procurement processes in accordance with
24 the requirements of Section 16-111.5 of the Public Utilities
25 Act for the eligible retail customers of small
26 multi-jurisdictional electric utilities that (i) on December

1 31, 2005 served less than 100,000 customers in Illinois and
2 (ii) request a procurement plan for their Illinois
3 jurisdictional load. This Section shall not apply to a small
4 multi-jurisdictional utility until such time as a small
5 multi-jurisdictional utility requests the Agency to prepare a
6 procurement plan for their Illinois jurisdictional load. For
7 the purposes of this Section, the term "eligible retail
8 customers" has the same definition as found in Section
9 16-111.5(a) of the Public Utilities Act.

10 Beginning with the plan or plans to be implemented in the
11 2017 delivery year, the Agency shall no longer include the
12 procurement of renewable energy resources in the annual
13 procurement plans required by this subsection (a), except as
14 provided in subsection (q) of Section 16-111.5 of the Public
15 Utilities Act, and shall instead develop a long-term renewable
16 resources procurement plan in accordance with subsection (c)
17 of this Section and Section 16-111.5 of the Public Utilities
18 Act.

19 In accordance with subsection (c-5) of this Section, the
20 Planning and Procurement Bureau shall oversee the procurement
21 by electric utilities that served more than 300,000 retail
22 customers in this State as of January 1, 2019 of renewable
23 energy credits from new utility-scale solar projects to be
24 installed, along with energy storage facilities, at or
25 adjacent to the sites of electric generating facilities that,
26 as of January 1, 2016, burned coal as their primary fuel

1 source.

2 (1) The Agency shall each year, beginning in 2008, as
3 needed, issue a request for qualifications for experts or
4 expert consulting firms to develop the procurement plans
5 in accordance with Section 16-111.5 of the Public
6 Utilities Act. In order to qualify an expert or expert
7 consulting firm must have:

8 (A) direct previous experience assembling
9 large-scale power supply plans or portfolios for
10 end-use customers;

11 (B) an advanced degree in economics, mathematics,
12 engineering, risk management, or a related area of
13 study;

14 (C) 10 years of experience in the electricity
15 sector, including managing supply risk;

16 (D) expertise in wholesale electricity market
17 rules, including those established by the Federal
18 Energy Regulatory Commission and regional transmission
19 organizations;

20 (E) expertise in credit protocols and familiarity
21 with contract protocols;

22 (F) adequate resources to perform and fulfill the
23 required functions and responsibilities; and

24 (G) the absence of a conflict of interest and
25 inappropriate bias for or against potential bidders or
26 the affected electric utilities.

1 (2) The Agency shall each year, as needed, issue a
2 request for qualifications for a procurement administrator
3 to conduct the competitive procurement processes in
4 accordance with Section 16-111.5 of the Public Utilities
5 Act. In order to qualify an expert or expert consulting
6 firm must have:

7 (A) direct previous experience administering a
8 large-scale competitive procurement process;

9 (B) an advanced degree in economics, mathematics,
10 engineering, or a related area of study;

11 (C) 10 years of experience in the electricity
12 sector, including risk management experience;

13 (D) expertise in wholesale electricity market
14 rules, including those established by the Federal
15 Energy Regulatory Commission and regional transmission
16 organizations;

17 (E) expertise in credit and contract protocols;

18 (F) adequate resources to perform and fulfill the
19 required functions and responsibilities; and

20 (G) the absence of a conflict of interest and
21 inappropriate bias for or against potential bidders or
22 the affected electric utilities.

23 (3) The Agency shall provide affected utilities and
24 other interested parties with the lists of qualified
25 experts or expert consulting firms identified through the
26 request for qualifications processes that are under

1 consideration to develop the procurement plans and to
2 serve as the procurement administrator. The Agency shall
3 also provide each qualified expert's or expert consulting
4 firm's response to the request for qualifications. All
5 information provided under this subparagraph shall also be
6 provided to the Commission. The Agency may provide by rule
7 for fees associated with supplying the information to
8 utilities and other interested parties. These parties
9 shall, within 5 business days, notify the Agency in
10 writing if they object to any experts or expert consulting
11 firms on the lists. Objections shall be based on:

12 (A) failure to satisfy qualification criteria;

13 (B) identification of a conflict of interest; or

14 (C) evidence of inappropriate bias for or against
15 potential bidders or the affected utilities.

16 The Agency shall remove experts or expert consulting
17 firms from the lists within 10 days if there is a
18 reasonable basis for an objection and provide the updated
19 lists to the affected utilities and other interested
20 parties. If the Agency fails to remove an expert or expert
21 consulting firm from a list, an objecting party may seek
22 review by the Commission within 5 days thereafter by
23 filing a petition, and the Commission shall render a
24 ruling on the petition within 10 days. There is no right of
25 appeal of the Commission's ruling.

26 (4) The Agency shall issue requests for proposals to

1 the qualified experts or expert consulting firms to
2 develop a procurement plan for the affected utilities and
3 to serve as procurement administrator.

4 (5) The Agency shall select an expert or expert
5 consulting firm to develop procurement plans based on the
6 proposals submitted and shall award contracts of up to 5
7 years to those selected.

8 (6) The Agency shall select an expert or expert
9 consulting firm, with approval of the Commission, to serve
10 as procurement administrator based on the proposals
11 submitted. If the Commission rejects, within 5 days, the
12 Agency's selection, the Agency shall submit another
13 recommendation within 3 days based on the proposals
14 submitted. The Agency shall award a 5-year contract to the
15 expert or expert consulting firm so selected with
16 Commission approval.

17 (b) The experts or expert consulting firms retained by the
18 Agency shall, as appropriate, prepare procurement plans, and
19 conduct a competitive procurement process as prescribed in
20 Section 16-111.5 of the Public Utilities Act, to ensure
21 adequate, reliable, affordable, efficient, and environmentally
22 sustainable electric service at the lowest total cost over
23 time, taking into account any benefits of price stability, for
24 eligible retail customers of electric utilities that on
25 December 31, 2005 provided electric service to at least
26 100,000 customers in the State of Illinois, and for eligible

1 Illinois retail customers of small multi-jurisdictional
2 electric utilities that (i) on December 31, 2005 served less
3 than 100,000 customers in Illinois and (ii) request a
4 procurement plan for their Illinois jurisdictional load.

5 (c) Renewable portfolio standard.

6 (1) (A) The Agency shall develop a long-term renewable
7 resources procurement plan that shall include procurement
8 programs and competitive procurement events necessary to
9 meet the goals set forth in this subsection (c). The
10 initial long-term renewable resources procurement plan
11 shall be released for comment no later than 160 days after
12 June 1, 2017 (the effective date of Public Act 99-906).
13 The Agency shall review, and may revise on an expedited
14 basis, the long-term renewable resources procurement plan
15 at least every 2 years, which shall be conducted in
16 conjunction with the procurement plan under Section
17 16-111.5 of the Public Utilities Act to the extent
18 practicable to minimize administrative expense. No later
19 than 120 days after the effective date of this amendatory
20 Act of the 103rd General Assembly, the Agency shall
21 release for comment a revision to the long-term renewable
22 resources procurement plan, updating elements of the most
23 recently approved plan as needed to comply with this
24 amendatory Act of the 103rd General Assembly, and any
25 long-term renewable resources procurement plan update
26 published by the Agency but not yet approved by the

1 Illinois Commerce Commission shall be withdrawn. The
2 long-term renewable resources procurement plans shall be
3 subject to review and approval by the Commission under
4 Section 16-111.5 of the Public Utilities Act.

5 (B) Subject to subparagraph (F) of this paragraph (1),
6 the long-term renewable resources procurement plan shall
7 attempt to meet the goals for procurement of renewable
8 energy credits at levels of at least the following overall
9 percentages: 13% by the 2017 delivery year; increasing by
10 at least 1.5% each delivery year thereafter to at least
11 25% by the 2025 delivery year; increasing by at least 3%
12 each delivery year thereafter to at least 40% by the 2030
13 delivery year, and continuing at no less than 40% for each
14 delivery year thereafter. The Agency shall attempt to
15 procure 50% by delivery year 2040. The Agency shall
16 determine the annual increase between delivery year 2030
17 and delivery year 2040, if any, taking into account energy
18 demand, other energy resources, and other public policy
19 goals. In the event of a conflict between these goals and
20 the new wind, new photovoltaic, and hydropower procurement
21 requirements described in items (i) through (iii) of
22 subparagraph (C) of this paragraph (1), the long-term plan
23 shall prioritize compliance with the new wind, new
24 photovoltaic, and hydropower procurement requirements
25 described in items (i) through (iii) of subparagraph (C)
26 of this paragraph (1) over the annual percentage targets

1 described in this subparagraph (B). The Agency shall not
2 comply with the annual percentage targets described in
3 this subparagraph (B) by procuring renewable energy
4 credits that are unlikely to lead to the development of
5 new renewable resources or new, modernized, or retooled
6 hydropower facilities.

7 For the delivery year beginning June 1, 2017, the
8 procurement plan shall attempt to include, subject to the
9 prioritization outlined in this subparagraph (B),
10 cost-effective renewable energy resources equal to at
11 least 13% of each utility's load for eligible retail
12 customers and 13% of the applicable portion of each
13 utility's load for retail customers who are not eligible
14 retail customers, which applicable portion shall equal 50%
15 of the utility's load for retail customers who are not
16 eligible retail customers on February 28, 2017.

17 For the delivery year beginning June 1, 2018, the
18 procurement plan shall attempt to include, subject to the
19 prioritization outlined in this subparagraph (B),
20 cost-effective renewable energy resources equal to at
21 least 14.5% of each utility's load for eligible retail
22 customers and 14.5% of the applicable portion of each
23 utility's load for retail customers who are not eligible
24 retail customers, which applicable portion shall equal 75%
25 of the utility's load for retail customers who are not
26 eligible retail customers on February 28, 2017.

1 For the delivery year beginning June 1, 2019, and for
2 each year thereafter, the procurement plans shall attempt
3 to include, subject to the prioritization outlined in this
4 subparagraph (B), cost-effective renewable energy
5 resources equal to a minimum percentage of each utility's
6 load for all retail customers as follows: 16% by June 1,
7 2019; increasing by 1.5% each year thereafter to 25% by
8 June 1, 2025; and 25% by June 1, 2026; increasing by at
9 least 3% each delivery year thereafter to at least 40% by
10 the 2030 delivery year, and continuing at no less than 40%
11 for each delivery year thereafter. The Agency shall
12 attempt to procure 50% by delivery year 2040. The Agency
13 shall determine the annual increase between delivery year
14 2030 and delivery year 2040, if any, taking into account
15 energy demand, other energy resources, and other public
16 policy goals.

17 For each delivery year, the Agency shall first
18 recognize each utility's obligations for that delivery
19 year under existing contracts. Any renewable energy
20 credits under existing contracts, including renewable
21 energy credits as part of renewable energy resources,
22 shall be used to meet the goals set forth in this
23 subsection (c) for the delivery year.

24 (C) The long-term renewable resources procurement plan
25 described in subparagraph (A) of this paragraph (1) shall
26 include the procurement of renewable energy credits from

1 new projects pursuant to the following terms:

2 (i) At least 10,000,000 renewable energy credits
3 delivered annually by the end of the 2021 delivery
4 year, and increasing ratably to reach 45,000,000
5 renewable energy credits delivered annually from new
6 wind and solar projects, from repowered wind projects,
7 or from retooled hydropower facilities by the end of
8 delivery year 2030 such that the goals in subparagraph
9 (B) of this paragraph (1) are met entirely by
10 procurements of renewable energy credits from new wind
11 and photovoltaic projects. Of that amount, to the
12 extent possible, the Agency shall endeavor to procure
13 45% from new and repowered wind and hydropower
14 projects and shall procure at least 55% from
15 photovoltaic projects. Of the amount to be procured
16 from photovoltaic projects, the Agency shall procure:
17 at least 50% from solar photovoltaic projects using
18 the program outlined in subparagraph (K) of this
19 paragraph (1) from distributed renewable energy
20 generation devices or community renewable generation
21 projects; at least 47% from utility-scale solar
22 projects; at least 3% from brownfield site
23 photovoltaic projects that are not community renewable
24 generation projects. The Agency may propose
25 adjustments to these percentages, including
26 establishing percentage-based goals for the

1 procurement of renewable energy credits from
2 modernized or retooled hydropower facilities and
3 repowered wind projects, through its long-term
4 renewable resources plan described in subparagraph (A)
5 of this paragraph (1) as necessary based on developer
6 interest, market conditions, budget considerations,
7 resource adequacy needs, or other factors.

8 In developing the long-term renewable resources
9 procurement plan, the Agency shall consider other
10 approaches, in addition to competitive procurements,
11 that can be used to procure renewable energy credits
12 from brownfield site photovoltaic projects and thereby
13 help return blighted or contaminated land to
14 productive use while enhancing public health and the
15 well-being of Illinois residents, including those in
16 environmental justice communities, as defined using
17 existing methodologies and findings used by the Agency
18 and its Administrator in its Illinois Solar for All
19 Program. The Agency shall also consider other
20 approaches, in addition to competitive procurements,
21 to procure renewable energy credits from new and
22 existing hydropower facilities to support the
23 development and maintenance of these facilities. The
24 Agency shall explore options to convert existing dams
25 but shall not consider approaches to develop new dams
26 where they do not already exist. To encourage the

1 continued operation of utility-scale wind projects,
2 the Agency shall consider and may propose other
3 approaches in addition to competitive procurements to
4 procure renewable energy credits from repowered wind
5 projects.

6 (ii) In any given delivery year, if forecasted
7 expenses are less than the maximum budget available
8 under subparagraph (E) of this paragraph (1), the
9 Agency shall continue to procure new renewable energy
10 credits until that budget is exhausted in the manner
11 outlined in item (i) of this subparagraph (C).

12 (iii) For purposes of this Section:

13 "New wind projects" means wind renewable energy
14 facilities that are energized after June 1, 2017 for
15 the delivery year commencing June 1, 2017.

16 "New photovoltaic projects" means photovoltaic
17 renewable energy facilities that are energized after
18 June 1, 2017. Photovoltaic projects developed under
19 Section 1-56 of this Act shall not apply towards the
20 new photovoltaic project requirements in this
21 subparagraph (C).

22 "Repowered wind projects" means utility-scale wind
23 projects featuring the removal, replacement, or
24 expansion of turbines at an existing project site, as
25 defined in the long-term renewable resources
26 procurement plan, after the effective date of this

1 amendatory Act of the 103rd General Assembly.
2 Renewable energy credit contract awards used to
3 support repowered wind projects shall only cover the
4 incremental increase in facility electricity
5 production resultant from repowering.

6 For purposes of calculating whether the Agency has
7 procured enough new wind and solar renewable energy
8 credits required by this subparagraph (C), renewable
9 energy facilities that have a multi-year renewable
10 energy credit delivery contract with the utility
11 through at least delivery year 2030 shall be
12 considered new, however no renewable energy credits
13 from contracts entered into before June 1, 2021 shall
14 be used to calculate whether the Agency has procured
15 the correct proportion of new wind and new solar
16 contracts described in this subparagraph (C) for
17 delivery year 2021 and thereafter.

18 (D) Renewable energy credits shall be cost effective.
19 For purposes of this subsection (c), "cost effective"
20 means that the costs of procuring renewable energy
21 resources do not cause the limit stated in subparagraph
22 (E) of this paragraph (1) to be exceeded and, for
23 renewable energy credits procured through a competitive
24 procurement event, do not exceed benchmarks based on
25 market prices for like products in the region. For
26 purposes of this subsection (c), "like products" means

1 contracts for renewable energy credits from the same or
2 substantially similar technology, same or substantially
3 similar vintage (new or existing), the same or
4 substantially similar quantity, and the same or
5 substantially similar contract length and structure.
6 Benchmarks shall reflect development, financing, or
7 related costs resulting from requirements imposed through
8 other provisions of State law, including, but not limited
9 to, requirements in subparagraphs (P) and (Q) of this
10 paragraph (1) and the Renewable Energy Facilities
11 Agricultural Impact Mitigation Act. Confidential
12 benchmarks shall be developed by the procurement
13 administrator, in consultation with the Commission staff,
14 Agency staff, and the procurement monitor and shall be
15 subject to Commission review and approval. If price
16 benchmarks for like products in the region are not
17 available, the procurement administrator shall establish
18 price benchmarks based on publicly available data on
19 regional technology costs and expected current and future
20 regional energy prices. The benchmarks in this Section
21 shall not be used to curtail or otherwise reduce
22 contractual obligations entered into by or through the
23 Agency prior to June 1, 2017 (the effective date of Public
24 Act 99-906).

25 (E) For purposes of this subsection (c), the required
26 procurement of cost-effective renewable energy resources

1 for a particular year commencing prior to June 1, 2017
2 shall be measured as a percentage of the actual amount of
3 electricity (megawatt-hours) supplied by the electric
4 utility to eligible retail customers in the delivery year
5 ending immediately prior to the procurement, and, for
6 delivery years commencing on and after June 1, 2017, the
7 required procurement of cost-effective renewable energy
8 resources for a particular year shall be measured as a
9 percentage of the actual amount of electricity
10 (megawatt-hours) delivered by the electric utility in the
11 delivery year ending immediately prior to the procurement,
12 to all retail customers in its service territory. For
13 purposes of this subsection (c), the amount paid per
14 kilowatthour means the total amount paid for electric
15 service expressed on a per kilowatthour basis. For
16 purposes of this subsection (c), the total amount paid for
17 electric service includes without limitation amounts paid
18 for supply, transmission, capacity, distribution,
19 surcharges, and add-on taxes.

20 Notwithstanding the requirements of this subsection
21 (c), and except as provided in subparagraph (E-5) of
22 paragraph (1) of this subsection (c), the total of
23 renewable energy resources procured under the procurement
24 plan for any single year shall be subject to the
25 limitations of this subparagraph (E). Such procurement
26 shall be reduced for all retail customers based on the

1 amount necessary to limit the annual estimated average net
2 increase due to the costs of these resources included in
3 the amounts paid by eligible retail customers in
4 connection with electric service to no more than 4.25% of
5 the amount paid per kilowatthour by those customers during
6 the year ending May 31, 2009. To arrive at a maximum dollar
7 amount of renewable energy resources to be procured for
8 the particular delivery year, the resulting per
9 kilowatthour amount shall be applied to the actual amount
10 of kilowatthours of electricity delivered, or applicable
11 portion of such amount as specified in paragraph (1) of
12 this subsection (c), as applicable, by the electric
13 utility in the delivery year immediately prior to the
14 procurement to all retail customers in its service
15 territory. The calculations required by this subparagraph
16 (E) shall be made only once for each delivery year at the
17 time that the renewable energy resources are procured.
18 Once the determination as to the amount of renewable
19 energy resources to procure is made based on the
20 calculations set forth in this subparagraph (E) and the
21 contracts procuring those amounts are executed between the
22 seller and applicable electric utility, no subsequent rate
23 impact determinations shall be made and no adjustments to
24 those contract amounts shall be allowed. As provided in
25 subparagraph (E-5) of paragraph (1) of this subsection
26 (c), the seller shall be entitled to full, prompt, and

1 uninterrupted payment under the applicable contract
2 notwithstanding the application of this subparagraph (E),
3 and all costs incurred under such contracts shall be fully
4 recoverable by the electric utility as provided in this
5 Section.

6 (E-5) If, for a particular delivery year, the
7 limitation on the amount of renewable energy resources to
8 be procured, as calculated pursuant to subparagraph (E) of
9 paragraph (1) of this subsection (c), would result in an
10 insufficient collection of funds to fully pay amounts due
11 to a seller under existing contracts executed under this
12 Section or executed under Section 1-56 of this Act, then
13 the following provisions shall apply to ensure full and
14 uninterrupted payment is made to such seller or sellers:

15 (i) If the electric utility has retained unspent
16 funds in an interest-bearing account as prescribed in
17 subsection (k) of Section 16-108 of the Public
18 Utilities Act, then the utility shall use those funds
19 to remit full payment to the sellers to ensure prompt
20 and uninterrupted payment of existing contractual
21 obligation.

22 (ii) If the funds described in item (i) of this
23 subparagraph (E-5) are insufficient to satisfy all
24 existing contractual obligations, then the electric
25 utility shall, nonetheless, remit full payment to the
26 sellers to ensure prompt and uninterrupted payment of

1 existing contractual obligations, provided that the
2 full costs shall be recoverable by the utility in
3 accordance with part (ee) of item (iv) of this
4 subsection (E-5).

5 (iii) The Agency shall promptly notify the
6 Commission that existing contractual obligations are
7 reasonably expected to exceed the maximum collection
8 authorized under subparagraph (E) of paragraph (1) of
9 this subsection (c) for the applicable delivery year.
10 The Agency shall also explain and confirm how the
11 operation of items (i) and (ii) of this subparagraph
12 (E-5) ensures that the electric utility will continue
13 to make prompt and uninterrupted payment under
14 existing contractual obligations. The Agency shall
15 provide this information to the Commission through a
16 notice filed in the Commission docket approving the
17 Agency's operative Long-Term Renewable Resources
18 Procurement Plan that includes the applicable delivery
19 year.

20 (iv) The Agency shall suspend or reduce new
21 contract awards for the procurement of renewable
22 energy credits until an Agency determination is made
23 under subparagraph (E) that additional procurements
24 would not cause the rate impact limitation of
25 subparagraph (E) to be exceeded. At least once
26 annually after the notice provided for in item (iii)

1 of this subparagraph (E-5) is made, the Agency shall
2 analyze existing contract obligations, projected
3 prices for indexed renewable energy credit contracts
4 executed under item (v) of subparagraph (G) of
5 paragraph (1) of subsection (c) of Section 1-75 of
6 this Act, and expected collections authorized under
7 subparagraph (E) to determine whether and to what
8 extent the limitations of subparagraph (E) would be
9 exceeded by additional renewable energy credit
10 procurement contract awards.

11 (aa) If the Agency determines that additional
12 renewable energy credit procurement contract
13 awards could be made without exceeding the
14 limitations of subparagraph (E), then the
15 procurements shall be authorized at a scale
16 determined not to exceed the limitations of
17 subparagraph (E) in a manner consistent with the
18 priorities of this Section.

19 (bb) If the Agency determines that additional
20 renewable energy credit procurement contract
21 awards cannot be made without exceeding the
22 limitations of subparagraph (E), then the Agency
23 shall suspend any new contract awards for the
24 procurement of renewable energy credits until a
25 new rate impact determination is made under
26 subparagraph (E).

1 (cc) Agency determinations made under this
2 item (iv) shall be detailed and comprehensive and,
3 if not made through the Agency's Long-Term
4 Renewable Resources Procurement Plan, shall be
5 filed as a compliance filing in the most recent
6 docketed proceeding approving the Agency's
7 Long-Term Renewable Resources Procurement Plan.

8 (dd) With respect to the procurement of
9 renewable energy credits authorized through
10 programs administered under subsection (b) of
11 Section 1-56 and subparagraphs (K) through (M) of
12 paragraph (1) of subsection (k) of Section 1-75 of
13 this Act, the award of contracts for the
14 procurement of renewable energy credits shall be
15 suspended or reduced only at the conclusion of the
16 program year in which the notice provided for
17 under item (iii) of this subparagraph (E-5) is
18 made.

19 (ee) The contract shall provide that, so long
20 as at least one of: (i) the cost recovery
21 mechanisms referenced in subsection (k) of Section
22 16-108 and subsection (1) of Section 16-111.5 of
23 the Public Utilities Act remains in full force
24 without limitation or (ii) the utility is
25 otherwise authorized and or entitled to full,
26 prompt, and uninterrupted recovery of its costs

1 through any other mechanism, then such seller
2 shall be entitled to full, prompt, and
3 uninterrupted payment under the applicable
4 contract notwithstanding the application of this
5 subparagraph (E).

6 (F) If the limitation on the amount of renewable
7 energy resources procured in subparagraph (E) of this
8 paragraph (1) prevents the Agency from meeting all of the
9 goals in this subsection (c), the Agency's long-term plan
10 shall prioritize compliance with the requirements of this
11 subsection (c) regarding renewable energy credits in the
12 following order:

13 (i) renewable energy credits under existing
14 contractual obligations as of June 1, 2021;

15 (i-5) funding for the Illinois Solar for All
16 Program, as described in subparagraph (O) of this
17 paragraph (1);

18 (ii) renewable energy credits necessary to comply
19 with the new wind and new photovoltaic procurement
20 requirements described in items (i) through (iii) of
21 subparagraph (C) of this paragraph (1); and

22 (iii) renewable energy credits necessary to meet
23 the remaining requirements of this subsection (c).

24 (G) The following provisions shall apply to the
25 Agency's procurement of renewable energy credits under
26 this subsection (c):

1 (i) Notwithstanding whether a long-term renewable
2 resources procurement plan has been approved, the
3 Agency shall conduct an initial forward procurement
4 for renewable energy credits from new utility-scale
5 wind projects within 160 days after June 1, 2017 (the
6 effective date of Public Act 99-906). For the purposes
7 of this initial forward procurement, the Agency shall
8 solicit 15-year contracts for delivery of 1,000,000
9 renewable energy credits delivered annually from new
10 utility-scale wind projects to begin delivery on June
11 1, 2019, if available, but not later than June 1, 2021,
12 unless the project has delays in the establishment of
13 an operating interconnection with the applicable
14 transmission or distribution system as a result of the
15 actions or inactions of the transmission or
16 distribution provider, or other causes for force
17 majeure as outlined in the procurement contract, in
18 which case, not later than June 1, 2022. Payments to
19 suppliers of renewable energy credits shall commence
20 upon delivery. Renewable energy credits procured under
21 this initial procurement shall be included in the
22 Agency's long-term plan and shall apply to all
23 renewable energy goals in this subsection (c).

24 (ii) Notwithstanding whether a long-term renewable
25 resources procurement plan has been approved, the
26 Agency shall conduct an initial forward procurement

1 for renewable energy credits from new utility-scale
2 solar projects and brownfield site photovoltaic
3 projects within one year after June 1, 2017 (the
4 effective date of Public Act 99-906). For the purposes
5 of this initial forward procurement, the Agency shall
6 solicit 15-year contracts for delivery of 1,000,000
7 renewable energy credits delivered annually from new
8 utility-scale solar projects and brownfield site
9 photovoltaic projects to begin delivery on June 1,
10 2019, if available, but not later than June 1, 2021,
11 unless the project has delays in the establishment of
12 an operating interconnection with the applicable
13 transmission or distribution system as a result of the
14 actions or inactions of the transmission or
15 distribution provider, or other causes for force
16 majeure as outlined in the procurement contract, in
17 which case, not later than June 1, 2022. The Agency may
18 structure this initial procurement in one or more
19 discrete procurement events. Payments to suppliers of
20 renewable energy credits shall commence upon delivery.
21 Renewable energy credits procured under this initial
22 procurement shall be included in the Agency's
23 long-term plan and shall apply to all renewable energy
24 goals in this subsection (c).

25 (iii) Notwithstanding whether the Commission has
26 approved the periodic long-term renewable resources

1 procurement plan revision described in Section
2 16-111.5 of the Public Utilities Act, the Agency shall
3 conduct at least one subsequent forward procurement
4 for renewable energy credits from new utility-scale
5 wind projects, new utility-scale solar projects, and
6 new brownfield site photovoltaic projects within 240
7 days after the effective date of this amendatory Act
8 of the 102nd General Assembly in quantities necessary
9 to meet the requirements of subparagraph (C) of this
10 paragraph (1) through the delivery year beginning June
11 1, 2021.

12 (iv) Notwithstanding whether the Commission has
13 approved the periodic long-term renewable resources
14 procurement plan revision described in Section
15 16-111.5 of the Public Utilities Act, the Agency shall
16 open capacity for each category in the Adjustable
17 Block program within 90 days after the effective date
18 of this amendatory Act of the 102nd General Assembly
19 manner:

20 (1) The Agency shall open the first block of
21 annual capacity for the category described in item
22 (i) of subparagraph (K) of this paragraph (1). The
23 first block of annual capacity for item (i) shall
24 be for at least 75 megawatts of total nameplate
25 capacity. The price of the renewable energy credit
26 for this block of capacity shall be 4% less than

1 the price of the last open block in this category.
2 Projects on a waitlist shall be awarded contracts
3 first in the order in which they appear on the
4 waitlist. Notwithstanding anything to the
5 contrary, for those renewable energy credits that
6 qualify and are procured under this subitem (1) of
7 this item (iv), the renewable energy credit
8 delivery contract value shall be paid in full,
9 based on the estimated generation during the first
10 15 years of operation, by the contracting
11 utilities at the time that the facility producing
12 the renewable energy credits is interconnected at
13 the distribution system level of the utility and
14 verified as energized and in compliance by the
15 Program Administrator. The electric utility shall
16 receive and retire all renewable energy credits
17 generated by the project for the first 15 years of
18 operation. Renewable energy credits generated by
19 the project thereafter shall not be transferred
20 under the renewable energy credit delivery
21 contract with the counterparty electric utility.

22 (2) The Agency shall open the first block of
23 annual capacity for the category described in item
24 (ii) of subparagraph (K) of this paragraph (1).
25 The first block of annual capacity for item (ii)
26 shall be for at least 75 megawatts of total

1 nameplate capacity.

2 (A) The price of the renewable energy
3 credit for any project on a waitlist for this
4 category before the opening of this block
5 shall be 4% less than the price of the last
6 open block in this category. Projects on the
7 waitlist shall be awarded contracts first in
8 the order in which they appear on the
9 waitlist. Any projects that are less than or
10 equal to 25 kilowatts in size on the waitlist
11 for this capacity shall be moved to the
12 waitlist for paragraph (1) of this item (iv).
13 Notwithstanding anything to the contrary,
14 projects that were on the waitlist prior to
15 opening of this block shall not be required to
16 be in compliance with the requirements of
17 subparagraph (Q) of this paragraph (1) of this
18 subsection (c). Notwithstanding anything to
19 the contrary, for those renewable energy
20 credits procured from projects that were on
21 the waitlist for this category before the
22 opening of this block 20% of the renewable
23 energy credit delivery contract value, based
24 on the estimated generation during the first
25 15 years of operation, shall be paid by the
26 contracting utilities at the time that the

1 facility producing the renewable energy
2 credits is interconnected at the distribution
3 system level of the utility and verified as
4 energized by the Program Administrator. The
5 remaining portion shall be paid ratably over
6 the subsequent 4-year period. The electric
7 utility shall receive and retire all renewable
8 energy credits generated by the project during
9 the first 15 years of operation. Renewable
10 energy credits generated by the project
11 thereafter shall not be transferred under the
12 renewable energy credit delivery contract with
13 the counterparty electric utility.

14 (B) The price of renewable energy credits
15 for any project not on the waitlist for this
16 category before the opening of the block shall
17 be determined and published by the Agency.
18 Projects not on a waitlist as of the opening
19 of this block shall be subject to the
20 requirements of subparagraph (Q) of this
21 paragraph (1), as applicable. Projects not on
22 a waitlist as of the opening of this block
23 shall be subject to the contract provisions
24 outlined in item (iii) of subparagraph (L) of
25 this paragraph (1). The Agency shall strive to
26 publish updated prices and an updated

1 renewable energy credit delivery contract as
2 quickly as possible.

3 (3) For opening the first 2 blocks of annual
4 capacity for projects participating in item (iii)
5 of subparagraph (K) of paragraph (1) of subsection
6 (c), projects shall be selected exclusively from
7 those projects on the ordinal waitlists of
8 community renewable generation projects
9 established by the Agency based on the status of
10 those ordinal waitlists as of December 31, 2020,
11 and only those projects previously determined to
12 be eligible for the Agency's April 2019 community
13 solar project selection process.

14 The first 2 blocks of annual capacity for item
15 (iii) shall be for 250 megawatts of total
16 nameplate capacity, with both blocks opening
17 simultaneously under the schedule outlined in the
18 paragraphs below. Projects shall be selected as
19 follows:

20 (A) The geographic balance of selected
21 projects shall follow the Group classification
22 found in the Agency's Revised Long-Term
23 Renewable Resources Procurement Plan, with 70%
24 of capacity allocated to projects on the Group
25 B waitlist and 30% of capacity allocated to
26 projects on the Group A waitlist.

1 (B) Contract awards for waitlisted
2 projects shall be allocated proportionate to
3 the total nameplate capacity amount across
4 both ordinal waitlists associated with that
5 applicant firm or its affiliates, subject to
6 the following conditions.

7 (i) Each applicant firm having a
8 waitlisted project eligible for selection
9 shall receive no less than 500 kilowatts
10 in awarded capacity across all groups, and
11 no approved vendor may receive more than
12 20% of each Group's waitlist allocation.

13 (ii) Each applicant firm, upon
14 receiving an award of program capacity
15 proportionate to its waitlisted capacity,
16 may then determine which waitlisted
17 projects it chooses to be selected for a
18 contract award up to that capacity amount.

19 (iii) Assuming all other program
20 requirements are met, applicant firms may
21 adjust the nameplate capacity of applicant
22 projects without losing waitlist
23 eligibility, so long as no project is
24 greater than 2,000 kilowatts in size.

25 (iv) Assuming all other program
26 requirements are met, applicant firms may

1 adjust the expected production associated
2 with applicant projects, subject to
3 verification by the Program Administrator.

4 (C) After a review of affiliate
5 information and the current ordinal waitlists,
6 the Agency shall announce the nameplate
7 capacity award amounts associated with
8 applicant firms no later than 90 days after
9 the effective date of this amendatory Act of
10 the 102nd General Assembly.

11 (D) Applicant firms shall submit their
12 portfolio of projects used to satisfy those
13 contract awards no less than 90 days after the
14 Agency's announcement. The total nameplate
15 capacity of all projects used to satisfy that
16 portfolio shall be no greater than the
17 Agency's nameplate capacity award amount
18 associated with that applicant firm. An
19 applicant firm may decline, in whole or in
20 part, its nameplate capacity award without
21 penalty, with such unmet capacity rolled over
22 to the next block opening for project
23 selection under item (iii) of subparagraph (K)
24 of this subsection (c). Any projects not
25 included in an applicant firm's portfolio may
26 reapply without prejudice upon the next block

1 reopening for project selection under item
2 (iii) of subparagraph (K) of this subsection
3 (c).

4 (E) The renewable energy credit delivery
5 contract shall be subject to the contract and
6 payment terms outlined in item (iv) of
7 subparagraph (L) of this subsection (c).
8 Contract instruments used for this
9 subparagraph shall contain the following
10 terms:

11 (i) Renewable energy credit prices
12 shall be fixed, without further adjustment
13 under any other provision of this Act or
14 for any other reason, at 10% lower than
15 prices applicable to the last open block
16 for this category, inclusive of any adders
17 available for achieving a minimum of 50%
18 of subscribers to the project's nameplate
19 capacity being residential or small
20 commercial customers with subscriptions of
21 below 25 kilowatts in size;

22 (ii) A requirement that a minimum of
23 50% of subscribers to the project's
24 nameplate capacity be residential or small
25 commercial customers with subscriptions of
26 below 25 kilowatts in size;

1 (iii) Permission for the ability of a
2 contract holder to substitute projects
3 with other waitlisted projects without
4 penalty should a project receive a
5 non-binding estimate of costs to construct
6 the interconnection facilities and any
7 required distribution upgrades associated
8 with that project of greater than 30 cents
9 per watt AC of that project's nameplate
10 capacity. In developing the applicable
11 contract instrument, the Agency may
12 consider whether other circumstances
13 outside of the control of the applicant
14 firm should also warrant project
15 substitution rights.

16 The Agency shall publish a finalized
17 updated renewable energy credit delivery
18 contract developed consistent with these terms
19 and conditions no less than 30 days before
20 applicant firms must submit their portfolio of
21 projects pursuant to item (D).

22 (F) To be eligible for an award, the
23 applicant firm shall certify that not less
24 than prevailing wage, as determined pursuant
25 to the Illinois Prevailing Wage Act, was or
26 will be paid to employees who are engaged in

1 construction activities associated with a
2 selected project.

3 (4) The Agency shall open the first block of
4 annual capacity for the category described in item
5 (iv) of subparagraph (K) of this paragraph (1).
6 The first block of annual capacity for item (iv)
7 shall be for at least 50 megawatts of total
8 nameplate capacity. Renewable energy credit prices
9 shall be fixed, without further adjustment under
10 any other provision of this Act or for any other
11 reason, at the price in the last open block in the
12 category described in item (ii) of subparagraph
13 (K) of this paragraph (1). Pricing for future
14 blocks of annual capacity for this category may be
15 adjusted in the Agency's second revision to its
16 Long-Term Renewable Resources Procurement Plan.
17 Projects in this category shall be subject to the
18 contract terms outlined in item (iv) of
19 subparagraph (L) of this paragraph (1).

20 (5) The Agency shall open the equivalent of 2
21 years of annual capacity for the category
22 described in item (v) of subparagraph (K) of this
23 paragraph (1). The first block of annual capacity
24 for item (v) shall be for at least 10 megawatts of
25 total nameplate capacity. Notwithstanding the
26 provisions of item (v) of subparagraph (K) of this

1 paragraph (1), for the purpose of this initial
2 block, the agency shall accept new project
3 applications intended to increase the diversity of
4 areas hosting community solar projects, the
5 business models of projects, and the size of
6 projects, as described by the Agency in its
7 long-term renewable resources procurement plan
8 that is approved as of the effective date of this
9 amendatory Act of the 102nd General Assembly.
10 Projects in this category shall be subject to the
11 contract terms outlined in item (iii) of
12 subsection (L) of this paragraph (1).

13 (6) The Agency shall open the first blocks of
14 annual capacity for the category described in item
15 (vi) of subparagraph (K) of this paragraph (1),
16 with allocations of capacity within the block
17 generally matching the historical share of block
18 capacity allocated between the category described
19 in items (i) and (ii) of subparagraph (K) of this
20 paragraph (1). The first two blocks of annual
21 capacity for item (vi) shall be for at least 75
22 megawatts of total nameplate capacity. The price
23 of renewable energy credits for the blocks of
24 capacity shall be 4% less than the price of the
25 last open blocks in the categories described in
26 items (i) and (ii) of subparagraph (K) of this

1 paragraph (1). Pricing for future blocks of annual
2 capacity for this category may be adjusted in the
3 Agency's second revision to its Long-Term
4 Renewable Resources Procurement Plan. Projects in
5 this category shall be subject to the applicable
6 contract terms outlined in items (ii) and (iii) of
7 subparagraph (L) of this paragraph (1).

8 (v) Upon the effective date of this amendatory Act
9 of the 102nd General Assembly, for all competitive
10 procurements and any procurements of renewable energy
11 credit from new utility-scale wind and new
12 utility-scale photovoltaic projects, the Agency shall
13 procure indexed renewable energy credits and direct
14 respondents to offer a strike price.

15 (1) The purchase price of the indexed
16 renewable energy credit payment shall be
17 calculated for each settlement period. That
18 payment, for any settlement period, shall be equal
19 to the difference resulting from subtracting the
20 strike price from the index price for that
21 settlement period. If this difference results in a
22 negative number, the indexed REC counterparty
23 shall owe the seller the absolute value multiplied
24 by the quantity of energy produced in the relevant
25 settlement period. If this difference results in a
26 positive number, the seller shall owe the indexed

1 REC counterparty this amount multiplied by the
2 quantity of energy produced in the relevant
3 settlement period.

4 (2) Parties shall cash settle every month,
5 summing up all settlements (both positive and
6 negative, if applicable) for the prior month.

7 (3) To ensure funding in the annual budget
8 established under subparagraph (E) for indexed
9 renewable energy credit procurements for each year
10 of the term of such contracts, which must have a
11 minimum tenure of 20 calendar years, the
12 procurement administrator, Agency, Commission
13 staff, and procurement monitor shall quantify the
14 annual cost of the contract by utilizing an
15 industry-standard, third-party forward price curve
16 for energy at the appropriate hub or load zone,
17 including the estimated magnitude and timing of
18 the price effects related to federal carbon
19 controls. Each forward price curve shall contain a
20 specific value of the forecasted market price of
21 electricity for each annual delivery year of the
22 contract. For procurement planning purposes, the
23 impact on the annual budget for the cost of
24 indexed renewable energy credits for each delivery
25 year shall be determined as the expected annual
26 contract expenditure for that year, equaling the

1 difference between (i) the sum across all relevant
2 contracts of the applicable strike price
3 multiplied by contract quantity and (ii) the sum
4 across all relevant contracts of the forward price
5 curve for the applicable load zone for that year
6 multiplied by contract quantity. The contracting
7 utility shall not assume an obligation in excess
8 of the estimated annual cost of the contracts for
9 indexed renewable energy credits. Forward curves
10 shall be revised on an annual basis as updated
11 forward price curves are released and filed with
12 the Commission in the proceeding approving the
13 Agency's most recent long-term renewable resources
14 procurement plan. If the expected contract spend
15 is higher or lower than the total quantity of
16 contracts multiplied by the forward price curve
17 value for that year, the forward price curve shall
18 be updated by the procurement administrator, in
19 consultation with the Agency, Commission staff,
20 and procurement monitors, using then-currently
21 available price forecast data and additional
22 budget dollars shall be obligated or reobligated
23 as appropriate.

24 (4) To ensure that indexed renewable energy
25 credit prices remain predictable and affordable,
26 the Agency may consider the institution of a price

1 collar on REC prices paid under indexed renewable
2 energy credit procurements establishing floor and
3 ceiling REC prices applicable to indexed REC
4 contract prices. Any price collars applicable to
5 indexed REC procurements shall be proposed by the
6 Agency through its long-term renewable resources
7 procurement plan.

8 (vi) All procurements under this subparagraph (G),
9 including the procurement of renewable energy credits
10 from hydropower facilities, shall comply with the
11 geographic requirements in subparagraph (I) of this
12 paragraph (1) and shall follow the procurement
13 processes and procedures described in this Section and
14 Section 16-111.5 of the Public Utilities Act to the
15 extent practicable, and these processes and procedures
16 may be expedited to accommodate the schedule
17 established by this subparagraph (G).

18 (vii) On and after the effective date of this
19 amendatory Act of the 103rd General Assembly, for all
20 procurements of renewable energy credits from
21 hydropower facilities, the Agency shall establish
22 contract terms designed to optimize existing
23 hydropower facilities through modernization or
24 retooling and establish new hydropower facilities at
25 existing dams. Procurements made under this item (vii)
26 shall prioritize projects located in designated

1 environmental justice communities, as defined in
2 subsection (b) of Section 1-56 of this Act, or in
3 projects located in units of local government with
4 median incomes that do not exceed 82% of the median
5 income of the State.

6 (H) The procurement of renewable energy resources for
7 a given delivery year shall be reduced as described in
8 this subparagraph (H) if an alternative retail electric
9 supplier meets the requirements described in this
10 subparagraph (H).

11 (i) Within 45 days after June 1, 2017 (the
12 effective date of Public Act 99-906), an alternative
13 retail electric supplier or its successor shall submit
14 an informational filing to the Illinois Commerce
15 Commission certifying that, as of December 31, 2015,
16 the alternative retail electric supplier owned one or
17 more electric generating facilities that generates
18 renewable energy resources as defined in Section 1-10
19 of this Act, provided that such facilities are not
20 powered by wind or photovoltaics, and the facilities
21 generate one renewable energy credit for each
22 megawatthour of energy produced from the facility.

23 The informational filing shall identify each
24 facility that was eligible to satisfy the alternative
25 retail electric supplier's obligations under Section
26 16-115D of the Public Utilities Act as described in

1 this item (i).

2 (ii) For a given delivery year, the alternative
3 retail electric supplier may elect to supply its
4 retail customers with renewable energy credits from
5 the facility or facilities described in item (i) of
6 this subparagraph (H) that continue to be owned by the
7 alternative retail electric supplier.

8 (iii) The alternative retail electric supplier
9 shall notify the Agency and the applicable utility, no
10 later than February 28 of the year preceding the
11 applicable delivery year or 15 days after June 1, 2017
12 (the effective date of Public Act 99-906), whichever
13 is later, of its election under item (ii) of this
14 subparagraph (H) to supply renewable energy credits to
15 retail customers of the utility. Such election shall
16 identify the amount of renewable energy credits to be
17 supplied by the alternative retail electric supplier
18 to the utility's retail customers and the source of
19 the renewable energy credits identified in the
20 informational filing as described in item (i) of this
21 subparagraph (H), subject to the following
22 limitations:

23 For the delivery year beginning June 1, 2018,
24 the maximum amount of renewable energy credits to
25 be supplied by an alternative retail electric
26 supplier under this subparagraph (H) shall be 68%

1 multiplied by 25% multiplied by 14.5% multiplied
2 by the amount of metered electricity
3 (megawatt-hours) delivered by the alternative
4 retail electric supplier to Illinois retail
5 customers during the delivery year ending May 31,
6 2016.

7 For delivery years beginning June 1, 2019 and
8 each year thereafter, the maximum amount of
9 renewable energy credits to be supplied by an
10 alternative retail electric supplier under this
11 subparagraph (H) shall be 68% multiplied by 50%
12 multiplied by 16% multiplied by the amount of
13 metered electricity (megawatt-hours) delivered by
14 the alternative retail electric supplier to
15 Illinois retail customers during the delivery year
16 ending May 31, 2016, provided that the 16% value
17 shall increase by 1.5% each delivery year
18 thereafter to 25% by the delivery year beginning
19 June 1, 2025, and thereafter the 25% value shall
20 apply to each delivery year.

21 For each delivery year, the total amount of
22 renewable energy credits supplied by all alternative
23 retail electric suppliers under this subparagraph (H)
24 shall not exceed 9% of the Illinois target renewable
25 energy credit quantity. The Illinois target renewable
26 energy credit quantity for the delivery year beginning

1 June 1, 2018 is 14.5% multiplied by the total amount of
2 metered electricity (megawatt-hours) delivered in the
3 delivery year immediately preceding that delivery
4 year, provided that the 14.5% shall increase by 1.5%
5 each delivery year thereafter to 25% by the delivery
6 year beginning June 1, 2025, and thereafter the 25%
7 value shall apply to each delivery year.

8 If the requirements set forth in items (i) through
9 (iii) of this subparagraph (H) are met, the charges
10 that would otherwise be applicable to the retail
11 customers of the alternative retail electric supplier
12 under paragraph (6) of this subsection (c) for the
13 applicable delivery year shall be reduced by the ratio
14 of the quantity of renewable energy credits supplied
15 by the alternative retail electric supplier compared
16 to that supplier's target renewable energy credit
17 quantity. The supplier's target renewable energy
18 credit quantity for the delivery year beginning June
19 1, 2018 is 14.5% multiplied by the total amount of
20 metered electricity (megawatt-hours) delivered by the
21 alternative retail supplier in that delivery year,
22 provided that the 14.5% shall increase by 1.5% each
23 delivery year thereafter to 25% by the delivery year
24 beginning June 1, 2025, and thereafter the 25% value
25 shall apply to each delivery year.

26 On or before April 1 of each year, the Agency shall

1 annually publish a report on its website that
2 identifies the aggregate amount of renewable energy
3 credits supplied by alternative retail electric
4 suppliers under this subparagraph (H).

5 (I) The Agency shall design its long-term renewable
6 energy procurement plan to maximize the State's interest
7 in the health, safety, and welfare of its residents,
8 including but not limited to minimizing sulfur dioxide,
9 nitrogen oxide, particulate matter and other pollution
10 that adversely affects public health in this State,
11 increasing fuel and resource diversity in this State,
12 enhancing the reliability and resiliency of the
13 electricity distribution system in this State, ~~meeting~~
14 ~~goals to limit carbon dioxide emissions under federal or~~
15 ~~State law,~~ and contributing to a cleaner and healthier
16 environment for the citizens of this State. In order to
17 further these legislative purposes, renewable energy
18 credits shall be eligible to be counted toward the
19 renewable energy requirements of this subsection (c) if
20 they are generated from facilities located in this State.
21 The Agency may qualify renewable energy credits from
22 facilities located in states adjacent to Illinois or
23 renewable energy credits associated with the electricity
24 generated by a utility-scale wind energy facility or
25 utility-scale photovoltaic facility and transmitted by a
26 qualifying direct current project described in subsection

1 (b-5) of Section 8-406 of the Public Utilities Act to a
2 delivery point on the electric transmission grid located
3 in this State or a state adjacent to Illinois, if the
4 generator demonstrates and the Agency determines that the
5 operation of such facility or facilities will help promote
6 the State's interest in the health, safety, and welfare of
7 its residents based on the public interest criteria
8 described above. For the purposes of this Section,
9 renewable resources that are delivered via a high voltage
10 direct current converter station located in Illinois shall
11 be deemed generated in Illinois at the time and location
12 the energy is converted to alternating current by the high
13 voltage direct current converter station if the high
14 voltage direct current transmission line: (i) after the
15 effective date of this amendatory Act of the 102nd General
16 Assembly, was constructed with a project labor agreement;
17 (ii) is capable of transmitting electricity at 525kv;
18 (iii) has an Illinois converter station located and
19 interconnected in the region of the PJM Interconnection,
20 LLC; (iv) does not operate as a public utility; and (v) if
21 the high voltage direct current transmission line was
22 energized after June 1, 2023. To ensure that the public
23 interest criteria are applied to the procurement and given
24 full effect, the Agency's long-term procurement plan shall
25 describe in detail how each public interest factor shall
26 be considered and weighted for facilities located in

1 states adjacent to Illinois.

2 (J) In order to promote the competitive development of
3 renewable energy resources in furtherance of the State's
4 interest in the health, safety, and welfare of its
5 residents, renewable energy credits shall not be eligible
6 to be counted toward the renewable energy requirements of
7 this subsection (c) if they are sourced from a generating
8 unit whose costs were being recovered through rates
9 regulated by this State or any other state or states on or
10 after January 1, 2017. Each contract executed to purchase
11 renewable energy credits under this subsection (c) shall
12 provide for the contract's termination if the costs of the
13 generating unit supplying the renewable energy credits
14 subsequently begin to be recovered through rates regulated
15 by this State or any other state or states; and each
16 contract shall further provide that, in that event, the
17 supplier of the credits must return 110% of all payments
18 received under the contract. Amounts returned under the
19 requirements of this subparagraph (J) shall be retained by
20 the utility and all of these amounts shall be used for the
21 procurement of additional renewable energy credits from
22 new wind or new photovoltaic resources as defined in this
23 subsection (c). The long-term plan shall provide that
24 these renewable energy credits shall be procured in the
25 next procurement event.

26 Notwithstanding the limitations of this subparagraph

1 (J), renewable energy credits sourced from generating
2 units that are constructed, purchased, owned, or leased by
3 an electric utility as part of an approved project,
4 program, or pilot under Section 1-56 of this Act shall be
5 eligible to be counted toward the renewable energy
6 requirements of this subsection (c), regardless of how the
7 costs of these units are recovered. As long as a
8 generating unit or an identifiable portion of a generating
9 unit has not had and does not have its costs recovered
10 through rates regulated by this State or any other state,
11 HVDC renewable energy credits associated with that
12 generating unit or identifiable portion thereof shall be
13 eligible to be counted toward the renewable energy
14 requirements of this subsection (c).

15 (K) The long-term renewable resources procurement plan
16 developed by the Agency in accordance with subparagraph
17 (A) of this paragraph (1) shall include an Adjustable
18 Block program for the procurement of renewable energy
19 credits from new photovoltaic projects that are
20 distributed renewable energy generation devices or new
21 photovoltaic community renewable generation projects. The
22 Adjustable Block program shall be generally designed to
23 provide for the steady, predictable, and sustainable
24 growth of new solar photovoltaic development in Illinois.
25 To this end, the Adjustable Block program shall provide a
26 transparent annual schedule of prices and quantities to

1 enable the photovoltaic market to scale up and for
2 renewable energy credit prices to adjust at a predictable
3 rate over time. The prices set by the Adjustable Block
4 program can be reflected as a set value or as the product
5 of a formula.

6 The Adjustable Block program shall include for each
7 category of eligible projects for each delivery year: a
8 single block of nameplate capacity, a price for renewable
9 energy credits within that block, and the terms and
10 conditions for securing a spot on a waitlist once the
11 block is fully committed or reserved. Except as outlined
12 below, the waitlist of projects in a given year will carry
13 over to apply to the subsequent year when another block is
14 opened. Only projects energized on or after June 1, 2017
15 shall be eligible for the Adjustable Block program. For
16 each category for each delivery year the Agency shall
17 determine the amount of generation capacity in each block,
18 and the purchase price for each block, provided that the
19 purchase price provided and the total amount of generation
20 in all blocks for all categories shall be sufficient to
21 meet the goals in this subsection (c). The Agency shall
22 strive to issue a single block sized to provide for
23 stability and market growth. The Agency shall establish
24 program eligibility requirements that ensure that projects
25 that enter the program are sufficiently mature to indicate
26 a demonstrable path to completion. The Agency may

1 periodically review its prior decisions establishing the
2 amount of generation capacity in each block, and the
3 purchase price for each block, and may propose, on an
4 expedited basis, changes to these previously set values,
5 including but not limited to redistributing these amounts
6 and the available funds as necessary and appropriate,
7 subject to Commission approval as part of the periodic
8 plan revision process described in Section 16-111.5 of the
9 Public Utilities Act. The Agency may define different
10 block sizes, purchase prices, or other distinct terms and
11 conditions for projects located in different utility
12 service territories if the Agency deems it necessary to
13 meet the goals in this subsection (c).

14 The Adjustable Block program shall include the
15 following categories in at least the following amounts:

16 (i) At least 20% from distributed renewable energy
17 generation devices with a nameplate capacity of no
18 more than 25 kilowatts.

19 (ii) At least 20% from distributed renewable
20 energy generation devices with a nameplate capacity of
21 more than 25 kilowatts and no more than 5,000
22 kilowatts. The Agency may create sub-categories within
23 this category to account for the differences between
24 projects for small commercial customers, large
25 commercial customers, and public or non-profit
26 customers.

1 (iii) At least 30% from photovoltaic community
2 renewable generation projects. Capacity for this
3 category for the first 2 delivery years after the
4 effective date of this amendatory Act of the 102nd
5 General Assembly shall be allocated to waitlist
6 projects as provided in paragraph (3) of item (iv) of
7 subparagraph (G). Starting in the third delivery year
8 after the effective date of this amendatory Act of the
9 102nd General Assembly or earlier if the Agency
10 determines there is additional capacity needed for to
11 meet previous delivery year requirements, the
12 following shall apply:

13 (1) the Agency shall select projects on a
14 first-come, first-serve basis, however the Agency
15 may suggest additional methods to prioritize
16 projects that are submitted at the same time;

17 (2) projects shall have subscriptions of 25 kW
18 or less for at least 50% of the facility's
19 nameplate capacity and the Agency shall price the
20 renewable energy credits with that as a factor;

21 (3) projects shall not be colocated with one
22 or more other community renewable generation
23 projects, as defined in the Agency's first revised
24 long-term renewable resources procurement plan
25 approved by the Commission on February 18, 2020,
26 such that the aggregate nameplate capacity exceeds

1 5,000 kilowatts; and

2 (4) projects greater than 2 MW may not apply
3 until after the approval of the Agency's revised
4 Long-Term Renewable Resources Procurement Plan
5 after the effective date of this amendatory Act of
6 the 102nd General Assembly.

7 (iv) At least 15% from distributed renewable
8 generation devices or photovoltaic community renewable
9 generation projects installed on public school land.
10 The Agency may create subcategories within this
11 category to account for the differences between
12 project size or location. Projects located within
13 environmental justice communities or within
14 Organizational Units that fall within Tier 1 or Tier 2
15 shall be given priority. Each of the Agency's periodic
16 updates to its long-term renewable resources
17 procurement plan to incorporate the procurement
18 described in this subparagraph (iv) shall also include
19 the proposed quantities or blocks, pricing, and
20 contract terms applicable to the procurement as
21 indicated herein. In each such update and procurement,
22 the Agency shall set the renewable energy credit price
23 and establish payment terms for the renewable energy
24 credits procured pursuant to this subparagraph (iv)
25 that make it feasible and affordable for public
26 schools to install photovoltaic distributed renewable

1 energy devices on their premises, including, but not
2 limited to, those public schools subject to the
3 prioritization provisions of this subparagraph. For
4 the purposes of this item (iv):

5 "Environmental Justice Community" shall have the
6 same meaning set forth in the Agency's long-term
7 renewable resources procurement plan;

8 "Organization Unit", "Tier 1" and "Tier 2" shall
9 have the meanings set for in Section 18-8.15 of the
10 School Code;

11 "Public schools" shall have the meaning set forth
12 in Section 1-3 of the School Code and includes public
13 institutions of higher education, as defined in the
14 Board of Higher Education Act.

15 (v) At least 5% from community-driven community
16 solar projects intended to provide more direct and
17 tangible connection and benefits to the communities
18 which they serve or in which they operate and,
19 additionally, to increase the variety of community
20 solar locations, models, and options in Illinois. As
21 part of its long-term renewable resources procurement
22 plan, the Agency shall develop selection criteria for
23 projects participating in this category. Nothing in
24 this Section shall preclude the Agency from creating a
25 selection process that maximizes community ownership
26 and community benefits in selecting projects to

1 receive renewable energy credits. Selection criteria
2 shall include:

3 (1) community ownership or community
4 wealth-building;

5 (2) additional direct and indirect community
6 benefit, beyond project participation as a
7 subscriber, including, but not limited to,
8 economic, environmental, social, cultural, and
9 physical benefits;

10 (3) meaningful involvement in project
11 organization and development by community members
12 or nonprofit organizations or public entities
13 located in or serving the community;

14 (4) engagement in project operations and
15 management by nonprofit organizations, public
16 entities, or community members; and

17 (5) whether a project is developed in response
18 to a site-specific RFP developed by community
19 members or a nonprofit organization or public
20 entity located in or serving the community.

21 Selection criteria may also prioritize projects
22 that:

23 (1) are developed in collaboration with or to
24 provide complementary opportunities for the Clean
25 Jobs Workforce Network Program, the Illinois
26 Climate Works Preapprenticeship Program, the

1 Returning Residents Clean Jobs Training Program,
2 the Clean Energy Contractor Incubator Program, or
3 the Clean Energy Primes Contractor Accelerator
4 Program;

5 (2) increase the diversity of locations of
6 community solar projects in Illinois, including by
7 locating in urban areas and population centers;

8 (3) are located in Equity Investment Eligible
9 Communities;

10 (4) are not greenfield projects;

11 (5) serve only local subscribers;

12 (6) have a nameplate capacity that does not
13 exceed 500 kW;

14 (7) are developed by an equity eligible
15 contractor; or

16 (8) otherwise meaningfully advance the goals
17 of providing more direct and tangible connection
18 and benefits to the communities which they serve
19 or in which they operate and increasing the
20 variety of community solar locations, models, and
21 options in Illinois.

22 For the purposes of this item (v):

23 "Community" means a social unit in which people
24 come together regularly to effect change; a social
25 unit in which participants are marked by a cooperative
26 spirit, a common purpose, or shared interests or

1 characteristics; or a space understood by its
2 residents to be delineated through geographic
3 boundaries or landmarks.

4 "Community benefit" means a range of services and
5 activities that provide affirmative, economic,
6 environmental, social, cultural, or physical value to
7 a community; or a mechanism that enables economic
8 development, high-quality employment, and education
9 opportunities for local workers and residents, or
10 formal monitoring and oversight structures such that
11 community members may ensure that those services and
12 activities respond to local knowledge and needs.

13 "Community ownership" means an arrangement in
14 which an electric generating facility is, or over time
15 will be, in significant part, owned collectively by
16 members of the community to which an electric
17 generating facility provides benefits; members of that
18 community participate in decisions regarding the
19 governance, operation, maintenance, and upgrades of
20 and to that facility; and members of that community
21 benefit from regular use of that facility.

22 Terms and guidance within these criteria that are
23 not defined in this item (v) shall be defined by the
24 Agency, with stakeholder input, during the development
25 of the Agency's long-term renewable resources
26 procurement plan. The Agency shall develop regular

1 opportunities for projects to submit applications for
2 projects under this category, and develop selection
3 criteria that gives preference to projects that better
4 meet individual criteria as well as projects that
5 address a higher number of criteria.

6 (vi) At least 10% from distributed renewable
7 energy generation devices, which includes distributed
8 renewable energy devices with a nameplate capacity
9 under 5,000 kilowatts or photovoltaic community
10 renewable generation projects, from applicants that
11 are equity eligible contractors. The Agency may create
12 subcategories within this category to account for the
13 differences between project size and type. The Agency
14 shall propose to increase the percentage in this item
15 (vi) over time to 40% based on factors, including, but
16 not limited to, the number of equity eligible
17 contractors and capacity used in this item (vi) in
18 previous delivery years.

19 The Agency shall propose a payment structure for
20 contracts executed pursuant to this paragraph under
21 which, upon a demonstration of qualification or need,
22 applicant firms are advanced capital disbursed after
23 contract execution but before the contracted project's
24 energization. The amount or percentage of capital
25 advanced prior to project energization shall be
26 sufficient to both cover any increase in development

1 costs resulting from prevailing wage requirements or
2 project-labor agreements, and designed to overcome
3 barriers in access to capital faced by equity eligible
4 contractors. The amount or percentage of advanced
5 capital may vary by subcategory within this category
6 and by an applicant's demonstration of need, with such
7 levels to be established through the Long-Term
8 Renewable Resources Procurement Plan authorized under
9 subparagraph (A) of paragraph (1) of subsection (c) of
10 this Section.

11 Contracts developed featuring capital advanced
12 prior to a project's energization shall feature
13 provisions to ensure both the successful development
14 of applicant projects and the delivery of the
15 renewable energy credits for the full term of the
16 contract, including ongoing collateral requirements
17 and other provisions deemed necessary by the Agency,
18 and may include energization timelines longer than for
19 comparable project types. The percentage or amount of
20 capital advanced prior to project energization shall
21 not operate to increase the overall contract value,
22 however contracts executed under this subparagraph may
23 feature renewable energy credit prices higher than
24 those offered to similar projects participating in
25 other categories. Capital advanced prior to
26 energization shall serve to reduce the ratable

1 payments made after energization under items (ii) and
2 (iii) of subparagraph (L) or payments made for each
3 renewable energy credit delivery under item (iv) of
4 subparagraph (L).

5 (vii) The remaining capacity shall be allocated by
6 the Agency in order to respond to market demand. The
7 Agency shall allocate any discretionary capacity prior
8 to the beginning of each delivery year.

9 To the extent there is uncontracted capacity from any
10 block in any of categories (i) through (vi) at the end of a
11 delivery year, the Agency shall redistribute that capacity
12 to one or more other categories giving priority to
13 categories with projects on a waitlist. The redistributed
14 capacity shall be added to the annual capacity in the
15 subsequent delivery year, and the price for renewable
16 energy credits shall be the price for the new delivery
17 year. Redistributed capacity shall not be considered
18 redistributed when determining whether the goals in this
19 subsection (K) have been met.

20 Notwithstanding anything to the contrary, as the
21 Agency increases the capacity in item (vi) to 40% over
22 time, the Agency may reduce the capacity of items (i)
23 through (v) proportionate to the capacity of the
24 categories of projects in item (vi), to achieve a balance
25 of project types.

26 The Adjustable Block program shall be designed to

1 ensure that renewable energy credits are procured from
2 projects in diverse locations and are not concentrated in
3 a few regional areas.

4 (L) Notwithstanding provisions for advancing capital
5 prior to project energization found in item (vi) of
6 subparagraph (K), the procurement of photovoltaic
7 renewable energy credits under items (i) through (vi) of
8 subparagraph (K) of this paragraph (1) shall otherwise be
9 subject to the following contract and payment terms:

10 (i) (Blank).

11 (ii) For those renewable energy credits that
12 qualify and are procured under item (i) of
13 subparagraph (K) of this paragraph (1), and any
14 similar category projects that are procured under item
15 (vi) of subparagraph (K) of this paragraph (1) that
16 qualify and are procured under item (vi), the contract
17 length shall be 15 years. The renewable energy credit
18 delivery contract value shall be paid in full, based
19 on the estimated generation during the first 15 years
20 of operation, by the contracting utilities at the time
21 that the facility producing the renewable energy
22 credits is interconnected at the distribution system
23 level of the utility and verified as energized and
24 compliant by the Program Administrator. The electric
25 utility shall receive and retire all renewable energy
26 credits generated by the project for the first 15

1 years of operation. Renewable energy credits generated
2 by the project thereafter shall not be transferred
3 under the renewable energy credit delivery contract
4 with the counterparty electric utility.

5 (iii) For those renewable energy credits that
6 qualify and are procured under item (ii) and (v) of
7 subparagraph (K) of this paragraph (1) and any like
8 projects similar category that qualify and are
9 procured under item (vi), the contract length shall be
10 15 years. 15% of the renewable energy credit delivery
11 contract value, based on the estimated generation
12 during the first 15 years of operation, shall be paid
13 by the contracting utilities at the time that the
14 facility producing the renewable energy credits is
15 interconnected at the distribution system level of the
16 utility and verified as energized and compliant by the
17 Program Administrator. The remaining portion shall be
18 paid ratably over the subsequent 6-year period. The
19 electric utility shall receive and retire all
20 renewable energy credits generated by the project for
21 the first 15 years of operation. Renewable energy
22 credits generated by the project thereafter shall not
23 be transferred under the renewable energy credit
24 delivery contract with the counterparty electric
25 utility.

26 (iv) For those renewable energy credits that

1 qualify and are procured under items (iii) and (iv) of
2 subparagraph (K) of this paragraph (1), and any like
3 projects that qualify and are procured under item
4 (vi), the renewable energy credit delivery contract
5 length shall be 20 years and shall be paid over the
6 delivery term, not to exceed during each delivery year
7 the contract price multiplied by the estimated annual
8 renewable energy credit generation amount. If
9 generation of renewable energy credits during a
10 delivery year exceeds the estimated annual generation
11 amount, the excess renewable energy credits shall be
12 carried forward to future delivery years and shall not
13 expire during the delivery term. If generation of
14 renewable energy credits during a delivery year,
15 including carried forward excess renewable energy
16 credits, if any, is less than the estimated annual
17 generation amount, payments during such delivery year
18 will not exceed the quantity generated plus the
19 quantity carried forward multiplied by the contract
20 price. The electric utility shall receive all
21 renewable energy credits generated by the project
22 during the first 20 years of operation and retire all
23 renewable energy credits paid for under this item (iv)
24 and return at the end of the delivery term all
25 renewable energy credits that were not paid for.
26 Renewable energy credits generated by the project

1 thereafter shall not be transferred under the
2 renewable energy credit delivery contract with the
3 counterparty electric utility. Notwithstanding the
4 preceding, for those projects participating under item
5 (iii) of subparagraph (K), the contract price for a
6 delivery year shall be based on subscription levels as
7 measured on the higher of the first business day of the
8 delivery year or the first business day 6 months after
9 the first business day of the delivery year.
10 Subscription of 90% of nameplate capacity or greater
11 shall be deemed to be fully subscribed for the
12 purposes of this item (iv). For projects receiving a
13 20-year delivery contract, REC prices shall be
14 adjusted downward for consistency with the incentive
15 levels previously determined to be necessary to
16 support projects under 15-year delivery contracts,
17 taking into consideration any additional new
18 requirements placed on the projects, including, but
19 not limited to, labor standards.

20 (v) Each contract shall include provisions to
21 ensure the delivery of the estimated quantity of
22 renewable energy credits and ongoing collateral
23 requirements and other provisions deemed appropriate
24 by the Agency.

25 (vi) The utility shall be the counterparty to the
26 contracts executed under this subparagraph (L) that

1 are approved by the Commission under the process
2 described in Section 16-111.5 of the Public Utilities
3 Act. No contract shall be executed for an amount that
4 is less than one renewable energy credit per year.

5 (vii) If, at any time, approved applications for
6 the Adjustable Block program exceed funds collected by
7 the electric utility or would cause the Agency to
8 exceed the limitation described in subparagraph (E) of
9 this paragraph (1) on the amount of renewable energy
10 resources that may be procured, then the Agency may
11 consider future uncommitted funds to be reserved for
12 these contracts on a first-come, first-served basis.

13 (viii) Nothing in this Section shall require the
14 utility to advance any payment or pay any amounts that
15 exceed the actual amount of revenues anticipated to be
16 collected by the utility under paragraph (6) of this
17 subsection (c) and subsection (k) of Section 16-108 of
18 the Public Utilities Act inclusive of eligible funds
19 collected in prior years and alternative compliance
20 payments for use by the utility.

21 (ix) Notwithstanding other requirements of this
22 subparagraph (L), no modification shall be required to
23 Adjustable Block program contracts if they were
24 already executed prior to the establishment, approval,
25 and implementation of new contract forms as a result
26 of this amendatory Act of the 102nd General Assembly.

1 (x) Contracts may be assignable, but only to
2 entities first deemed by the Agency to have met
3 program terms and requirements applicable to direct
4 program participation. In developing contracts for the
5 delivery of renewable energy credits, the Agency shall
6 be permitted to establish fees applicable to each
7 contract assignment.

8 (M) The Agency shall be authorized to retain one or
9 more experts or expert consulting firms to develop,
10 administer, implement, operate, and evaluate the
11 Adjustable Block program described in subparagraph (K) of
12 this paragraph (1), and the Agency shall retain the
13 consultant or consultants in the same manner, to the
14 extent practicable, as the Agency retains others to
15 administer provisions of this Act, including, but not
16 limited to, the procurement administrator. The selection
17 of experts and expert consulting firms and the procurement
18 process described in this subparagraph (M) are exempt from
19 the requirements of Section 20-10 of the Illinois
20 Procurement Code, under Section 20-10 of that Code. The
21 Agency shall strive to minimize administrative expenses in
22 the implementation of the Adjustable Block program.

23 The Program Administrator may charge application fees
24 to participating firms to cover the cost of program
25 administration. Any application fee amounts shall
26 initially be determined through the long-term renewable

1 resources procurement plan, and modifications to any
2 application fee that deviate more than 25% from the
3 Commission's approved value must be approved by the
4 Commission as a long-term plan revision under Section
5 16-111.5 of the Public Utilities Act. The Agency shall
6 consider stakeholder feedback when making adjustments to
7 application fees and shall notify stakeholders in advance
8 of any planned changes.

9 In addition to covering the costs of program
10 administration, the Agency, in conjunction with its
11 Program Administrator, may also use the proceeds of such
12 fees charged to participating firms to support public
13 education and ongoing regional and national coordination
14 with nonprofit organizations, public bodies, and others
15 engaged in the implementation of renewable energy
16 incentive programs or similar initiatives. This work may
17 include developing papers and reports, hosting regional
18 and national conferences, and other work deemed necessary
19 by the Agency to position the State of Illinois as a
20 national leader in renewable energy incentive program
21 development and administration.

22 The Agency and its consultant or consultants shall
23 monitor block activity, share program activity with
24 stakeholders and conduct quarterly meetings to discuss
25 program activity and market conditions. If necessary, the
26 Agency may make prospective administrative adjustments to

1 the Adjustable Block program design, such as making
2 adjustments to purchase prices as necessary to achieve the
3 goals of this subsection (c). Program modifications to any
4 block price that do not deviate from the Commission's
5 approved value by more than 10% shall take effect
6 immediately and are not subject to Commission review and
7 approval. Program modifications to any block price that
8 deviate more than 10% from the Commission's approved value
9 must be approved by the Commission as a long-term plan
10 amendment under Section 16-111.5 of the Public Utilities
11 Act. The Agency shall consider stakeholder feedback when
12 making adjustments to the Adjustable Block design and
13 shall notify stakeholders in advance of any planned
14 changes.

15 The Agency and its program administrators for both the
16 Adjustable Block program and the Illinois Solar for All
17 Program, consistent with the requirements of this
18 subsection (c) and subsection (b) of Section 1-56 of this
19 Act, shall propose the Adjustable Block program terms,
20 conditions, and requirements, including the prices to be
21 paid for renewable energy credits, where applicable, and
22 requirements applicable to participating entities and
23 project applications, through the development, review, and
24 approval of the Agency's long-term renewable resources
25 procurement plan described in this subsection (c) and
26 paragraph (5) of subsection (b) of Section 16-111.5 of the

1 Public Utilities Act. Terms, conditions, and requirements
2 for program participation shall include the following:

3 (i) The Agency shall establish a registration
4 process for entities seeking to qualify for
5 program-administered incentive funding and establish
6 baseline qualifications for vendor approval. The
7 Agency must maintain a list of approved entities on
8 each program's website, and may revoke a vendor's
9 ability to receive program-administered incentive
10 funding status upon a determination that the vendor
11 failed to comply with contract terms, the law, or
12 other program requirements.

13 (ii) The Agency shall establish program
14 requirements and minimum contract terms to ensure
15 projects are properly installed and produce their
16 expected amounts of energy. Program requirements may
17 include on-site inspections and photo documentation of
18 projects under construction. The Agency may require
19 repairs, alterations, or additions to remedy any
20 material deficiencies discovered. Vendors who have a
21 disproportionately high number of deficient systems
22 may lose their eligibility to continue to receive
23 State-administered incentive funding through Agency
24 programs and procurements.

25 (iii) To discourage deceptive marketing or other
26 bad faith business practices, the Agency may require

1 direct program participants, including agents
2 operating on their behalf, to provide standardized
3 disclosures to a customer prior to that customer's
4 execution of a contract for the development of a
5 distributed generation system or a subscription to a
6 community solar project.

7 (iv) The Agency shall establish one or multiple
8 Consumer Complaints Centers to accept complaints
9 regarding businesses that participate in, or otherwise
10 benefit from, State-administered incentive funding
11 through Agency-administered programs. The Agency shall
12 maintain a public database of complaints with any
13 confidential or particularly sensitive information
14 redacted from public entries.

15 (v) Through a filing in the proceeding for the
16 approval of its long-term renewable energy resources
17 procurement plan, the Agency shall provide an annual
18 written report to the Illinois Commerce Commission
19 documenting the frequency and nature of complaints and
20 any enforcement actions taken in response to those
21 complaints.

22 (vi) The Agency shall schedule regular meetings
23 with representatives of the Office of the Attorney
24 General, the Illinois Commerce Commission, consumer
25 protection groups, and other interested stakeholders
26 to share relevant information about consumer

1 protection, project compliance, and complaints
2 received.

3 (vii) To the extent that complaints received
4 implicate the jurisdiction of the Office of the
5 Attorney General, the Illinois Commerce Commission, or
6 local, State, or federal law enforcement, the Agency
7 shall also refer complaints to those entities as
8 appropriate.

9 (N) The Agency shall establish the terms, conditions,
10 and program requirements for photovoltaic community
11 renewable generation projects with a goal to expand access
12 to a broader group of energy consumers, to ensure robust
13 participation opportunities for residential and small
14 commercial customers and those who cannot install
15 renewable energy on their own properties. Subject to
16 reasonable limitations, any plan approved by the
17 Commission shall allow subscriptions to community
18 renewable generation projects to be portable and
19 transferable. For purposes of this subparagraph (N),
20 "portable" means that subscriptions may be retained by the
21 subscriber even if the subscriber relocates or changes its
22 address within the same utility service territory; and
23 "transferable" means that a subscriber may assign or sell
24 subscriptions to another person within the same utility
25 service territory.

26 Through the development of its long-term renewable

1 resources procurement plan, the Agency may consider
2 whether community renewable generation projects utilizing
3 technologies other than photovoltaics should be supported
4 through State-administered incentive funding, and may
5 issue requests for information to gauge market demand.

6 Electric utilities shall provide a monetary credit to
7 a subscriber's subsequent bill for service for the
8 proportional output of a community renewable generation
9 project attributable to that subscriber as specified in
10 Section 16-107.5 of the Public Utilities Act.

11 The Agency shall purchase renewable energy credits
12 from subscribed shares of photovoltaic community renewable
13 generation projects through the Adjustable Block program
14 described in subparagraph (K) of this paragraph (1) or
15 through the Illinois Solar for All Program described in
16 Section 1-56 of this Act. The electric utility shall
17 purchase any unsubscribed energy from community renewable
18 generation projects that are Qualifying Facilities ("QF")
19 under the electric utility's tariff for purchasing the
20 output from QFs under Public Utilities Regulatory Policies
21 Act of 1978.

22 The owners of and any subscribers to a community
23 renewable generation project shall not be considered
24 public utilities or alternative retail electricity
25 suppliers under the Public Utilities Act solely as a
26 result of their interest in or subscription to a community

1 renewable generation project and shall not be required to
2 become an alternative retail electric supplier by
3 participating in a community renewable generation project
4 with a public utility.

5 (O) For the delivery year beginning June 1, 2018, the
6 long-term renewable resources procurement plan required by
7 this subsection (c) shall provide for the Agency to
8 procure contracts to continue offering the Illinois Solar
9 for All Program described in subsection (b) of Section
10 1-56 of this Act, and the contracts approved by the
11 Commission shall be executed by the utilities that are
12 subject to this subsection (c). The long-term renewable
13 resources procurement plan shall allocate up to
14 \$50,000,000 per delivery year to fund the programs, and
15 the plan shall determine the amount of funding to be
16 apportioned to the programs identified in subsection (b)
17 of Section 1-56 of this Act; provided that for the
18 delivery years beginning June 1, 2021, June 1, 2022, and
19 June 1, 2023, the long-term renewable resources
20 procurement plan may average the annual budgets over a
21 3-year period to account for program ramp-up. For the
22 delivery years beginning June 1, 2021, June 1, 2024, June
23 1, 2027, and June 1, 2030 and additional \$10,000,000 shall
24 be provided to the Department of Commerce and Economic
25 Opportunity to implement the workforce development
26 programs and reporting as outlined in Section 16-108.12 of

1 the Public Utilities Act. In making the determinations
2 required under this subparagraph (O), the Commission shall
3 consider the experience and performance under the programs
4 and any evaluation reports. The Commission shall also
5 provide for an independent evaluation of those programs on
6 a periodic basis that are funded under this subparagraph
7 (O).

8 (P) All programs and procurements under this
9 subsection (c) shall be designed to encourage
10 participating projects to use a diverse and equitable
11 workforce and a diverse set of contractors, including
12 minority-owned businesses, disadvantaged businesses,
13 trade unions, graduates of any workforce training programs
14 administered under this Act, and small businesses.

15 The Agency shall develop a method to optimize
16 procurement of renewable energy credits from proposed
17 utility-scale projects that are located in communities
18 eligible to receive Energy Transition Community Grants
19 pursuant to Section 10-20 of the Energy Community
20 Reinvestment Act. If this requirement conflicts with other
21 provisions of law or the Agency determines that full
22 compliance with the requirements of this subparagraph (P)
23 would be unreasonably costly or administratively
24 impractical, the Agency is to propose alternative
25 approaches to achieve development of renewable energy
26 resources in communities eligible to receive Energy

1 Transition Community Grants pursuant to Section 10-20 of
2 the Energy Community Reinvestment Act or seek an exemption
3 from this requirement from the Commission.

4 (Q) Each facility listed in subitems (i) through (ix)
5 of item (1) of this subparagraph (Q) for which a renewable
6 energy credit delivery contract is signed after the
7 effective date of this amendatory Act of the 102nd General
8 Assembly is subject to the following requirements through
9 the Agency's long-term renewable resources procurement
10 plan:

11 (1) Each facility shall be subject to the
12 prevailing wage requirements included in the
13 Prevailing Wage Act. The Agency shall require
14 verification that all construction performed on the
15 facility by the renewable energy credit delivery
16 contract holder, its contractors, or its
17 subcontractors relating to construction of the
18 facility is performed by construction employees
19 receiving an amount for that work equal to or greater
20 than the general prevailing rate, as that term is
21 defined in Section 3 of the Prevailing Wage Act. For
22 purposes of this item (1), "house of worship" means
23 property that is both (1) used exclusively by a
24 religious society or body of persons as a place for
25 religious exercise or religious worship and (2)
26 recognized as exempt from taxation pursuant to Section

1 15-40 of the Property Tax Code. This item (1) shall
2 apply to any the following:

3 (i) all new utility-scale wind projects;

4 (ii) all new utility-scale photovoltaic
5 projects and repowered wind projects;

6 (iii) all new brownfield photovoltaic
7 projects;

8 (iv) all new photovoltaic community renewable
9 energy facilities that qualify for item (iii) of
10 subparagraph (K) of this paragraph (1);

11 (v) all new community driven community
12 photovoltaic projects that qualify for item (v) of
13 subparagraph (K) of this paragraph (1);

14 (vi) all new photovoltaic projects on public
15 school land that qualify for item (iv) of
16 subparagraph (K) of this paragraph (1);

17 (vii) all new photovoltaic distributed
18 renewable energy generation devices that (1)
19 qualify for item (i) of subparagraph (K) of this
20 paragraph (1); (2) are not projects that serve
21 single-family or multi-family residential
22 buildings; and (3) are not houses of worship where
23 the aggregate capacity including collocated
24 projects would not exceed 100 kilowatts;

25 (viii) all new photovoltaic distributed
26 renewable energy generation devices that (1)

1 qualify for item (ii) of subparagraph (K) of this
2 paragraph (1); (2) are not projects that serve
3 single-family or multi-family residential
4 buildings; and (3) are not houses of worship where
5 the aggregate capacity including collocated
6 projects would not exceed 100 kilowatts;

7 (ix) all new, modernized, or retooled
8 hydropower facilities.

9 (2) Renewable energy credits procured from new
10 utility-scale wind projects, new utility-scale solar
11 projects, new brownfield solar projects, repowered
12 wind projects, and retooled hydropower facilities
13 pursuant to Agency procurement events occurring after
14 the effective date of this amendatory Act of the 102nd
15 General Assembly must be from facilities built by
16 general contractors that must enter into a project
17 labor agreement, as defined by this Act, prior to
18 construction. The project labor agreement shall be
19 filed with the Director in accordance with procedures
20 established by the Agency through its long-term
21 renewable resources procurement plan. Any information
22 submitted to the Agency in this item (2) shall be
23 considered commercially sensitive information. At a
24 minimum, the project labor agreement must provide the
25 names, addresses, and occupations of the owner of the
26 plant and the individuals representing the labor

1 organization employees participating in the project
2 labor agreement consistent with the Project Labor
3 Agreements Act. The agreement must also specify the
4 terms and conditions as defined by this Act.

5 (3) It is the intent of this Section to ensure that
6 economic development occurs across Illinois
7 communities, that emerging businesses may grow, and
8 that there is improved access to the clean energy
9 economy by persons who have greater economic burdens
10 to success. The Agency shall take into consideration
11 the unique cost of compliance of this subparagraph (Q)
12 that might be borne by equity eligible contractors,
13 shall include such costs when determining the price of
14 renewable energy credits in the Adjustable Block
15 program, and shall take such costs into consideration
16 in a nondiscriminatory manner when comparing bids for
17 competitive procurements. The Agency shall consider
18 costs associated with compliance whether in the
19 development, financing, or construction of projects.
20 The Agency shall periodically review the assumptions
21 in these costs and may adjust prices, in compliance
22 with subparagraph (M) of this paragraph (1).

23 (R) In its long-term renewable resources procurement
24 plan, the Agency shall establish a self-direct renewable
25 portfolio standard compliance program for eligible
26 self-direct customers that purchase renewable energy

1 credits from utility-scale wind and solar projects through
2 long-term agreements for purchase of renewable energy
3 credits as described in this Section. Such long-term
4 agreements may include the purchase of energy or other
5 products on a physical or financial basis and may involve
6 an alternative retail electric supplier as defined in
7 Section 16-102 of the Public Utilities Act. This program
8 shall take effect in the delivery year commencing June 1,
9 2023.

10 (1) For the purposes of this subparagraph:

11 "Eligible self-direct customer" means any retail
12 customers of an electric utility that serves 3,000,000
13 or more retail customers in the State and whose total
14 highest 30-minute demand was more than 10,000
15 kilowatts, or any retail customers of an electric
16 utility that serves less than 3,000,000 retail
17 customers but more than 500,000 retail customers in
18 the State and whose total highest 15-minute demand was
19 more than 10,000 kilowatts.

20 "Retail customer" has the meaning set forth in
21 Section 16-102 of the Public Utilities Act and
22 multiple retail customer accounts under the same
23 corporate parent may aggregate their account demands
24 to meet the 10,000 kilowatt threshold. The criteria
25 for determining whether this subparagraph is
26 applicable to a retail customer shall be based on the

1 12 consecutive billing periods prior to the start of
2 the year in which the application is filed.

3 (2) For renewable energy credits to count toward
4 the self-direct renewable portfolio standard
5 compliance program, they must:

6 (i) qualify as renewable energy credits as
7 defined in Section 1-10 of this Act;

8 (ii) be sourced from one or more renewable
9 energy generating facilities that comply with the
10 geographic requirements as set forth in
11 subparagraph (I) of paragraph (1) of subsection
12 (c) as interpreted through the Agency's long-term
13 renewable resources procurement plan, or, where
14 applicable, the geographic requirements that
15 governed utility-scale renewable energy credits at
16 the time the eligible self-direct customer entered
17 into the applicable renewable energy credit
18 purchase agreement;

19 (iii) be procured through long-term contracts
20 with term lengths of at least 10 years either
21 directly with the renewable energy generating
22 facility or through a bundled power purchase
23 agreement, a virtual power purchase agreement, an
24 agreement between the renewable generating
25 facility, an alternative retail electric supplier,
26 and the customer, or such other structure as is

1 permissible under this subparagraph (R);

2 (iv) be equivalent in volume to at least 40%
3 of the eligible self-direct customer's usage,
4 determined annually by the eligible self-direct
5 customer's usage during the previous delivery
6 year, measured to the nearest megawatt-hour;

7 (v) be retired by or on behalf of the large
8 energy customer;

9 (vi) be sourced from new utility-scale wind
10 projects or new utility-scale solar projects; and

11 (vii) if the contracts for renewable energy
12 credits are entered into after the effective date
13 of this amendatory Act of the 102nd General
14 Assembly, the new utility-scale wind projects or
15 new utility-scale solar projects must comply with
16 the requirements established in subparagraphs (P)
17 and (Q) of paragraph (1) of this subsection (c)
18 and subsection (c-10).

19 (3) The self-direct renewable portfolio standard
20 compliance program shall be designed to allow eligible
21 self-direct customers to procure new renewable energy
22 credits from new utility-scale wind projects or new
23 utility-scale photovoltaic projects. The Agency shall
24 annually determine the amount of utility-scale
25 renewable energy credits it will include each year
26 from the self-direct renewable portfolio standard

1 compliance program, subject to receiving qualifying
2 applications. In making this determination, the Agency
3 shall evaluate publicly available analyses and studies
4 of the potential market size for utility-scale
5 renewable energy long-term purchase agreements by
6 commercial and industrial energy customers and make
7 that report publicly available. If demand for
8 participation in the self-direct renewable portfolio
9 standard compliance program exceeds availability, the
10 Agency shall ensure participation is evenly split
11 between commercial and industrial users to the extent
12 there is sufficient demand from both customer classes.
13 Each renewable energy credit procured pursuant to this
14 subparagraph (R) by a self-direct customer shall
15 reduce the total volume of renewable energy credits
16 the Agency is otherwise required to procure from new
17 utility-scale projects pursuant to subparagraph (C) of
18 paragraph (1) of this subsection (c) on behalf of
19 contracting utilities where the eligible self-direct
20 customer is located. The self-direct customer shall
21 file an annual compliance report with the Agency
22 pursuant to terms established by the Agency through
23 its long-term renewable resources procurement plan to
24 be eligible for participation in this program.
25 Customers must provide the Agency with their most
26 recent electricity billing statements or other

1 information deemed necessary by the Agency to
2 demonstrate they are an eligible self-direct customer.

3 (4) The Commission shall approve a reduction in
4 the volumetric charges collected pursuant to Section
5 16-108 of the Public Utilities Act for approved
6 eligible self-direct customers equivalent to the
7 anticipated cost of renewable energy credit deliveries
8 under contracts for new utility-scale wind and new
9 utility-scale solar entered for each delivery year
10 after the large energy customer begins retiring
11 eligible new utility scale renewable energy credits
12 for self-compliance. The self-direct credit amount
13 shall be determined annually and is equal to the
14 estimated portion of the cost authorized by
15 subparagraph (E) of paragraph (1) of this subsection
16 (c) that supported the annual procurement of
17 utility-scale renewable energy credits in the prior
18 delivery year using a methodology described in the
19 long-term renewable resources procurement plan,
20 expressed on a per kilowatthour basis, and does not
21 include (i) costs associated with any contracts
22 entered into before the delivery year in which the
23 customer files the initial compliance report to be
24 eligible for participation in the self-direct program,
25 and (ii) costs associated with procuring renewable
26 energy credits through existing and future contracts

1 through the Adjustable Block Program, subsection (c-5)
2 of this Section 1-75, and the Solar for All Program.
3 The Agency shall assist the Commission in determining
4 the current and future costs. The Agency must
5 determine the self-direct credit amount for new and
6 existing eligible self-direct customers and submit
7 this to the Commission in an annual compliance filing.
8 The Commission must approve the self-direct credit
9 amount by June 1, 2023 and June 1 of each delivery year
10 thereafter.

11 (5) Customers described in this subparagraph (R)
12 shall apply, on a form developed by the Agency, to the
13 Agency to be designated as a self-direct eligible
14 customer. Once the Agency determines that a
15 self-direct customer is eligible for participation in
16 the program, the self-direct customer will remain
17 eligible until the end of the term of the contract.
18 Thereafter, application may be made not less than 12
19 months before the filing date of the long-term
20 renewable resources procurement plan described in this
21 Act. At a minimum, such application shall contain the
22 following:

23 (i) the customer's certification that, at the
24 time of the customer's application, the customer
25 qualifies to be a self-direct eligible customer,
26 including documents demonstrating that

1 qualification;

2 (ii) the customer's certification that the
3 customer has entered into or will enter into by
4 the beginning of the applicable procurement year,
5 one or more bilateral contracts for new wind
6 projects or new photovoltaic projects, including
7 supporting documentation;

8 (iii) certification that the contract or
9 contracts for new renewable energy resources are
10 long-term contracts with term lengths of at least
11 10 years, including supporting documentation;

12 (iv) certification of the quantities of
13 renewable energy credits that the customer will
14 purchase each year under such contract or
15 contracts, including supporting documentation;

16 (v) proof that the contract is sufficient to
17 produce renewable energy credits to be equivalent
18 in volume to at least 40% of the large energy
19 customer's usage from the previous delivery year,
20 measured to the nearest megawatt-hour; and

21 (vi) certification that the customer intends
22 to maintain the contract for the duration of the
23 length of the contract.

24 (6) If a customer receives the self-direct credit
25 but fails to properly procure and retire renewable
26 energy credits as required under this subparagraph

1 (R), the Commission, on petition from the Agency and
2 after notice and hearing, may direct such customer's
3 utility to recover the cost of the wrongfully received
4 self-direct credits plus interest through an adder to
5 charges assessed pursuant to Section 16-108 of the
6 Public Utilities Act. Self-direct customers who
7 knowingly fail to properly procure and retire
8 renewable energy credits and do not notify the Agency
9 are ineligible for continued participation in the
10 self-direct renewable portfolio standard compliance
11 program.

12 (2) (Blank).

13 (3) (Blank).

14 (4) The electric utility shall retire all renewable
15 energy credits used to comply with the standard.

16 (5) Beginning with the 2010 delivery year and ending
17 June 1, 2017, an electric utility subject to this
18 subsection (c) shall apply the lesser of the maximum
19 alternative compliance payment rate or the most recent
20 estimated alternative compliance payment rate for its
21 service territory for the corresponding compliance period,
22 established pursuant to subsection (d) of Section 16-115D
23 of the Public Utilities Act to its retail customers that
24 take service pursuant to the electric utility's hourly
25 pricing tariff or tariffs. The electric utility shall
26 retain all amounts collected as a result of the

1 application of the alternative compliance payment rate or
2 rates to such customers, and, beginning in 2011, the
3 utility shall include in the information provided under
4 item (1) of subsection (d) of Section 16-111.5 of the
5 Public Utilities Act the amounts collected under the
6 alternative compliance payment rate or rates for the prior
7 year ending May 31. Notwithstanding any limitation on the
8 procurement of renewable energy resources imposed by item
9 (2) of this subsection (c), the Agency shall increase its
10 spending on the purchase of renewable energy resources to
11 be procured by the electric utility for the next plan year
12 by an amount equal to the amounts collected by the utility
13 under the alternative compliance payment rate or rates in
14 the prior year ending May 31.

15 (6) The electric utility shall be entitled to recover
16 all of its costs associated with the procurement of
17 renewable energy credits under plans approved under this
18 Section and Section 16-111.5 of the Public Utilities Act.
19 These costs shall include associated reasonable expenses
20 for implementing the procurement programs, including, but
21 not limited to, the costs of administering and evaluating
22 the Adjustable Block program, through an automatic
23 adjustment clause tariff in accordance with subsection (k)
24 of Section 16-108 of the Public Utilities Act.

25 (7) Renewable energy credits procured from new
26 photovoltaic projects or new distributed renewable energy

1 generation devices under this Section after June 1, 2017
2 (the effective date of Public Act 99-906) must be procured
3 from devices installed by a qualified person in compliance
4 with the requirements of Section 16-128A of the Public
5 Utilities Act and any rules or regulations adopted
6 thereunder.

7 In meeting the renewable energy requirements of this
8 subsection (c), to the extent feasible and consistent with
9 State and federal law, the renewable energy credit
10 procurements, Adjustable Block solar program, and
11 community renewable generation program shall provide
12 employment opportunities for all segments of the
13 population and workforce, including minority-owned and
14 female-owned business enterprises, and shall not,
15 consistent with State and federal law, discriminate based
16 on race or socioeconomic status.

17 (c-5) Procurement of renewable energy credits from new
18 renewable energy facilities installed at or adjacent to the
19 sites of electric generating facilities that burn or burned
20 coal as their primary fuel source.

21 (1) In addition to the procurement of renewable energy
22 credits pursuant to long-term renewable resources
23 procurement plans in accordance with subsection (c) of
24 this Section and Section 16-111.5 of the Public Utilities
25 Act, the Agency shall conduct procurement events in
26 accordance with this subsection (c-5) for the procurement

1 by electric utilities that served more than 300,000 retail
2 customers in this State as of January 1, 2019 of renewable
3 energy credits from new renewable energy facilities to be
4 installed at or adjacent to the sites of electric
5 generating facilities that, as of January 1, 2016, burned
6 coal as their primary fuel source and meet the other
7 criteria specified in this subsection (c-5). For purposes
8 of this subsection (c-5), "new renewable energy facility"
9 means a new utility-scale solar project as defined in this
10 Section 1-75. The renewable energy credits procured
11 pursuant to this subsection (c-5) may be included or
12 counted for purposes of compliance with the amounts of
13 renewable energy credits required to be procured pursuant
14 to subsection (c) of this Section to the extent that there
15 are otherwise shortfalls in compliance with such
16 requirements. The procurement of renewable energy credits
17 by electric utilities pursuant to this subsection (c-5)
18 shall be funded solely by revenues collected from the Coal
19 to Solar and Energy Storage Initiative Charge provided for
20 in this subsection (c-5) and subsection (i-5) of Section
21 16-108 of the Public Utilities Act, shall not be funded by
22 revenues collected through any of the other funding
23 mechanisms provided for in subsection (c) of this Section,
24 and shall not be subject to the limitation imposed by
25 subsection (c) on charges to retail customers for costs to
26 procure renewable energy resources pursuant to subsection

1 (c), and shall not be subject to any other requirements or
2 limitations of subsection (c).

3 (2) The Agency shall conduct 2 procurement events to
4 select owners of electric generating facilities meeting
5 the eligibility criteria specified in this subsection
6 (c-5) to enter into long-term contracts to sell renewable
7 energy credits to electric utilities serving more than
8 300,000 retail customers in this State as of January 1,
9 2019. The first procurement event shall be conducted no
10 later than March 31, 2022, unless the Agency elects to
11 delay it, until no later than May 1, 2022, due to its
12 overall volume of work, and shall be to select owners of
13 electric generating facilities located in this State and
14 south of federal Interstate Highway 80 that meet the
15 eligibility criteria specified in this subsection (c-5).
16 The second procurement event shall be conducted no sooner
17 than September 30, 2022 and no later than October 31, 2022
18 and shall be to select owners of electric generating
19 facilities located anywhere in this State that meet the
20 eligibility criteria specified in this subsection (c-5).
21 The Agency shall establish and announce a time period,
22 which shall begin no later than 30 days prior to the
23 scheduled date for the procurement event, during which
24 applicants may submit applications to be selected as
25 suppliers of renewable energy credits pursuant to this
26 subsection (c-5). The eligibility criteria for selection

1 as a supplier of renewable energy credits pursuant to this
2 subsection (c-5) shall be as follows:

3 (A) The applicant owns an electric generating
4 facility located in this State that: (i) as of January
5 1, 2016, burned coal as its primary fuel to generate
6 electricity; and (ii) has, or had prior to retirement,
7 an electric generating capacity of at least 150
8 megawatts. The electric generating facility can be
9 either: (i) retired as of the date of the procurement
10 event; or (ii) still operating as of the date of the
11 procurement event.

12 (B) The applicant is not (i) an electric
13 cooperative as defined in Section 3-119 of the Public
14 Utilities Act, or (ii) an entity described in
15 subsection (b)(1) of Section 3-105 of the Public
16 Utilities Act, or an association or consortium of or
17 an entity owned by entities described in (i) or (ii);
18 and the coal-fueled electric generating facility was
19 at one time owned, in whole or in part, by a public
20 utility as defined in Section 3-105 of the Public
21 Utilities Act.

22 (C) If participating in the first procurement
23 event, the applicant proposes and commits to construct
24 and operate, at the site, and if necessary for
25 sufficient space on property adjacent to the existing
26 property, at which the electric generating facility

1 identified in paragraph (A) is located: (i) a new
2 renewable energy facility of at least 20 megawatts but
3 no more than 100 megawatts of electric generating
4 capacity, and (ii) an energy storage facility having a
5 storage capacity equal to at least 2 megawatts and at
6 most 10 megawatts. If participating in the second
7 procurement event, the applicant proposes and commits
8 to construct and operate, at the site, and if
9 necessary for sufficient space on property adjacent to
10 the existing property, at which the electric
11 generating facility identified in paragraph (A) is
12 located: (i) a new renewable energy facility of at
13 least 5 megawatts but no more than 20 megawatts of
14 electric generating capacity, and (ii) an energy
15 storage facility having a storage capacity equal to at
16 least 0.5 megawatts and at most one megawatt.

17 (D) The applicant agrees that the new renewable
18 energy facility and the energy storage facility will
19 be constructed or installed by a qualified entity or
20 entities in compliance with the requirements of
21 subsection (g) of Section 16-128A of the Public
22 Utilities Act and any rules adopted thereunder.

23 (E) The applicant agrees that personnel operating
24 the new renewable energy facility and the energy
25 storage facility will have the requisite skills,
26 knowledge, training, experience, and competence, which

1 may be demonstrated by completion or current
2 participation and ultimate completion by employees of
3 an accredited or otherwise recognized apprenticeship
4 program for the employee's particular craft, trade, or
5 skill, including through training and education
6 courses and opportunities offered by the owner to
7 employees of the coal-fueled electric generating
8 facility or by previous employment experience
9 performing the employee's particular work skill or
10 function.

11 (F) The applicant commits that not less than the
12 prevailing wage, as determined pursuant to the
13 Prevailing Wage Act, will be paid to the applicant's
14 employees engaged in construction activities
15 associated with the new renewable energy facility and
16 the new energy storage facility and to the employees
17 of applicant's contractors engaged in construction
18 activities associated with the new renewable energy
19 facility and the new energy storage facility, and
20 that, on or before the commercial operation date of
21 the new renewable energy facility, the applicant shall
22 file a report with the Agency certifying that the
23 requirements of this subparagraph (F) have been met.

24 (G) The applicant commits that if selected, it
25 will negotiate a project labor agreement for the
26 construction of the new renewable energy facility and

1 associated energy storage facility that includes
2 provisions requiring the parties to the agreement to
3 work together to establish diversity threshold
4 requirements and to ensure best efforts to meet
5 diversity targets, improve diversity at the applicable
6 job site, create diverse apprenticeship opportunities,
7 and create opportunities to employ former coal-fired
8 power plant workers.

9 (H) The applicant commits to enter into a contract
10 or contracts for the applicable duration to provide
11 specified numbers of renewable energy credits each
12 year from the new renewable energy facility to
13 electric utilities that served more than 300,000
14 retail customers in this State as of January 1, 2019,
15 at a price of \$30 per renewable energy credit. The
16 price per renewable energy credit shall be fixed at
17 \$30 for the applicable duration and the renewable
18 energy credits shall not be indexed renewable energy
19 credits as provided for in item (v) of subparagraph
20 (G) of paragraph (1) of subsection (c) of Section 1-75
21 of this Act. The applicable duration of each contract
22 shall be 20 years, unless the applicant is physically
23 interconnected to the PJM Interconnection, LLC
24 transmission grid and had a generating capacity of at
25 least 1,200 megawatts as of January 1, 2021, in which
26 case the applicable duration of the contract shall be

1 15 years.

2 (I) The applicant's application is certified by an
3 officer of the applicant and by an officer of the
4 applicant's ultimate parent company, if any.

5 (3) An applicant may submit applications to contract
6 to supply renewable energy credits from more than one new
7 renewable energy facility to be constructed at or adjacent
8 to one or more qualifying electric generating facilities
9 owned by the applicant. The Agency may select new
10 renewable energy facilities to be located at or adjacent
11 to the sites of more than one qualifying electric
12 generation facility owned by an applicant to contract with
13 electric utilities to supply renewable energy credits from
14 such facilities.

15 (4) The Agency shall assess fees to each applicant to
16 recover the Agency's costs incurred in receiving and
17 evaluating applications, conducting the procurement event,
18 developing contracts for sale, delivery and purchase of
19 renewable energy credits, and monitoring the
20 administration of such contracts, as provided for in this
21 subsection (c-5), including fees paid to a procurement
22 administrator retained by the Agency for one or more of
23 these purposes.

24 (5) The Agency shall select the applicants and the new
25 renewable energy facilities to contract with electric
26 utilities to supply renewable energy credits in accordance

1 with this subsection (c-5). In the first procurement
2 event, the Agency shall select applicants and new
3 renewable energy facilities to supply renewable energy
4 credits, at a price of \$30 per renewable energy credit,
5 aggregating to no less than 400,000 renewable energy
6 credits per year for the applicable duration, assuming
7 sufficient qualifying applications to supply, in the
8 aggregate, at least that amount of renewable energy
9 credits per year; and not more than 580,000 renewable
10 energy credits per year for the applicable duration. In
11 the second procurement event, the Agency shall select
12 applicants and new renewable energy facilities to supply
13 renewable energy credits, at a price of \$30 per renewable
14 energy credit, aggregating to no more than 625,000
15 renewable energy credits per year less the amount of
16 renewable energy credits each year contracted for as a
17 result of the first procurement event, for the applicable
18 durations. The number of renewable energy credits to be
19 procured as specified in this paragraph (5) shall not be
20 reduced based on renewable energy credits procured in the
21 self-direct renewable energy credit compliance program
22 established pursuant to subparagraph (R) of paragraph (1)
23 of subsection (c) of Section 1-75.

24 (6) The obligation to purchase renewable energy
25 credits from the applicants and their new renewable energy
26 facilities selected by the Agency shall be allocated to

1 the electric utilities based on their respective
2 percentages of kilowatthours delivered to delivery
3 services customers to the aggregate kilowatthour
4 deliveries by the electric utilities to delivery services
5 customers for the year ended December 31, 2021. In order
6 to achieve these allocation percentages between or among
7 the electric utilities, the Agency shall require each
8 applicant that is selected in the procurement event to
9 enter into a contract with each electric utility for the
10 sale and purchase of renewable energy credits from each
11 new renewable energy facility to be constructed and
12 operated by the applicant, with the sale and purchase
13 obligations under the contracts to aggregate to the total
14 number of renewable energy credits per year to be supplied
15 by the applicant from the new renewable energy facility.

16 (7) The Agency shall submit its proposed selection of
17 applicants, new renewable energy facilities to be
18 constructed, and renewable energy credit amounts for each
19 procurement event to the Commission for approval. The
20 Commission shall, within 2 business days after receipt of
21 the Agency's proposed selections, approve the proposed
22 selections if it determines that the applicants and the
23 new renewable energy facilities to be constructed meet the
24 selection criteria set forth in this subsection (c-5) and
25 that the Agency seeks approval for contracts of applicable
26 durations aggregating to no more than the maximum amount

1 of renewable energy credits per year authorized by this
2 subsection (c-5) for the procurement event, at a price of
3 \$30 per renewable energy credit.

4 (8) The Agency, in conjunction with its procurement
5 administrator if one is retained, the electric utilities,
6 and potential applicants for contracts to produce and
7 supply renewable energy credits pursuant to this
8 subsection (c-5), shall develop a standard form contract
9 for the sale, delivery and purchase of renewable energy
10 credits pursuant to this subsection (c-5). Each contract
11 resulting from the first procurement event shall allow for
12 a commercial operation date for the new renewable energy
13 facility of either June 1, 2023 or June 1, 2024, with such
14 dates subject to adjustment as provided in this paragraph.
15 Each contract resulting from the second procurement event
16 shall provide for a commercial operation date on June 1
17 next occurring up to 48 months after execution of the
18 contract. Each contract shall provide that the owner shall
19 receive payments for renewable energy credits for the
20 applicable durations beginning with the commercial
21 operation date of the new renewable energy facility. The
22 form contract shall provide for adjustments to the
23 commercial operation and payment start dates as needed due
24 to any delays in completing the procurement and
25 contracting processes, in finalizing interconnection
26 agreements and installing interconnection facilities, and

1 in obtaining other necessary governmental permits and
2 approvals. The form contract shall be, to the maximum
3 extent possible, consistent with standard electric
4 industry contracts for sale, delivery, and purchase of
5 renewable energy credits while taking into account the
6 specific requirements of this subsection (c-5). The form
7 contract shall provide for over-delivery and
8 under-delivery of renewable energy credits within
9 reasonable ranges during each 12-month period and penalty,
10 default, and enforcement provisions for failure of the
11 selling party to deliver renewable energy credits as
12 specified in the contract and to comply with the
13 requirements of this subsection (c-5). The standard form
14 contract shall specify that all renewable energy credits
15 delivered to the electric utility pursuant to the contract
16 shall be retired. The Agency shall make the proposed
17 contracts available for a reasonable period for comment by
18 potential applicants, and shall publish the final form
19 contract at least 30 days before the date of the first
20 procurement event.

21 (9) Coal to Solar and Energy Storage Initiative
22 Charge.

23 (A) By no later than July 1, 2022, each electric
24 utility that served more than 300,000 retail customers
25 in this State as of January 1, 2019 shall file a tariff
26 with the Commission for the billing and collection of

1 a Coal to Solar and Energy Storage Initiative Charge
2 in accordance with subsection (i-5) of Section 16-108
3 of the Public Utilities Act, with such tariff to be
4 effective, following review and approval or
5 modification by the Commission, beginning January 1,
6 2023. The tariff shall provide for the calculation and
7 setting of the electric utility's Coal to Solar and
8 Energy Storage Initiative Charge to collect revenues
9 estimated to be sufficient, in the aggregate, (i) to
10 enable the electric utility to pay for the renewable
11 energy credits it has contracted to purchase in the
12 delivery year beginning June 1, 2023 and each delivery
13 year thereafter from new renewable energy facilities
14 located at the sites of qualifying electric generating
15 facilities, and (ii) to fund the grant payments to be
16 made in each delivery year by the Department of
17 Commerce and Economic Opportunity, or any successor
18 department or agency, which shall be referred to in
19 this subsection (c-5) as the Department, pursuant to
20 paragraph (10) of this subsection (c-5). The electric
21 utility's tariff shall provide for the billing and
22 collection of the Coal to Solar and Energy Storage
23 Initiative Charge on each kilowatthour of electricity
24 delivered to its delivery services customers within
25 its service territory and shall provide for an annual
26 reconciliation of revenues collected with actual

1 costs, in accordance with subsection (i-5) of Section
2 16-108 of the Public Utilities Act.

3 (B) Each electric utility shall remit on a monthly
4 basis to the State Treasurer, for deposit in the Coal
5 to Solar and Energy Storage Initiative Fund provided
6 for in this subsection (c-5), the electric utility's
7 collections of the Coal to Solar and Energy Storage
8 Initiative Charge in the amount estimated to be needed
9 by the Department for grant payments pursuant to grant
10 contracts entered into by the Department pursuant to
11 paragraph (10) of this subsection (c-5).

12 (10) Coal to Solar and Energy Storage Initiative Fund.

13 (A) The Coal to Solar and Energy Storage
14 Initiative Fund is established as a special fund in
15 the State treasury. The Coal to Solar and Energy
16 Storage Initiative Fund is authorized to receive, by
17 statutory deposit, that portion specified in item (B)
18 of paragraph (9) of this subsection (c-5) of moneys
19 collected by electric utilities through imposition of
20 the Coal to Solar and Energy Storage Initiative Charge
21 required by this subsection (c-5). The Coal to Solar
22 and Energy Storage Initiative Fund shall be
23 administered by the Department to provide grants to
24 support the installation and operation of energy
25 storage facilities at the sites of qualifying electric
26 generating facilities meeting the criteria specified

1 in this paragraph (10).

2 (B) The Coal to Solar and Energy Storage
3 Initiative Fund shall not be subject to sweeps,
4 administrative charges, or chargebacks, including, but
5 not limited to, those authorized under Section 8h of
6 the State Finance Act, that would in any way result in
7 the transfer of those funds from the Coal to Solar and
8 Energy Storage Initiative Fund to any other fund of
9 this State or in having any such funds utilized for any
10 purpose other than the express purposes set forth in
11 this paragraph (10).

12 (C) The Department shall utilize up to
13 \$280,500,000 in the Coal to Solar and Energy Storage
14 Initiative Fund for grants, assuming sufficient
15 qualifying applicants, to support installation of
16 energy storage facilities at the sites of up to 3
17 qualifying electric generating facilities located in
18 the Midcontinent Independent System Operator, Inc.,
19 region in Illinois and the sites of up to 2 qualifying
20 electric generating facilities located in the PJM
21 Interconnection, LLC region in Illinois that meet the
22 criteria set forth in this subparagraph (C). The
23 criteria for receipt of a grant pursuant to this
24 subparagraph (C) are as follows:

25 (1) the electric generating facility at the
26 site has, or had prior to retirement, an electric

1 generating capacity of at least 150 megawatts;

2 (2) the electric generating facility burns (or
3 burned prior to retirement) coal as its primary
4 source of fuel;

5 (3) if the electric generating facility is
6 retired, it was retired subsequent to January 1,
7 2016;

8 (4) the owner of the electric generating
9 facility has not been selected by the Agency
10 pursuant to this subsection (c-5) of this Section
11 to enter into a contract to sell renewable energy
12 credits to one or more electric utilities from a
13 new renewable energy facility located or to be
14 located at or adjacent to the site at which the
15 electric generating facility is located;

16 (5) the electric generating facility located
17 at the site was at one time owned, in whole or in
18 part, by a public utility as defined in Section
19 3-105 of the Public Utilities Act;

20 (6) the electric generating facility at the
21 site is not owned by (i) an electric cooperative
22 as defined in Section 3-119 of the Public
23 Utilities Act, or (ii) an entity described in
24 subsection (b)(1) of Section 3-105 of the Public
25 Utilities Act, or an association or consortium of
26 or an entity owned by entities described in items

1 (i) or (ii);

2 (7) the proposed energy storage facility at
3 the site will have energy storage capacity of at
4 least 37 megawatts;

5 (8) the owner commits to place the energy
6 storage facility into commercial operation on
7 either June 1, 2023, June 1, 2024, or June 1, 2025,
8 with such date subject to adjustment as needed due
9 to any delays in completing the grant contracting
10 process, in finalizing interconnection agreements
11 and in installing interconnection facilities, and
12 in obtaining necessary governmental permits and
13 approvals;

14 (9) the owner agrees that the new energy
15 storage facility will be constructed or installed
16 by a qualified entity or entities consistent with
17 the requirements of subsection (g) of Section
18 16-128A of the Public Utilities Act and any rules
19 adopted under that Section;

20 (10) the owner agrees that personnel operating
21 the energy storage facility will have the
22 requisite skills, knowledge, training, experience,
23 and competence, which may be demonstrated by
24 completion or current participation and ultimate
25 completion by employees of an accredited or
26 otherwise recognized apprenticeship program for

1 the employee's particular craft, trade, or skill,
2 including through training and education courses
3 and opportunities offered by the owner to
4 employees of the coal-fueled electric generating
5 facility or by previous employment experience
6 performing the employee's particular work skill or
7 function;

8 (11) the owner commits that not less than the
9 prevailing wage, as determined pursuant to the
10 Prevailing Wage Act, will be paid to the owner's
11 employees engaged in construction activities
12 associated with the new energy storage facility
13 and to the employees of the owner's contractors
14 engaged in construction activities associated with
15 the new energy storage facility, and that, on or
16 before the commercial operation date of the new
17 energy storage facility, the owner shall file a
18 report with the Department certifying that the
19 requirements of this subparagraph (11) have been
20 met; and

21 (12) the owner commits that if selected to
22 receive a grant, it will negotiate a project labor
23 agreement for the construction of the new energy
24 storage facility that includes provisions
25 requiring the parties to the agreement to work
26 together to establish diversity threshold

1 requirements and to ensure best efforts to meet
2 diversity targets, improve diversity at the
3 applicable job site, create diverse apprenticeship
4 opportunities, and create opportunities to employ
5 former coal-fired power plant workers.

6 The Department shall accept applications for this
7 grant program until March 31, 2022 and shall announce
8 the award of grants no later than June 1, 2022. The
9 Department shall make the grant payments to a
10 recipient in equal annual amounts for 10 years
11 following the date the energy storage facility is
12 placed into commercial operation. The annual grant
13 payments to a qualifying energy storage facility shall
14 be \$110,000 per megawatt of energy storage capacity,
15 with total annual grant payments pursuant to this
16 subparagraph (C) for qualifying energy storage
17 facilities not to exceed \$28,050,000 in any year.

18 (D) Grants of funding for energy storage
19 facilities pursuant to subparagraph (C) of this
20 paragraph (10), from the Coal to Solar and Energy
21 Storage Initiative Fund, shall be memorialized in
22 grant contracts between the Department and the
23 recipient. The grant contracts shall specify the date
24 or dates in each year on which the annual grant
25 payments shall be paid.

26 (E) All disbursements from the Coal to Solar and

1 Energy Storage Initiative Fund shall be made only upon
2 warrants of the Comptroller drawn upon the Treasurer
3 as custodian of the Fund upon vouchers signed by the
4 Director of the Department or by the person or persons
5 designated by the Director of the Department for that
6 purpose. The Comptroller is authorized to draw the
7 warrants upon vouchers so signed. The Treasurer shall
8 accept all written warrants so signed and shall be
9 released from liability for all payments made on those
10 warrants.

11 (11) Diversity, equity, and inclusion plans.

12 (A) Each applicant selected in a procurement event
13 to contract to supply renewable energy credits in
14 accordance with this subsection (c-5) and each owner
15 selected by the Department to receive a grant or
16 grants to support the construction and operation of a
17 new energy storage facility or facilities in
18 accordance with this subsection (c-5) shall, within 60
19 days following the Commission's approval of the
20 applicant to contract to supply renewable energy
21 credits or within 60 days following execution of a
22 grant contract with the Department, as applicable,
23 submit to the Commission a diversity, equity, and
24 inclusion plan setting forth the applicant's or
25 owner's numeric goals for the diversity composition of
26 its supplier entities for the new renewable energy

1 facility or new energy storage facility, as
2 applicable, which shall be referred to for purposes of
3 this paragraph (11) as the project, and the
4 applicant's or owner's action plan and schedule for
5 achieving those goals.

6 (B) For purposes of this paragraph (11), diversity
7 composition shall be based on the percentage, which
8 shall be a minimum of 25%, of eligible expenditures
9 for contract awards for materials and services (which
10 shall be defined in the plan) to business enterprises
11 owned by minority persons, women, or persons with
12 disabilities as defined in Section 2 of the Business
13 Enterprise for Minorities, Women, and Persons with
14 Disabilities Act, to LGBTQ business enterprises, to
15 veteran-owned business enterprises, and to business
16 enterprises located in environmental justice
17 communities. The diversity composition goals of the
18 plan may include eligible expenditures in areas for
19 vendor or supplier opportunities in addition to
20 development and construction of the project, and may
21 exclude from eligible expenditures materials and
22 services with limited market availability, limited
23 production and availability from suppliers in the
24 United States, such as solar panels and storage
25 batteries, and material and services that are subject
26 to critical energy infrastructure or cybersecurity

1 requirements or restrictions. The plan may provide
2 that the diversity composition goals may be met
3 through Tier 1 Direct or Tier 2 subcontracting
4 expenditures or a combination thereof for the project.

5 (C) The plan shall provide for, but not be limited
6 to: (i) internal initiatives, including multi-tier
7 initiatives, by the applicant or owner, or by its
8 engineering, procurement and construction contractor
9 if one is used for the project, which for purposes of
10 this paragraph (11) shall be referred to as the EPC
11 contractor, to enable diverse businesses to be
12 considered fairly for selection to provide materials
13 and services; (ii) requirements for the applicant or
14 owner or its EPC contractor to proactively solicit and
15 utilize diverse businesses to provide materials and
16 services; and (iii) requirements for the applicant or
17 owner or its EPC contractor to hire a diverse
18 workforce for the project. The plan shall include a
19 description of the applicant's or owner's diversity
20 recruiting efforts both for the project and for other
21 areas of the applicant's or owner's business
22 operations. The plan shall provide for the imposition
23 of financial penalties on the applicant's or owner's
24 EPC contractor for failure to exercise best efforts to
25 comply with and execute the EPC contractor's diversity
26 obligations under the plan. The plan may provide for

1 the applicant or owner to set aside a portion of the
2 work on the project to serve as an incubation program
3 for qualified businesses, as specified in the plan,
4 owned by minority persons, women, persons with
5 disabilities, LGBTQ persons, and veterans, and
6 businesses located in environmental justice
7 communities, seeking to enter the renewable energy
8 industry.

9 (D) The applicant or owner may submit a revised or
10 updated plan to the Commission from time to time as
11 circumstances warrant. The applicant or owner shall
12 file annual reports with the Commission detailing the
13 applicant's or owner's progress in implementing its
14 plan and achieving its goals and any modifications the
15 applicant or owner has made to its plan to better
16 achieve its diversity, equity and inclusion goals. The
17 applicant or owner shall file a final report on the
18 fifth June 1 following the commercial operation date
19 of the new renewable energy resource or new energy
20 storage facility, but the applicant or owner shall
21 thereafter continue to be subject to applicable
22 reporting requirements of Section 5-117 of the Public
23 Utilities Act.

24 (c-10) Equity accountability system. It is the purpose of
25 this subsection (c-10) to create an equity accountability
26 system, which includes the minimum equity standards for all

1 renewable energy procurements, the equity category of the
2 Adjustable Block Program, and the equity prioritization for
3 noncompetitive procurements, that is successful in advancing
4 priority access to the clean energy economy for businesses and
5 workers from communities that have been excluded from economic
6 opportunities in the energy sector, have been subject to
7 disproportionate levels of pollution, and have
8 disproportionately experienced negative public health
9 outcomes. Further, it is the purpose of this subsection to
10 ensure that this equity accountability system is successful in
11 advancing equity across Illinois by providing access to the
12 clean energy economy for businesses and workers from
13 communities that have been historically excluded from economic
14 opportunities in the energy sector, have been subject to
15 disproportionate levels of pollution, and have
16 disproportionately experienced negative public health
17 outcomes.

18 (1) Minimum equity standards. The Agency shall create
19 programs with the purpose of increasing access to and
20 development of equity eligible contractors, who are prime
21 contractors and subcontractors, across all of the programs
22 it manages. All applications for renewable energy credit
23 procurements shall comply with specific minimum equity
24 commitments. Starting in the delivery year immediately
25 following the next long-term renewable resources
26 procurement plan, at least 10% of the project workforce

1 for each entity participating in a procurement program
2 outlined in this subsection (c-10) must be done by equity
3 eligible persons or equity eligible contractors. The
4 Agency shall increase the minimum percentage each delivery
5 year thereafter by increments that ensure a statewide
6 average of 30% of the project workforce for each entity
7 participating in a procurement program is done by equity
8 eligible persons or equity eligible contractors by 2030.
9 The Agency shall propose a schedule of percentage
10 increases to the minimum equity standards in its draft
11 revised renewable energy resources procurement plan
12 submitted to the Commission for approval pursuant to
13 paragraph (5) of subsection (b) of Section 16-111.5 of the
14 Public Utilities Act. In determining these annual
15 increases, the Agency shall have the discretion to
16 establish different minimum equity standards for different
17 types of procurements and different regions of the State
18 if the Agency finds that doing so will further the
19 purposes of this subsection (c-10). The proposed schedule
20 of annual increases shall be revisited and updated on an
21 annual basis. Revisions shall be developed with
22 stakeholder input, including from equity eligible persons,
23 equity eligible contractors, clean energy industry
24 representatives, and community-based organizations that
25 work with such persons and contractors.

26 (A) At the start of each delivery year, the Agency

1 shall require a compliance plan from each entity
2 participating in a procurement program of subsection
3 (c) of this Section that demonstrates how they will
4 achieve compliance with the minimum equity standard
5 percentage for work completed in that delivery year.
6 If an entity applies for its approved vendor or
7 designee status between delivery years, the Agency
8 shall require a compliance plan at the time of
9 application.

10 (B) Halfway through each delivery year, the Agency
11 shall require each entity participating in a
12 procurement program to confirm that it will achieve
13 compliance in that delivery year, when applicable. The
14 Agency may offer corrective action plans to entities
15 that are not on track to achieve compliance.

16 (C) At the end of each delivery year, each entity
17 participating and completing work in that delivery
18 year in a procurement program of subsection (c) shall
19 submit a report to the Agency that demonstrates how it
20 achieved compliance with the minimum equity standards
21 percentage for that delivery year.

22 (D) The Agency shall prohibit participation in
23 procurement programs by an approved vendor or
24 designee, as applicable, or entities with which an
25 approved vendor or designee, as applicable, shares a
26 common parent company if an approved vendor or

1 designee, as applicable, failed to meet the minimum
2 equity standards for the prior delivery year. Waivers
3 approved for lack of equity eligible persons or equity
4 eligible contractors in a geographic area of a project
5 shall not count against the approved vendor or
6 designee. The Agency shall offer a corrective action
7 plan for any such entities to assist them in obtaining
8 compliance and shall allow continued access to
9 procurement programs upon an approved vendor or
10 designee demonstrating compliance.

11 (E) The Agency shall pursue efficiencies achieved
12 by combining with other approved vendor or designee
13 reporting.

14 (2) Equity accountability system within the Adjustable
15 Block program. The equity category described in item (vi)
16 of subparagraph (K) of subsection (c) is only available to
17 applicants that are equity eligible contractors.

18 (3) Equity accountability system within competitive
19 procurements. Through its long-term renewable resources
20 procurement plan, the Agency shall develop requirements
21 for ensuring that competitive procurement processes,
22 including utility-scale solar, utility-scale wind, and
23 brownfield site photovoltaic projects, advance the equity
24 goals of this subsection (c-10). Subject to Commission
25 approval, the Agency shall develop bid application
26 requirements and a bid evaluation methodology for ensuring

1 that utilization of equity eligible contractors, whether
2 as bidders or as participants on project development, is
3 optimized, including requiring that winning or successful
4 applicants for utility-scale projects are or will partner
5 with equity eligible contractors and giving preference to
6 bids through which a higher portion of contract value
7 flows to equity eligible contractors. To the extent
8 practicable, entities participating in competitive
9 procurements shall also be required to meet all the equity
10 accountability requirements for approved vendors and their
11 designees under this subsection (c-10). In developing
12 these requirements, the Agency shall also consider whether
13 equity goals can be further advanced through additional
14 measures.

15 (4) In the first revision to the long-term renewable
16 energy resources procurement plan and each revision
17 thereafter, the Agency shall include the following:

18 (A) The current status and number of equity
19 eligible contractors listed in the Energy Workforce
20 Equity Database designed in subsection (c-25),
21 including the number of equity eligible contractors
22 with current certifications as issued by the Agency.

23 (B) A mechanism for measuring, tracking, and
24 reporting project workforce at the approved vendor or
25 designee level, as applicable, which shall include a
26 measurement methodology and records to be made

1 available for audit by the Agency or the Program
2 Administrator.

3 (C) A program for approved vendors, designees,
4 eligible persons, and equity eligible contractors to
5 receive trainings, guidance, and other support from
6 the Agency or its designee regarding the equity
7 category outlined in item (vi) of subparagraph (K) of
8 paragraph (1) of subsection (c) and in meeting the
9 minimum equity standards of this subsection (c-10).

10 (D) A process for certifying equity eligible
11 contractors and equity eligible persons. The
12 certification process shall coordinate with the Energy
13 Workforce Equity Database set forth in subsection
14 (c-25).

15 (E) An application for waiver of the minimum
16 equity standards of this subsection, which the Agency
17 shall have the discretion to grant in rare
18 circumstances. The Agency may grant such a waiver
19 where the applicant provides evidence of significant
20 efforts toward meeting the minimum equity commitment,
21 including: use of the Energy Workforce Equity
22 Database; efforts to hire or contract with entities
23 that hire eligible persons; and efforts to establish
24 contracting relationships with eligible contractors.
25 The Agency shall support applicants in understanding
26 the Energy Workforce Equity Database and other

1 resources for pursuing compliance of the minimum
2 equity standards. Waivers shall be project-specific,
3 unless the Agency deems it necessary to grant a waiver
4 across a portfolio of projects, and in effect for no
5 longer than one year. Any waiver extension or
6 subsequent waiver request from an applicant shall be
7 subject to the requirements of this Section and shall
8 specify efforts made to reach compliance. When
9 considering whether to grant a waiver, and to what
10 extent, the Agency shall consider the degree to which
11 similarly situated applicants have been able to meet
12 these minimum equity commitments. For repeated waiver
13 requests for specific lack of eligible persons or
14 eligible contractors available, the Agency shall make
15 recommendations to target recruitment to add such
16 eligible persons or eligible contractors to the
17 database.

18 (5) The Agency shall collect information about work on
19 projects or portfolios of projects subject to these
20 minimum equity standards to ensure compliance with this
21 subsection (c-10). Reporting in furtherance of this
22 requirement may be combined with other annual reporting
23 requirements. Such reporting shall include proof of
24 certification of each equity eligible contractor or equity
25 eligible person during the applicable time period.

26 (6) The Agency shall keep confidential all information

1 and communication that provides private or personal
2 information.

3 (7) Modifications to the equity accountability system.
4 As part of the update of the long-term renewable resources
5 procurement plan to be initiated in 2023, or sooner if the
6 Agency deems necessary, the Agency shall determine the
7 extent to which the equity accountability system described
8 in this subsection (c-10) has advanced the goals of this
9 amendatory Act of the 102nd General Assembly, including
10 through the inclusion of equity eligible persons and
11 equity eligible contractors in renewable energy credit
12 projects. If the Agency finds that the equity
13 accountability system has failed to meet those goals to
14 its fullest potential, the Agency may revise the following
15 criteria for future Agency procurements: (A) the
16 percentage of project workforce, or other appropriate
17 workforce measure, certified as equity eligible persons or
18 equity eligible contractors; (B) definitions for equity
19 investment eligible persons and equity investment eligible
20 community; and (C) such other modifications necessary to
21 advance the goals of this amendatory Act of the 102nd
22 General Assembly effectively. Such revised criteria may
23 also establish distinct equity accountability systems for
24 different types of procurements or different regions of
25 the State if the Agency finds that doing so will further
26 the purposes of such programs. Revisions shall be

1 developed with stakeholder input, including from equity
2 eligible persons, equity eligible contractors, and
3 community-based organizations that work with such persons
4 and contractors.

5 (c-15) Racial discrimination elimination powers and
6 process.

7 (1) Purpose. It is the purpose of this subsection to
8 empower the Agency and other State actors to remedy racial
9 discrimination in Illinois' clean energy economy as
10 effectively and expediently as possible, including through
11 the use of race-conscious remedies, such as race-conscious
12 contracting and hiring goals, as consistent with State and
13 federal law.

14 (2) Racial disparity and discrimination review
15 process.

16 (A) Within one year after awarding contracts using
17 the equity actions processes established in this
18 Section, the Agency shall publish a report evaluating
19 the effectiveness of the equity actions point criteria
20 of this Section in increasing participation of equity
21 eligible persons and equity eligible contractors. The
22 report shall disaggregate participating workers and
23 contractors by race and ethnicity. The report shall be
24 forwarded to the Governor, the General Assembly, and
25 the Illinois Commerce Commission and be made available
26 to the public.

1 (B) As soon as is practicable thereafter, the
2 Agency, in consultation with the Department of
3 Commerce and Economic Opportunity, Department of
4 Labor, and other agencies that may be relevant, shall
5 commission and publish a disparity and availability
6 study that measures the presence and impact of
7 discrimination on minority businesses and workers in
8 Illinois' clean energy economy. The Agency may hire
9 consultants and experts to conduct the disparity and
10 availability study, with the retention of those
11 consultants and experts exempt from the requirements
12 of Section 20-10 of the Illinois Procurement Code. The
13 Illinois Power Agency shall forward a copy of its
14 findings and recommendations to the Governor, the
15 General Assembly, and the Illinois Commerce
16 Commission. If the disparity and availability study
17 establishes a strong basis in evidence that there is
18 discrimination in Illinois' clean energy economy, the
19 Agency, Department of Commerce and Economic
20 Opportunity, Department of Labor, Department of
21 Corrections, and other appropriate agencies shall take
22 appropriate remedial actions, including race-conscious
23 remedial actions as consistent with State and federal
24 law, to effectively remedy this discrimination. Such
25 remedies may include modification of the equity
26 accountability system as described in subsection

1 (c-10).

2 (c-20) Program data collection.

3 (1) Purpose. Data collection, data analysis, and
4 reporting are critical to ensure that the benefits of the
5 clean energy economy provided to Illinois residents and
6 businesses are equitably distributed across the State. The
7 Agency shall collect data from program applicants in order
8 to track and improve equitable distribution of benefits
9 across Illinois communities for all procurements the
10 Agency conducts. The Agency shall use this data to, among
11 other things, measure any potential impact of racial
12 discrimination on the distribution of benefits and provide
13 information necessary to correct any discrimination
14 through methods consistent with State and federal law.

15 (2) Agency collection of program data. The Agency
16 shall collect demographic and geographic data for each
17 entity awarded contracts under any Agency-administered
18 program.

19 (3) Required information to be collected. The Agency
20 shall collect the following information from applicants
21 and program participants where applicable:

22 (A) demographic information, including racial or
23 ethnic identity for real persons employed, contracted,
24 or subcontracted through the program and owners of
25 businesses or entities that apply to receive renewable
26 energy credits from the Agency;

1 (B) geographic location of the residency of real
2 persons employed, contracted, or subcontracted through
3 the program and geographic location of the
4 headquarters of the business or entity that applies to
5 receive renewable energy credits from the Agency; and

6 (C) any other information the Agency determines is
7 necessary for the purpose of achieving the purpose of
8 this subsection.

9 (4) Publication of collected information. The Agency
10 shall publish, at least annually, information on the
11 demographics of program participants on an aggregate
12 basis.

13 (5) Nothing in this subsection shall be interpreted to
14 limit the authority of the Agency, or other agency or
15 department of the State, to require or collect demographic
16 information from applicants of other State programs.

17 (c-25) Energy Workforce Equity Database.

18 (1) The Agency, in consultation with the Department of
19 Commerce and Economic Opportunity, shall create an Energy
20 Workforce Equity Database, and may contract with a third
21 party to do so ("database program administrator"). If the
22 Department decides to contract with a third party, that
23 third party shall be exempt from the requirements of
24 Section 20-10 of the Illinois Procurement Code. The Energy
25 Workforce Equity Database shall be a searchable database
26 of suppliers, vendors, and subcontractors for clean energy

1 industries that is:

2 (A) publicly accessible;

3 (B) easy for people to find and use;

4 (C) organized by company specialty or field;

5 (D) region-specific; and

6 (E) populated with information including, but not
7 limited to, contacts for suppliers, vendors, or
8 subcontractors who are minority and women-owned
9 business enterprise certified or who participate or
10 have participated in any of the programs described in
11 this Act.

12 (2) The Agency shall create an easily accessible,
13 public facing online tool using the database information
14 that includes, at a minimum, the following:

15 (A) a map of environmental justice and equity
16 investment eligible communities;

17 (B) job postings and recruiting opportunities;

18 (C) a means by which recruiting clean energy
19 companies can find and interact with current or former
20 participants of clean energy workforce training
21 programs;

22 (D) information on workforce training service
23 providers and training opportunities available to
24 prospective workers;

25 (E) renewable energy company diversity reporting;

26 (F) a list of equity eligible contractors with

1 their contact information, types of work performed,
2 and locations worked in;

3 (G) reporting on outcomes of the programs
4 described in the workforce programs of the Energy
5 Transition Act, including information such as, but not
6 limited to, retention rate, graduation rate, and
7 placement rates of trainees; and

8 (H) information about the Jobs and Environmental
9 Justice Grant Program, the Clean Energy Jobs and
10 Justice Fund, and other sources of capital.

11 (3) The Agency shall ensure the database is regularly
12 updated to ensure information is current and shall
13 coordinate with the Department of Commerce and Economic
14 Opportunity to ensure that it includes information on
15 individuals and entities that are or have participated in
16 the Clean Jobs Workforce Network Program, Clean Energy
17 Contractor Incubator Program, Returning Residents Clean
18 Jobs Training Program, or Clean Energy Primes Contractor
19 Accelerator Program.

20 (c-30) Enforcement of minimum equity standards. All
21 entities seeking renewable energy credits must submit an
22 annual report to demonstrate compliance with each of the
23 equity commitments required under subsection (c-10). If the
24 Agency concludes the entity has not met or maintained its
25 minimum equity standards required under the applicable
26 subparagraphs under subsection (c-10), the Agency shall deny

1 the entity's ability to participate in procurement programs in
2 subsection (c), including by withholding approved vendor or
3 designee status. The Agency may require the entity to enter
4 into a corrective action plan. An entity that is not
5 recertified for failing to meet required equity actions in
6 subparagraph (c-10) may reapply once they have a corrective
7 action plan and achieve compliance with the minimum equity
8 standards.

9 (d) Clean coal portfolio standard.

10 (1) The procurement plans shall include electricity
11 generated using clean coal. Each utility shall enter into
12 one or more sourcing agreements with the initial clean
13 coal facility, as provided in paragraph (3) of this
14 subsection (d), covering electricity generated by the
15 initial clean coal facility representing at least 5% of
16 each utility's total supply to serve the load of eligible
17 retail customers in 2015 and each year thereafter, as
18 described in paragraph (3) of this subsection (d), subject
19 to the limits specified in paragraph (2) of this
20 subsection (d). It is the goal of the State that by January
21 1, 2025, 25% of the electricity used in the State shall be
22 generated by cost-effective clean coal facilities. For
23 purposes of this subsection (d), "cost-effective" means
24 that the expenditures pursuant to such sourcing agreements
25 do not cause the limit stated in paragraph (2) of this
26 subsection (d) to be exceeded and do not exceed cost-based

1 benchmarks, which shall be developed to assess all
2 expenditures pursuant to such sourcing agreements covering
3 electricity generated by clean coal facilities, other than
4 the initial clean coal facility, by the procurement
5 administrator, in consultation with the Commission staff,
6 Agency staff, and the procurement monitor and shall be
7 subject to Commission review and approval.

8 A utility party to a sourcing agreement shall
9 immediately retire any emission credits that it receives
10 in connection with the electricity covered by such
11 agreement.

12 Utilities shall maintain adequate records documenting
13 the purchases under the sourcing agreement to comply with
14 this subsection (d) and shall file an accounting with the
15 load forecast that must be filed with the Agency by July 15
16 of each year, in accordance with subsection (d) of Section
17 16-111.5 of the Public Utilities Act.

18 A utility shall be deemed to have complied with the
19 clean coal portfolio standard specified in this subsection
20 (d) if the utility enters into a sourcing agreement as
21 required by this subsection (d).

22 (2) For purposes of this subsection (d), the required
23 execution of sourcing agreements with the initial clean
24 coal facility for a particular year shall be measured as a
25 percentage of the actual amount of electricity
26 (megawatt-hours) supplied by the electric utility to

1 eligible retail customers in the planning year ending
2 immediately prior to the agreement's execution. For
3 purposes of this subsection (d), the amount paid per
4 kilowatthour means the total amount paid for electric
5 service expressed on a per kilowatthour basis. For
6 purposes of this subsection (d), the total amount paid for
7 electric service includes without limitation amounts paid
8 for supply, transmission, distribution, surcharges and
9 add-on taxes.

10 Notwithstanding the requirements of this subsection
11 (d), the total amount paid under sourcing agreements with
12 clean coal facilities pursuant to the procurement plan for
13 any given year shall be reduced by an amount necessary to
14 limit the annual estimated average net increase due to the
15 costs of these resources included in the amounts paid by
16 eligible retail customers in connection with electric
17 service to:

18 (A) in 2010, no more than 0.5% of the amount paid
19 per kilowatthour by those customers during the year
20 ending May 31, 2009;

21 (B) in 2011, the greater of an additional 0.5% of
22 the amount paid per kilowatthour by those customers
23 during the year ending May 31, 2010 or 1% of the amount
24 paid per kilowatthour by those customers during the
25 year ending May 31, 2009;

26 (C) in 2012, the greater of an additional 0.5% of

1 the amount paid per kilowatthour by those customers
2 during the year ending May 31, 2011 or 1.5% of the
3 amount paid per kilowatthour by those customers during
4 the year ending May 31, 2009;

5 (D) in 2013, the greater of an additional 0.5% of
6 the amount paid per kilowatthour by those customers
7 during the year ending May 31, 2012 or 2% of the amount
8 paid per kilowatthour by those customers during the
9 year ending May 31, 2009; and

10 (E) thereafter, the total amount paid under
11 sourcing agreements with clean coal facilities
12 pursuant to the procurement plan for any single year
13 shall be reduced by an amount necessary to limit the
14 estimated average net increase due to the cost of
15 these resources included in the amounts paid by
16 eligible retail customers in connection with electric
17 service to no more than the greater of (i) 2.015% of
18 the amount paid per kilowatthour by those customers
19 during the year ending May 31, 2009 or (ii) the
20 incremental amount per kilowatthour paid for these
21 resources in 2013. These requirements may be altered
22 only as provided by statute.

23 No later than June 30, 2015, the Commission shall
24 review the limitation on the total amount paid under
25 sourcing agreements, if any, with clean coal facilities
26 pursuant to this subsection (d) and report to the General

1 Assembly its findings as to whether that limitation unduly
2 constrains the amount of electricity generated by
3 cost-effective clean coal facilities that is covered by
4 sourcing agreements.

5 (3) Initial clean coal facility. In order to promote
6 development of clean coal facilities in Illinois, each
7 electric utility subject to this Section shall execute a
8 sourcing agreement to source electricity from a proposed
9 clean coal facility in Illinois (the "initial clean coal
10 facility") that will have a nameplate capacity of at least
11 500 MW when commercial operation commences, that has a
12 final Clean Air Act permit on June 1, 2009 (the effective
13 date of Public Act 95-1027), and that will meet the
14 definition of clean coal facility in Section 1-10 of this
15 Act when commercial operation commences. The sourcing
16 agreements with this initial clean coal facility shall be
17 subject to both approval of the initial clean coal
18 facility by the General Assembly and satisfaction of the
19 requirements of paragraph (4) of this subsection (d) and
20 shall be executed within 90 days after any such approval
21 by the General Assembly. The Agency and the Commission
22 shall have authority to inspect all books and records
23 associated with the initial clean coal facility during the
24 term of such a sourcing agreement. A utility's sourcing
25 agreement for electricity produced by the initial clean
26 coal facility shall include:

1 (A) a formula contractual price (the "contract
2 price") approved pursuant to paragraph (4) of this
3 subsection (d), which shall:

4 (i) be determined using a cost of service
5 methodology employing either a level or deferred
6 capital recovery component, based on a capital
7 structure consisting of 45% equity and 55% debt,
8 and a return on equity as may be approved by the
9 Federal Energy Regulatory Commission, which in any
10 case may not exceed the lower of 11.5% or the rate
11 of return approved by the General Assembly
12 pursuant to paragraph (4) of this subsection (d);
13 and

14 (ii) provide that all miscellaneous net
15 revenue, including but not limited to net revenue
16 from the sale of emission allowances, if any,
17 substitute natural gas, if any, grants or other
18 support provided by the State of Illinois or the
19 United States Government, firm transmission
20 rights, if any, by-products produced by the
21 facility, energy or capacity derived from the
22 facility and not covered by a sourcing agreement
23 pursuant to paragraph (3) of this subsection (d)
24 or item (5) of subsection (d) of Section 16-115 of
25 the Public Utilities Act, whether generated from
26 the synthesis gas derived from coal, from SNG, or

1 from natural gas, shall be credited against the
2 revenue requirement for this initial clean coal
3 facility;

4 (B) power purchase provisions, which shall:

5 (i) provide that the utility party to such
6 sourcing agreement shall pay the contract price
7 for electricity delivered under such sourcing
8 agreement;

9 (ii) require delivery of electricity to the
10 regional transmission organization market of the
11 utility that is party to such sourcing agreement;

12 (iii) require the utility party to such
13 sourcing agreement to buy from the initial clean
14 coal facility in each hour an amount of energy
15 equal to all clean coal energy made available from
16 the initial clean coal facility during such hour
17 times a fraction, the numerator of which is such
18 utility's retail market sales of electricity
19 (expressed in kilowatthours sold) in the State
20 during the prior calendar month and the
21 denominator of which is the total retail market
22 sales of electricity (expressed in kilowatthours
23 sold) in the State by utilities during such prior
24 month and the sales of electricity (expressed in
25 kilowatthours sold) in the State by alternative
26 retail electric suppliers during such prior month

1 that are subject to the requirements of this
2 subsection (d) and paragraph (5) of subsection (d)
3 of Section 16-115 of the Public Utilities Act,
4 provided that the amount purchased by the utility
5 in any year will be limited by paragraph (2) of
6 this subsection (d); and

7 (iv) be considered pre-existing contracts in
8 such utility's procurement plans for eligible
9 retail customers;

10 (C) contract for differences provisions, which
11 shall:

12 (i) require the utility party to such sourcing
13 agreement to contract with the initial clean coal
14 facility in each hour with respect to an amount of
15 energy equal to all clean coal energy made
16 available from the initial clean coal facility
17 during such hour times a fraction, the numerator
18 of which is such utility's retail market sales of
19 electricity (expressed in kilowatthours sold) in
20 the utility's service territory in the State
21 during the prior calendar month and the
22 denominator of which is the total retail market
23 sales of electricity (expressed in kilowatthours
24 sold) in the State by utilities during such prior
25 month and the sales of electricity (expressed in
26 kilowatthours sold) in the State by alternative

1 retail electric suppliers during such prior month
2 that are subject to the requirements of this
3 subsection (d) and paragraph (5) of subsection (d)
4 of Section 16-115 of the Public Utilities Act,
5 provided that the amount paid by the utility in
6 any year will be limited by paragraph (2) of this
7 subsection (d);

8 (ii) provide that the utility's payment
9 obligation in respect of the quantity of
10 electricity determined pursuant to the preceding
11 clause (i) shall be limited to an amount equal to
12 (1) the difference between the contract price
13 determined pursuant to subparagraph (A) of
14 paragraph (3) of this subsection (d) and the
15 day-ahead price for electricity delivered to the
16 regional transmission organization market of the
17 utility that is party to such sourcing agreement
18 (or any successor delivery point at which such
19 utility's supply obligations are financially
20 settled on an hourly basis) (the "reference
21 price") on the day preceding the day on which the
22 electricity is delivered to the initial clean coal
23 facility busbar, multiplied by (2) the quantity of
24 electricity determined pursuant to the preceding
25 clause (i); and

26 (iii) not require the utility to take physical

1 delivery of the electricity produced by the
2 facility;

3 (D) general provisions, which shall:

4 (i) specify a term of no more than 30 years,
5 commencing on the commercial operation date of the
6 facility;

7 (ii) provide that utilities shall maintain
8 adequate records documenting purchases under the
9 sourcing agreements entered into to comply with
10 this subsection (d) and shall file an accounting
11 with the load forecast that must be filed with the
12 Agency by July 15 of each year, in accordance with
13 subsection (d) of Section 16-111.5 of the Public
14 Utilities Act;

15 (iii) provide that all costs associated with
16 the initial clean coal facility will be
17 periodically reported to the Federal Energy
18 Regulatory Commission and to purchasers in
19 accordance with applicable laws governing
20 cost-based wholesale power contracts;

21 (iv) permit the Illinois Power Agency to
22 assume ownership of the initial clean coal
23 facility, without monetary consideration and
24 otherwise on reasonable terms acceptable to the
25 Agency, if the Agency so requests no less than 3
26 years prior to the end of the stated contract

1 term;

2 (v) require the owner of the initial clean
3 coal facility to provide documentation to the
4 Commission each year, starting in the facility's
5 first year of commercial operation, accurately
6 reporting the quantity of carbon emissions from
7 the facility that have been captured and
8 sequestered and report any quantities of carbon
9 released from the site or sites at which carbon
10 emissions were sequestered in prior years, based
11 on continuous monitoring of such sites. If, in any
12 year after the first year of commercial operation,
13 the owner of the facility fails to demonstrate
14 that the initial clean coal facility captured and
15 sequestered at least 50% of the total carbon
16 emissions that the facility would otherwise emit
17 or that sequestration of emissions from prior
18 years has failed, resulting in the release of
19 carbon dioxide into the atmosphere, the owner of
20 the facility must offset excess emissions. Any
21 such carbon offsets must be permanent, additional,
22 verifiable, real, located within the State of
23 Illinois, and legally and practicably enforceable.
24 The cost of such offsets for the facility that are
25 not recoverable shall not exceed \$15 million in
26 any given year. No costs of any such purchases of

1 carbon offsets may be recovered from a utility or
2 its customers. All carbon offsets purchased for
3 this purpose and any carbon emission credits
4 associated with sequestration of carbon from the
5 facility must be permanently retired. The initial
6 clean coal facility shall not forfeit its
7 designation as a clean coal facility if the
8 facility fails to fully comply with the applicable
9 carbon sequestration requirements in any given
10 year, provided the requisite offsets are
11 purchased. However, the Attorney General, on
12 behalf of the People of the State of Illinois, may
13 specifically enforce the facility's sequestration
14 requirement and the other terms of this contract
15 provision. Compliance with the sequestration
16 requirements and offset purchase requirements
17 specified in paragraph (3) of this subsection (d)
18 shall be reviewed annually by an independent
19 expert retained by the owner of the initial clean
20 coal facility, with the advance written approval
21 of the Attorney General. The Commission may, in
22 the course of the review specified in item (vii),
23 reduce the allowable return on equity for the
24 facility if the facility willfully fails to comply
25 with the carbon capture and sequestration
26 requirements set forth in this item (v);

1 (vi) include limits on, and accordingly
2 provide for modification of, the amount the
3 utility is required to source under the sourcing
4 agreement consistent with paragraph (2) of this
5 subsection (d);

6 (vii) require Commission review: (1) to
7 determine the justness, reasonableness, and
8 prudence of the inputs to the formula referenced
9 in subparagraphs (A)(i) through (A)(iii) of
10 paragraph (3) of this subsection (d), prior to an
11 adjustment in those inputs including, without
12 limitation, the capital structure and return on
13 equity, fuel costs, and other operations and
14 maintenance costs and (2) to approve the costs to
15 be passed through to customers under the sourcing
16 agreement by which the utility satisfies its
17 statutory obligations. Commission review shall
18 occur no less than every 3 years, regardless of
19 whether any adjustments have been proposed, and
20 shall be completed within 9 months;

21 (viii) limit the utility's obligation to such
22 amount as the utility is allowed to recover
23 through tariffs filed with the Commission,
24 provided that neither the clean coal facility nor
25 the utility waives any right to assert federal
26 pre-emption or any other argument in response to a

1 purported disallowance of recovery costs;

2 (ix) limit the utility's or alternative retail
3 electric supplier's obligation to incur any
4 liability until such time as the facility is in
5 commercial operation and generating power and
6 energy and such power and energy is being
7 delivered to the facility busbar;

8 (x) provide that the owner or owners of the
9 initial clean coal facility, which is the
10 counterparty to such sourcing agreement, shall
11 have the right from time to time to elect whether
12 the obligations of the utility party thereto shall
13 be governed by the power purchase provisions or
14 the contract for differences provisions;

15 (xi) append documentation showing that the
16 formula rate and contract, insofar as they relate
17 to the power purchase provisions, have been
18 approved by the Federal Energy Regulatory
19 Commission pursuant to Section 205 of the Federal
20 Power Act;

21 (xii) provide that any changes to the terms of
22 the contract, insofar as such changes relate to
23 the power purchase provisions, are subject to
24 review under the public interest standard applied
25 by the Federal Energy Regulatory Commission
26 pursuant to Sections 205 and 206 of the Federal

1 Power Act; and
2 (xiii) conform with customary lender
3 requirements in power purchase agreements used as
4 the basis for financing non-utility generators.

5 (4) Effective date of sourcing agreements with the
6 initial clean coal facility. Any proposed sourcing
7 agreement with the initial clean coal facility shall not
8 become effective unless the following reports are prepared
9 and submitted and authorizations and approvals obtained:

10 (i) Facility cost report. The owner of the initial
11 clean coal facility shall submit to the Commission,
12 the Agency, and the General Assembly a front-end
13 engineering and design study, a facility cost report,
14 method of financing (including but not limited to
15 structure and associated costs), and an operating and
16 maintenance cost quote for the facility (collectively
17 "facility cost report"), which shall be prepared in
18 accordance with the requirements of this paragraph (4)
19 of subsection (d) of this Section, and shall provide
20 the Commission and the Agency access to the work
21 papers, relied upon documents, and any other backup
22 documentation related to the facility cost report.

23 (ii) Commission report. Within 6 months following
24 receipt of the facility cost report, the Commission,
25 in consultation with the Agency, shall submit a report
26 to the General Assembly setting forth its analysis of

1 the facility cost report. Such report shall include,
2 but not be limited to, a comparison of the costs
3 associated with electricity generated by the initial
4 clean coal facility to the costs associated with
5 electricity generated by other types of generation
6 facilities, an analysis of the rate impacts on
7 residential and small business customers over the life
8 of the sourcing agreements, and an analysis of the
9 likelihood that the initial clean coal facility will
10 commence commercial operation by and be delivering
11 power to the facility's busbar by 2016. To assist in
12 the preparation of its report, the Commission, in
13 consultation with the Agency, may hire one or more
14 experts or consultants, the costs of which shall be
15 paid for by the owner of the initial clean coal
16 facility. The Commission and Agency may begin the
17 process of selecting such experts or consultants prior
18 to receipt of the facility cost report.

19 (iii) General Assembly approval. The proposed
20 sourcing agreements shall not take effect unless,
21 based on the facility cost report and the Commission's
22 report, the General Assembly enacts authorizing
23 legislation approving (A) the projected price, stated
24 in cents per kilowatthour, to be charged for
25 electricity generated by the initial clean coal
26 facility, (B) the projected impact on residential and

1 small business customers' bills over the life of the
2 sourcing agreements, and (C) the maximum allowable
3 return on equity for the project; and

4 (iv) Commission review. If the General Assembly
5 enacts authorizing legislation pursuant to
6 subparagraph (iii) approving a sourcing agreement, the
7 Commission shall, within 90 days of such enactment,
8 complete a review of such sourcing agreement. During
9 such time period, the Commission shall implement any
10 directive of the General Assembly, resolve any
11 disputes between the parties to the sourcing agreement
12 concerning the terms of such agreement, approve the
13 form of such agreement, and issue an order finding
14 that the sourcing agreement is prudent and reasonable.
15 The facility cost report shall be prepared as follows:

16 (A) The facility cost report shall be prepared by
17 duly licensed engineering and construction firms
18 detailing the estimated capital costs payable to one
19 or more contractors or suppliers for the engineering,
20 procurement and construction of the components
21 comprising the initial clean coal facility and the
22 estimated costs of operation and maintenance of the
23 facility. The facility cost report shall include:

24 (i) an estimate of the capital cost of the
25 core plant based on one or more front end
26 engineering and design studies for the

1 gasification island and related facilities. The
2 core plant shall include all civil, structural,
3 mechanical, electrical, control, and safety
4 systems.

5 (ii) an estimate of the capital cost of the
6 balance of the plant, including any capital costs
7 associated with sequestration of carbon dioxide
8 emissions and all interconnects and interfaces
9 required to operate the facility, such as
10 transmission of electricity, construction or
11 backfeed power supply, pipelines to transport
12 substitute natural gas or carbon dioxide, potable
13 water supply, natural gas supply, water supply,
14 water discharge, landfill, access roads, and coal
15 delivery.

16 The quoted construction costs shall be expressed
17 in nominal dollars as of the date that the quote is
18 prepared and shall include capitalized financing costs
19 during construction, taxes, insurance, and other
20 owner's costs, and an assumed escalation in materials
21 and labor beyond the date as of which the construction
22 cost quote is expressed.

23 (B) The front end engineering and design study for
24 the gasification island and the cost study for the
25 balance of plant shall include sufficient design work
26 to permit quantification of major categories of

1 materials, commodities and labor hours, and receipt of
2 quotes from vendors of major equipment required to
3 construct and operate the clean coal facility.

4 (C) The facility cost report shall also include an
5 operating and maintenance cost quote that will provide
6 the estimated cost of delivered fuel, personnel,
7 maintenance contracts, chemicals, catalysts,
8 consumables, spares, and other fixed and variable
9 operations and maintenance costs. The delivered fuel
10 cost estimate will be provided by a recognized third
11 party expert or experts in the fuel and transportation
12 industries. The balance of the operating and
13 maintenance cost quote, excluding delivered fuel
14 costs, will be developed based on the inputs provided
15 by duly licensed engineering and construction firms
16 performing the construction cost quote, potential
17 vendors under long-term service agreements and plant
18 operating agreements, or recognized third party plant
19 operator or operators.

20 The operating and maintenance cost quote
21 (including the cost of the front end engineering and
22 design study) shall be expressed in nominal dollars as
23 of the date that the quote is prepared and shall
24 include taxes, insurance, and other owner's costs, and
25 an assumed escalation in materials and labor beyond
26 the date as of which the operating and maintenance

1 cost quote is expressed.

2 (D) The facility cost report shall also include an
3 analysis of the initial clean coal facility's ability
4 to deliver power and energy into the applicable
5 regional transmission organization markets and an
6 analysis of the expected capacity factor for the
7 initial clean coal facility.

8 (E) Amounts paid to third parties unrelated to the
9 owner or owners of the initial clean coal facility to
10 prepare the core plant construction cost quote,
11 including the front end engineering and design study,
12 and the operating and maintenance cost quote will be
13 reimbursed through Coal Development Bonds.

14 (5) Re-powering and retrofitting coal-fired power
15 plants previously owned by Illinois utilities to qualify
16 as clean coal facilities. During the 2009 procurement
17 planning process and thereafter, the Agency and the
18 Commission shall consider sourcing agreements covering
19 electricity generated by power plants that were previously
20 owned by Illinois utilities and that have been or will be
21 converted into clean coal facilities, as defined by
22 Section 1-10 of this Act. Pursuant to such procurement
23 planning process, the owners of such facilities may
24 propose to the Agency sourcing agreements with utilities
25 and alternative retail electric suppliers required to
26 comply with subsection (d) of this Section and item (5) of

1 subsection (d) of Section 16-115 of the Public Utilities
2 Act, covering electricity generated by such facilities. In
3 the case of sourcing agreements that are power purchase
4 agreements, the contract price for electricity sales shall
5 be established on a cost of service basis. In the case of
6 sourcing agreements that are contracts for differences,
7 the contract price from which the reference price is
8 subtracted shall be established on a cost of service
9 basis. The Agency and the Commission may approve any such
10 utility sourcing agreements that do not exceed cost-based
11 benchmarks developed by the procurement administrator, in
12 consultation with the Commission staff, Agency staff and
13 the procurement monitor, subject to Commission review and
14 approval. The Commission shall have authority to inspect
15 all books and records associated with these clean coal
16 facilities during the term of any such contract.

17 (6) Costs incurred under this subsection (d) or
18 pursuant to a contract entered into under this subsection
19 (d) shall be deemed prudently incurred and reasonable in
20 amount and the electric utility shall be entitled to full
21 cost recovery pursuant to the tariffs filed with the
22 Commission.

23 (d-5) Zero emission standard.

24 (1) Beginning with the delivery year commencing on
25 June 1, 2017, the Agency shall, for electric utilities
26 that serve at least 100,000 retail customers in this

1 State, procure contracts with zero emission facilities
2 that are reasonably capable of generating cost-effective
3 zero emission credits in an amount approximately equal to
4 16% of the actual amount of electricity delivered by each
5 electric utility to retail customers in the State during
6 calendar year 2014. For an electric utility serving fewer
7 than 100,000 retail customers in this State that
8 requested, under Section 16-111.5 of the Public Utilities
9 Act, that the Agency procure power and energy for all or a
10 portion of the utility's Illinois load for the delivery
11 year commencing June 1, 2016, the Agency shall procure
12 contracts with zero emission facilities that are
13 reasonably capable of generating cost-effective zero
14 emission credits in an amount approximately equal to 16%
15 of the portion of power and energy to be procured by the
16 Agency for the utility. The duration of the contracts
17 procured under this subsection (d-5) shall be for a term
18 of 10 years ending May 31, 2027. The quantity of zero
19 emission credits to be procured under the contracts shall
20 be all of the zero emission credits generated by the zero
21 emission facility in each delivery year; however, if the
22 zero emission facility is owned by more than one entity,
23 then the quantity of zero emission credits to be procured
24 under the contracts shall be the amount of zero emission
25 credits that are generated from the portion of the zero
26 emission facility that is owned by the winning supplier.

1 The 16% value identified in this paragraph (1) is the
2 average of the percentage targets in subparagraph (B) of
3 paragraph (1) of subsection (c) of this Section for the 5
4 delivery years beginning June 1, 2017.

5 The procurement process shall be subject to the
6 following provisions:

7 (A) Those zero emission facilities that intend to
8 participate in the procurement shall submit to the
9 Agency the following eligibility information for each
10 zero emission facility on or before the date
11 established by the Agency:

12 (i) the in-service date and remaining useful
13 life of the zero emission facility;

14 (ii) the amount of power generated annually
15 for each of the years 2005 through 2015, and the
16 projected zero emission credits to be generated
17 over the remaining useful life of the zero
18 emission facility, which shall be used to
19 determine the capability of each facility;

20 (iii) the annual zero emission facility cost
21 projections, expressed on a per megawatthour
22 basis, over the next 6 delivery years, which shall
23 include the following: operation and maintenance
24 expenses; fully allocated overhead costs, which
25 shall be allocated using the methodology developed
26 by the Institute for Nuclear Power Operations;

1 fuel expenditures; non-fuel capital expenditures;
2 spent fuel expenditures; a return on working
3 capital; the cost of operational and market risks
4 that could be avoided by ceasing operation; and
5 any other costs necessary for continued
6 operations, provided that "necessary" means, for
7 purposes of this item (iii), that the costs could
8 reasonably be avoided only by ceasing operations
9 of the zero emission facility; and

10 (iv) a commitment to continue operating, for
11 the duration of the contract or contracts executed
12 under the procurement held under this subsection
13 (d-5), the zero emission facility that produces
14 the zero emission credits to be procured in the
15 procurement.

16 The information described in item (iii) of this
17 subparagraph (A) may be submitted on a confidential
18 basis and shall be treated and maintained by the
19 Agency, the procurement administrator, and the
20 Commission as confidential and proprietary and exempt
21 from disclosure under subparagraphs (a) and (g) of
22 paragraph (1) of Section 7 of the Freedom of
23 Information Act. The Office of Attorney General shall
24 have access to, and maintain the confidentiality of,
25 such information pursuant to Section 6.5 of the
26 Attorney General Act.

1 (B) The price for each zero emission credit
2 procured under this subsection (d-5) for each delivery
3 year shall be in an amount that equals the Social Cost
4 of Carbon, expressed on a price per megawatthour
5 basis. However, to ensure that the procurement remains
6 affordable to retail customers in this State if
7 electricity prices increase, the price in an
8 applicable delivery year shall be reduced below the
9 Social Cost of Carbon by the amount ("Price
10 Adjustment") by which the market price index for the
11 applicable delivery year exceeds the baseline market
12 price index for the consecutive 12-month period ending
13 May 31, 2016. If the Price Adjustment is greater than
14 or equal to the Social Cost of Carbon in an applicable
15 delivery year, then no payments shall be due in that
16 delivery year. The components of this calculation are
17 defined as follows:

18 (i) Social Cost of Carbon: The Social Cost of
19 Carbon is \$16.50 per megawatthour, which is based
20 on the U.S. Interagency Working Group on Social
21 Cost of Carbon's price in the August 2016
22 Technical Update using a 3% discount rate,
23 adjusted for inflation for each year of the
24 program. Beginning with the delivery year
25 commencing June 1, 2023, the price per
26 megawatthour shall increase by \$1 per

1 megawatthour, and continue to increase by an
2 additional \$1 per megawatthour each delivery year
3 thereafter.

4 (ii) Baseline market price index: The baseline
5 market price index for the consecutive 12-month
6 period ending May 31, 2016 is \$31.40 per
7 megawatthour, which is based on the sum of (aa)
8 the average day-ahead energy price across all
9 hours of such 12-month period at the PJM
10 Interconnection LLC Northern Illinois Hub, (bb)
11 50% multiplied by the Base Residual Auction, or
12 its successor, capacity price for the rest of the
13 RTO zone group determined by PJM Interconnection
14 LLC, divided by 24 hours per day, and (cc) 50%
15 multiplied by the Planning Resource Auction, or
16 its successor, capacity price for Zone 4
17 determined by the Midcontinent Independent System
18 Operator, Inc., divided by 24 hours per day.

19 (iii) Market price index: The market price
20 index for a delivery year shall be the sum of
21 projected energy prices and projected capacity
22 prices determined as follows:

23 (aa) Projected energy prices: the
24 projected energy prices for the applicable
25 delivery year shall be calculated once for the
26 year using the forward market price for the

1 PJM Interconnection, LLC Northern Illinois
2 Hub. The forward market price shall be
3 calculated as follows: the energy forward
4 prices for each month of the applicable
5 delivery year averaged for each trade date
6 during the calendar year immediately preceding
7 that delivery year to produce a single energy
8 forward price for the delivery year. The
9 forward market price calculation shall use
10 data published by the Intercontinental
11 Exchange, or its successor.

12 (bb) Projected capacity prices:

13 (I) For the delivery years commencing
14 June 1, 2017, June 1, 2018, and June 1,
15 2019, the projected capacity price shall
16 be equal to the sum of (1) 50% multiplied
17 by the Base Residual Auction, or its
18 successor, price for the rest of the RTO
19 zone group as determined by PJM
20 Interconnection LLC, divided by 24 hours
21 per day and, (2) 50% multiplied by the
22 resource auction price determined in the
23 resource auction administered by the
24 Midcontinent Independent System Operator,
25 Inc., in which the largest percentage of
26 load cleared for Local Resource Zone 4,

1 divided by 24 hours per day, and where
2 such price is determined by the
3 Midcontinent Independent System Operator,
4 Inc.

5 (II) For the delivery year commencing
6 June 1, 2020, and each year thereafter,
7 the projected capacity price shall be
8 equal to the sum of (1) 50% multiplied by
9 the Base Residual Auction, or its
10 successor, price for the ComEd zone as
11 determined by PJM Interconnection LLC,
12 divided by 24 hours per day, and (2) 50%
13 multiplied by the resource auction price
14 determined in the resource auction
15 administered by the Midcontinent
16 Independent System Operator, Inc., in
17 which the largest percentage of load
18 cleared for Local Resource Zone 4, divided
19 by 24 hours per day, and where such price
20 is determined by the Midcontinent
21 Independent System Operator, Inc.

22 For purposes of this subsection (d-5):

23 "Rest of the RTO" and "ComEd Zone" shall have
24 the meaning ascribed to them by PJM
25 Interconnection, LLC.

26 "RTO" means regional transmission

1 organization.

2 (C) No later than 45 days after June 1, 2017 (the
3 effective date of Public Act 99-906), the Agency shall
4 publish its proposed zero emission standard
5 procurement plan. The plan shall be consistent with
6 the provisions of this paragraph (1) and shall provide
7 that winning bids shall be selected based on public
8 interest criteria that include, but are not limited
9 to, minimizing carbon dioxide emissions that result
10 from electricity consumed in Illinois and minimizing
11 sulfur dioxide, nitrogen oxide, and particulate matter
12 emissions that adversely affect the citizens of this
13 State. In particular, the selection of winning bids
14 shall take into account the incremental environmental
15 benefits resulting from the procurement, such as any
16 existing environmental benefits that are preserved by
17 the procurements held under Public Act 99-906 and
18 would cease to exist if the procurements were not
19 held, including the preservation of zero emission
20 facilities. The plan shall also describe in detail how
21 each public interest factor shall be considered and
22 weighted in the bid selection process to ensure that
23 the public interest criteria are applied to the
24 procurement and given full effect.

25 For purposes of developing the plan, the Agency
26 shall consider any reports issued by a State agency,

1 board, or commission under House Resolution 1146 of
2 the 98th General Assembly and paragraph (4) of
3 subsection (d) of this Section, as well as publicly
4 available analyses and studies performed by or for
5 regional transmission organizations that serve the
6 State and their independent market monitors.

7 Upon publishing of the zero emission standard
8 procurement plan, copies of the plan shall be posted
9 and made publicly available on the Agency's website.
10 All interested parties shall have 10 days following
11 the date of posting to provide comment to the Agency on
12 the plan. All comments shall be posted to the Agency's
13 website. Following the end of the comment period, but
14 no more than 60 days later than June 1, 2017 (the
15 effective date of Public Act 99-906), the Agency shall
16 revise the plan as necessary based on the comments
17 received and file its zero emission standard
18 procurement plan with the Commission.

19 If the Commission determines that the plan will
20 result in the procurement of cost-effective zero
21 emission credits, then the Commission shall, after
22 notice and hearing, but no later than 45 days after the
23 Agency filed the plan, approve the plan or approve
24 with modification. For purposes of this subsection
25 (d-5), "cost effective" means the projected costs of
26 procuring zero emission credits from zero emission

1 facilities do not cause the limit stated in paragraph
2 (2) of this subsection to be exceeded.

3 (C-5) As part of the Commission's review and
4 acceptance or rejection of the procurement results,
5 the Commission shall, in its public notice of
6 successful bidders:

7 (i) identify how the winning bids satisfy the
8 public interest criteria described in subparagraph
9 (C) of this paragraph (1) of minimizing carbon
10 dioxide emissions that result from electricity
11 consumed in Illinois and minimizing sulfur
12 dioxide, nitrogen oxide, and particulate matter
13 emissions that adversely affect the citizens of
14 this State;

15 (ii) specifically address how the selection of
16 winning bids takes into account the incremental
17 environmental benefits resulting from the
18 procurement, including any existing environmental
19 benefits that are preserved by the procurements
20 held under Public Act 99-906 and would have ceased
21 to exist if the procurements had not been held,
22 such as the preservation of zero emission
23 facilities;

24 (iii) quantify the environmental benefit of
25 preserving the resources identified in item (ii)
26 of this subparagraph (C-5), including the

1 following:

2 (aa) the value of avoided greenhouse gas
3 emissions measured as the product of the zero
4 emission facilities' output over the contract
5 term multiplied by the U.S. Environmental
6 Protection Agency eGrid subregion carbon
7 dioxide emission rate and the U.S. Interagency
8 Working Group on Social Cost of Carbon's price
9 in the August 2016 Technical Update using a 3%
10 discount rate, adjusted for inflation for each
11 delivery year; and

12 (bb) the costs of replacement with other
13 zero carbon dioxide resources, including wind
14 and photovoltaic, based upon the simple
15 average of the following:

16 (I) the price, or if there is more
17 than one price, the average of the prices,
18 paid for renewable energy credits from new
19 utility-scale wind projects in the
20 procurement events specified in item (i)
21 of subparagraph (G) of paragraph (1) of
22 subsection (c) of this Section; and

23 (II) the price, or if there is more
24 than one price, the average of the prices,
25 paid for renewable energy credits from new
26 utility-scale solar projects and

1 brownfield site photovoltaic projects in
2 the procurement events specified in item
3 (ii) of subparagraph (G) of paragraph (1)
4 of subsection (c) of this Section and,
5 after January 1, 2015, renewable energy
6 credits from photovoltaic distributed
7 generation projects in procurement events
8 held under subsection (c) of this Section.

9 Each utility shall enter into binding contractual
10 arrangements with the winning suppliers.

11 The procurement described in this subsection
12 (d-5), including, but not limited to, the execution of
13 all contracts procured, shall be completed no later
14 than May 10, 2017. Based on the effective date of
15 Public Act 99-906, the Agency and Commission may, as
16 appropriate, modify the various dates and timelines
17 under this subparagraph and subparagraphs (C) and (D)
18 of this paragraph (1). The procurement and plan
19 approval processes required by this subsection (d-5)
20 shall be conducted in conjunction with the procurement
21 and plan approval processes required by subsection (c)
22 of this Section and Section 16-111.5 of the Public
23 Utilities Act, to the extent practicable.
24 Notwithstanding whether a procurement event is
25 conducted under Section 16-111.5 of the Public
26 Utilities Act, the Agency shall immediately initiate a

1 procurement process on June 1, 2017 (the effective
2 date of Public Act 99-906).

3 (D) Following the procurement event described in
4 this paragraph (1) and consistent with subparagraph
5 (B) of this paragraph (1), the Agency shall calculate
6 the payments to be made under each contract for the
7 next delivery year based on the market price index for
8 that delivery year. The Agency shall publish the
9 payment calculations no later than May 25, 2017 and
10 every May 25 thereafter.

11 (E) Notwithstanding the requirements of this
12 subsection (d-5), the contracts executed under this
13 subsection (d-5) shall provide that the zero emission
14 facility may, as applicable, suspend or terminate
15 performance under the contracts in the following
16 instances:

17 (i) A zero emission facility shall be excused
18 from its performance under the contract for any
19 cause beyond the control of the resource,
20 including, but not restricted to, acts of God,
21 flood, drought, earthquake, storm, fire,
22 lightning, epidemic, war, riot, civil disturbance
23 or disobedience, labor dispute, labor or material
24 shortage, sabotage, acts of public enemy,
25 explosions, orders, regulations or restrictions
26 imposed by governmental, military, or lawfully

1 established civilian authorities, which, in any of
2 the foregoing cases, by exercise of commercially
3 reasonable efforts the zero emission facility
4 could not reasonably have been expected to avoid,
5 and which, by the exercise of commercially
6 reasonable efforts, it has been unable to
7 overcome. In such event, the zero emission
8 facility shall be excused from performance for the
9 duration of the event, including, but not limited
10 to, delivery of zero emission credits, and no
11 payment shall be due to the zero emission facility
12 during the duration of the event.

13 (ii) A zero emission facility shall be
14 permitted to terminate the contract if legislation
15 is enacted into law by the General Assembly that
16 imposes or authorizes a new tax, special
17 assessment, or fee on the generation of
18 electricity, the ownership or leasehold of a
19 generating unit, or the privilege or occupation of
20 such generation, ownership, or leasehold of
21 generation units by a zero emission facility.
22 However, the provisions of this item (ii) do not
23 apply to any generally applicable tax, special
24 assessment or fee, or requirements imposed by
25 federal law.

26 (iii) A zero emission facility shall be

1 permitted to terminate the contract in the event
2 that the resource requires capital expenditures in
3 excess of \$40,000,000 that were neither known nor
4 reasonably foreseeable at the time it executed the
5 contract and that a prudent owner or operator of
6 such resource would not undertake.

7 (iv) A zero emission facility shall be
8 permitted to terminate the contract in the event
9 the Nuclear Regulatory Commission terminates the
10 resource's license.

11 (F) If the zero emission facility elects to
12 terminate a contract under subparagraph (E) of this
13 paragraph (1), then the Commission shall reopen the
14 docket in which the Commission approved the zero
15 emission standard procurement plan under subparagraph
16 (C) of this paragraph (1) and, after notice and
17 hearing, enter an order acknowledging the contract
18 termination election if such termination is consistent
19 with the provisions of this subsection (d-5).

20 (2) For purposes of this subsection (d-5), the amount
21 paid per kilowatthour means the total amount paid for
22 electric service expressed on a per kilowatthour basis.
23 For purposes of this subsection (d-5), the total amount
24 paid for electric service includes, without limitation,
25 amounts paid for supply, transmission, distribution,
26 surcharges, and add-on taxes.

1 Notwithstanding the requirements of this subsection
2 (d-5), the contracts executed under this subsection (d-5)
3 shall provide that the total of zero emission credits
4 procured under a procurement plan shall be subject to the
5 limitations of this paragraph (2). For each delivery year,
6 the contractual volume receiving payments in such year
7 shall be reduced for all retail customers based on the
8 amount necessary to limit the net increase that delivery
9 year to the costs of those credits included in the amounts
10 paid by eligible retail customers in connection with
11 electric service to no more than 1.65% of the amount paid
12 per kilowatthour by eligible retail customers during the
13 year ending May 31, 2009. The result of this computation
14 shall apply to and reduce the procurement for all retail
15 customers, and all those customers shall pay the same
16 single, uniform cents per kilowatthour charge under
17 subsection (k) of Section 16-108 of the Public Utilities
18 Act. To arrive at a maximum dollar amount of zero emission
19 credits to be paid for the particular delivery year, the
20 resulting per kilowatthour amount shall be applied to the
21 actual amount of kilowatthours of electricity delivered by
22 the electric utility in the delivery year immediately
23 prior to the procurement, to all retail customers in its
24 service territory. Unpaid contractual volume for any
25 delivery year shall be paid in any subsequent delivery
26 year in which such payments can be made without exceeding

1 the amount specified in this paragraph (2). The
2 calculations required by this paragraph (2) shall be made
3 only once for each procurement plan year. Once the
4 determination as to the amount of zero emission credits to
5 be paid is made based on the calculations set forth in this
6 paragraph (2), no subsequent rate impact determinations
7 shall be made and no adjustments to those contract amounts
8 shall be allowed. All costs incurred under those contracts
9 and in implementing this subsection (d-5) shall be
10 recovered by the electric utility as provided in this
11 Section.

12 No later than June 30, 2019, the Commission shall
13 review the limitation on the amount of zero emission
14 credits procured under this subsection (d-5) and report to
15 the General Assembly its findings as to whether that
16 limitation unduly constrains the procurement of
17 cost-effective zero emission credits.

18 (3) Six years after the execution of a contract under
19 this subsection (d-5), the Agency shall determine whether
20 the actual zero emission credit payments received by the
21 supplier over the 6-year period exceed the Average ZEC
22 Payment. In addition, at the end of the term of a contract
23 executed under this subsection (d-5), or at the time, if
24 any, a zero emission facility's contract is terminated
25 under subparagraph (E) of paragraph (1) of this subsection
26 (d-5), then the Agency shall determine whether the actual

1 zero emission credit payments received by the supplier
2 over the term of the contract exceed the Average ZEC
3 Payment, after taking into account any amounts previously
4 credited back to the utility under this paragraph (3). If
5 the Agency determines that the actual zero emission credit
6 payments received by the supplier over the relevant period
7 exceed the Average ZEC Payment, then the supplier shall
8 credit the difference back to the utility. The amount of
9 the credit shall be remitted to the applicable electric
10 utility no later than 120 days after the Agency's
11 determination, which the utility shall reflect as a credit
12 on its retail customer bills as soon as practicable;
13 however, the credit remitted to the utility shall not
14 exceed the total amount of payments received by the
15 facility under its contract.

16 For purposes of this Section, the Average ZEC Payment
17 shall be calculated by multiplying the quantity of zero
18 emission credits delivered under the contract times the
19 average contract price. The average contract price shall
20 be determined by subtracting the amount calculated under
21 subparagraph (B) of this paragraph (3) from the amount
22 calculated under subparagraph (A) of this paragraph (3),
23 as follows:

24 (A) The average of the Social Cost of Carbon, as
25 defined in subparagraph (B) of paragraph (1) of this
26 subsection (d-5), during the term of the contract.

1 (B) The average of the market price indices, as
2 defined in subparagraph (B) of paragraph (1) of this
3 subsection (d-5), during the term of the contract,
4 minus the baseline market price index, as defined in
5 subparagraph (B) of paragraph (1) of this subsection
6 (d-5).

7 If the subtraction yields a negative number, then the
8 Average ZEC Payment shall be zero.

9 (4) Cost-effective zero emission credits procured from
10 zero emission facilities shall satisfy the applicable
11 definitions set forth in Section 1-10 of this Act.

12 (5) The electric utility shall retire all zero
13 emission credits used to comply with the requirements of
14 this subsection (d-5).

15 (6) Electric utilities shall be entitled to recover
16 all of the costs associated with the procurement of zero
17 emission credits through an automatic adjustment clause
18 tariff in accordance with subsection (k) and (m) of
19 Section 16-108 of the Public Utilities Act, and the
20 contracts executed under this subsection (d-5) shall
21 provide that the utilities' payment obligations under such
22 contracts shall be reduced if an adjustment is required
23 under subsection (m) of Section 16-108 of the Public
24 Utilities Act.

25 (7) This subsection (d-5) shall become inoperative on
26 January 1, 2028.

1 (d-10) Nuclear Plant Assistance; carbon mitigation
2 credits.

3 (1) The General Assembly finds:

4 (A) The health, welfare, and prosperity of all
5 Illinois citizens require that the State of Illinois act
6 to avoid and not increase carbon emissions from electric
7 generation sources while continuing to ensure affordable,
8 stable, and reliable electricity to all citizens.

9 (B) Absent immediate action by the State to preserve
10 existing carbon-free energy resources, those resources may
11 retire, and the electric generation needs of Illinois'
12 retail customers may be met instead by facilities that
13 emit significant amounts of carbon pollution and other
14 harmful air pollutants at a high social and economic cost
15 until Illinois is able to develop other forms of clean
16 energy.

17 (C) The General Assembly finds that nuclear power
18 generation is necessary for the State's transition to 100%
19 clean energy, and ensuring continued operation of nuclear
20 plants advances environmental and public health interests
21 through providing carbon-free electricity while reducing
22 the air pollution profile of the Illinois energy
23 generation fleet.

24 (D) The clean energy attributes of nuclear generation
25 facilities support the State in its efforts to achieve
26 100% clean energy.

1 (E) The State currently invests in various forms of
2 clean energy, including, but not limited to, renewable
3 energy, energy efficiency, and low-emission vehicles,
4 among others.

5 (F) The Environmental Protection Agency commissioned
6 an independent audit which provided a detailed assessment
7 of the financial condition of the Illinois nuclear fleet
8 to evaluate its financial viability and whether the
9 environmental benefits of such resources were at risk. The
10 report identified the risk of losing the environmental
11 benefits of several specific nuclear units. The report
12 also identified that the LaSalle County Generating Station
13 will continue to operate through 2026 and therefore is not
14 eligible to participate in the carbon mitigation credit
15 program.

16 (G) Nuclear plants provide carbon-free energy, which
17 helps to avoid many health-related negative impacts for
18 Illinois residents.

19 (H) The procurement of carbon mitigation credits
20 representing the environmental benefits of carbon-free
21 generation will further the State's efforts at achieving
22 100% clean energy and decarbonizing the electricity sector
23 in a safe, reliable, and affordable manner. Further, the
24 procurement of carbon emission credits will enhance the
25 health and welfare of Illinois residents through decreased
26 reliance on more highly polluting generation.

1 (I) The General Assembly therefore finds it necessary
2 to establish carbon mitigation credits to ensure decreased
3 reliance on more carbon-intensive energy resources, for
4 transitioning to a fully decarbonized electricity sector,
5 and to help ensure health and welfare of the State's
6 residents.

7 (2) As used in this subsection:

8 "Baseline costs" means costs used to establish a customer
9 protection cap that have been evaluated through an independent
10 audit of a carbon-free energy resource conducted by the
11 Environmental Protection Agency that evaluated projected
12 annual costs for operation and maintenance expenses; fully
13 allocated overhead costs, which shall be allocated using the
14 methodology developed by the Institute for Nuclear Power
15 Operations; fuel expenditures; nonfuel capital expenditures;
16 spent fuel expenditures; a return on working capital; the cost
17 of operational and market risks that could be avoided by
18 ceasing operation; and any other costs necessary for continued
19 operations, provided that "necessary" means, for purposes of
20 this definition, that the costs could reasonably be avoided
21 only by ceasing operations of the carbon-free energy resource.

22 "Carbon mitigation credit" means a tradable credit that
23 represents the carbon emission reduction attributes of one
24 megawatt-hour of energy produced from a carbon-free energy
25 resource.

26 "Carbon-free energy resource" means a generation facility

1 that: (1) is fueled by nuclear power; and (2) is
2 interconnected to PJM Interconnection, LLC.

3 (3) Procurement.

4 (A) Beginning with the delivery year commencing on
5 June 1, 2022, the Agency shall, for electric utilities
6 serving at least 3,000,000 retail customers in the State,
7 seek to procure contracts for no more than approximately
8 54,500,000 cost-effective carbon mitigation credits from
9 carbon-free energy resources because such credits are
10 necessary to support current levels of carbon-free energy
11 generation and ensure the State meets its carbon dioxide
12 emissions reduction goals. The Agency shall not make a
13 partial award of a contract for carbon mitigation credits
14 covering a fractional amount of a carbon-free energy
15 resource's projected output.

16 (B) Each carbon-free energy resource that intends to
17 participate in a procurement shall be required to submit
18 to the Agency the following information for the resource
19 on or before the date established by the Agency:

20 (i) the in-service date and remaining useful life
21 of the carbon-free energy resource;

22 (ii) the amount of power generated annually for
23 each of the past 10 years, which shall be used to
24 determine the capability of each facility;

25 (iii) a commitment to be reflected in any contract
26 entered into pursuant to this subsection (d-10) to

1 continue operating the carbon-free energy resource at
2 a capacity factor of at least 88% annually on average
3 for the duration of the contract or contracts executed
4 under the procurement held under this subsection
5 (d-10), except in an instance described in
6 subparagraph (E) of paragraph (1) of subsection (d-5)
7 of this Section or made impracticable as a result of
8 compliance with law or regulation;

9 (iv) financial need and the risk of loss of the
10 environmental benefits of such resource, which shall
11 include the following information:

12 (I) the carbon-free energy resource's cost
13 projections, expressed on a per megawatt-hour
14 basis, over the next 5 delivery years, which shall
15 include the following: operation and maintenance
16 expenses; fully allocated overhead costs, which
17 shall be allocated using the methodology developed
18 by the Institute for Nuclear Power Operations;
19 fuel expenditures; nonfuel capital expenditures;
20 spent fuel expenditures; a return on working
21 capital; the cost of operational and market risks
22 that could be avoided by ceasing operation; and
23 any other costs necessary for continued
24 operations, provided that "necessary" means, for
25 purposes of this subitem (I), that the costs could
26 reasonably be avoided only by ceasing operations

1 of the carbon-free energy resource; and

2 (II) the carbon-free energy resource's revenue
3 projections, including energy, capacity, ancillary
4 services, any other direct State support, known or
5 anticipated federal attribute credits, known or
6 anticipated tax credits, and any other direct
7 federal support.

8 The information described in this subparagraph (B) may
9 be submitted on a confidential basis and shall be treated
10 and maintained by the Agency, the procurement
11 administrator, and the Commission as confidential and
12 proprietary and exempt from disclosure under subparagraphs
13 (a) and (g) of paragraph (1) of Section 7 of the Freedom of
14 Information Act. The Office of the Attorney General shall
15 have access to, and maintain the confidentiality of, such
16 information pursuant to Section 6.5 of the Attorney
17 General Act.

18 (C) The Agency shall solicit bids for the contracts
19 described in this subsection (d-10) from carbon-free
20 energy resources that have satisfied the requirements of
21 subparagraph (B) of this paragraph (3). The contracts
22 procured pursuant to a procurement event shall reflect,
23 and be subject to, the following terms, requirements, and
24 limitations:

25 (i) Contracts are for delivery of carbon
26 mitigation credits, and are not energy or capacity

1 sales contracts requiring physical delivery. Pursuant
2 to item (iii), contract payments shall fully deduct
3 the value of any monetized federal production tax
4 credits, credits issued pursuant to a federal clean
5 energy standard, and other federal credits if
6 applicable.

7 (ii) Contracts for carbon mitigation credits shall
8 commence with the delivery year beginning on June 1,
9 2022 and shall be for a term of 5 delivery years
10 concluding on May 31, 2027.

11 (iii) The price per carbon mitigation credit to be
12 paid under a contract for a given delivery year shall
13 be equal to an accepted bid price less the sum of:

14 (I) one of the following energy price indices,
15 selected by the bidder at the time of the bid for
16 the term of the contract:

17 (aa) the weighted-average hourly day-ahead
18 price for the applicable delivery year at the
19 busbar of all resources procured pursuant to
20 this subsection (d-10), weighted by actual
21 production from the resources; or

22 (bb) the projected energy price for the
23 PJM Interconnection, LLC Northern Illinois Hub
24 for the applicable delivery year determined
25 according to subitem (aa) of item (iii) of
26 subparagraph (B) of paragraph (1) of

1 subsection (d-5).

2 (II) the Base Residual Auction Capacity Price
3 for the ComEd zone as determined by PJM
4 Interconnection, LLC, divided by 24 hours per day,
5 for the applicable delivery year for the first 3
6 delivery years, and then any subsequent delivery
7 years unless the PJM Interconnection, LLC applies
8 the Minimum Offer Price Rule to participating
9 carbon-free energy resources because they supply
10 carbon mitigation credits pursuant to this Section
11 at which time, upon notice by the carbon-free
12 energy resource to the Commission and subject to
13 the Commission's confirmation, the value under
14 this subitem shall be zero, as further described
15 in the carbon mitigation credit procurement plan;
16 and

17 (III) any value of monetized federal tax
18 credits, direct payments, or similar subsidy
19 provided to the carbon-free energy resource from
20 any unit of government that is not already
21 reflected in energy prices.

22 If the price-per-megawatt-hour calculation
23 performed under item (iii) of this subparagraph (C)
24 for a given delivery year results in a net positive
25 value, then the electric utility counterparty to the
26 contract shall multiply such net value by the

1 applicable contract quantity and remit the amount to
2 the supplier.

3 To protect retail customers from retail rate
4 impacts that may arise upon the initiation of carbon
5 policy changes, if the price-per-megawatt-hour
6 calculation performed under item (iii) of this
7 subparagraph (C) for a given delivery year results in
8 a net negative value, then the supplier counterparty
9 to the contract shall multiply such net value by the
10 applicable contract quantity and remit such amount to
11 the electric utility counterparty. The electric
12 utility shall reflect such amounts remitted by
13 suppliers as a credit on its retail customer bills as
14 soon as practicable.

15 (iv) To ensure that retail customers in Northern
16 Illinois do not pay more for carbon mitigation credits
17 than the value such credits provide, and
18 notwithstanding the provisions of this subsection
19 (d-10), the Agency shall not accept bids for contracts
20 that exceed a customer protection cap equal to the
21 baseline costs of carbon-free energy resources.

22 The baseline costs for the applicable year shall
23 be the following:

24 (I) For the delivery year beginning June 1,
25 2022, the baseline costs shall be an amount equal
26 to \$30.30 per megawatt-hour.

1 (II) For the delivery year beginning June 1,
2 2023, the baseline costs shall be an amount equal
3 to \$32.50 per megawatt-hour.

4 (III) For the delivery year beginning June 1,
5 2024, the baseline costs shall be an amount equal
6 to \$33.43 per megawatt-hour.

7 (IV) For the delivery year beginning June 1,
8 2025, the baseline costs shall be an amount equal
9 to \$33.50 per megawatt-hour.

10 (V) For the delivery year beginning June 1,
11 2026, the baseline costs shall be an amount equal
12 to \$34.50 per megawatt-hour.

13 An Environmental Protection Agency consultant
14 forecast, included in a report issued April 14, 2021,
15 projects that a carbon-free energy resource has the
16 opportunity to earn on average approximately \$30.28
17 per megawatt-hour, for the sale of energy and capacity
18 during the time period between 2022 and 2027.
19 Therefore, the sale of carbon mitigation credits
20 provides the opportunity to receive an additional
21 amount per megawatt-hour in addition to the projected
22 prices for energy and capacity.

23 Although actual energy and capacity prices may
24 vary from year-to-year, the General Assembly finds
25 that this customer protection cap will help ensure
26 that the cost of carbon mitigation credits will be

1 less than its value, based upon the social cost of
2 carbon identified in the Technical Support Document
3 issued in February 2021 by the U.S. Interagency
4 Working Group on Social Cost of Greenhouse Gases and
5 the PJM Interconnection, LLC carbon dioxide marginal
6 emission rate for 2020, and that a carbon-free energy
7 resource receiving payment for carbon mitigation
8 credits receives no more than necessary to keep those
9 units in operation.

10 (D) No later than 7 days after the effective date of
11 this amendatory Act of the 102nd General Assembly, the
12 Agency shall publish its proposed carbon mitigation credit
13 procurement plan. The Plan shall provide that winning bids
14 shall be selected by taking into consideration which
15 resources best match public interest criteria that
16 include, but are not limited to, minimizing carbon dioxide
17 emissions that result from electricity consumed in
18 Illinois and minimizing sulfur dioxide, nitrogen oxide,
19 and particulate matter emissions that adversely affect the
20 citizens of this State. The selection of winning bids
21 shall also take into account the incremental environmental
22 benefits resulting from the procurement or procurements,
23 such as any existing environmental benefits that are
24 preserved by a procurement held under this subsection
25 (d-10) and would cease to exist if the procurement were
26 not held, including the preservation of carbon-free energy

1 resources. For those bidders having the same public
2 interest criteria score, the relative ranking of such
3 bidders shall be determined by price. The Plan shall
4 describe in detail how each public interest factor shall
5 be considered and weighted in the bid selection process to
6 ensure that the public interest criteria are applied to
7 the procurement. The Plan shall, to the extent practical
8 and permissible by federal law, ensure that successful
9 bidders make commercially reasonable efforts to apply for
10 federal tax credits, direct payments, or similar subsidy
11 programs that support carbon-free generation and for which
12 the successful bidder is eligible. Upon publishing of the
13 carbon mitigation credit procurement plan, copies of the
14 plan shall be posted and made publicly available on the
15 Agency's website. All interested parties shall have 7 days
16 following the date of posting to provide comment to the
17 Agency on the plan. All comments shall be posted to the
18 Agency's website. Following the end of the comment period,
19 but no more than 19 days later than the effective date of
20 this amendatory Act of the 102nd General Assembly, the
21 Agency shall revise the plan as necessary based on the
22 comments received and file its carbon mitigation credit
23 procurement plan with the Commission.

24 (E) If the Commission determines that the plan is
25 likely to result in the procurement of cost-effective
26 carbon mitigation credits, then the Commission shall,

1 after notice and hearing and opportunity for comment, but
2 no later than 42 days after the Agency filed the plan,
3 approve the plan or approve it with modification. For
4 purposes of this subsection (d-10), "cost-effective" means
5 carbon mitigation credits that are procured from
6 carbon-free energy resources at prices that are within the
7 limits specified in this paragraph (3). As part of the
8 Commission's review and acceptance or rejection of the
9 procurement results, the Commission shall, in its public
10 notice of successful bidders:

11 (i) identify how the selected carbon-free energy
12 resources satisfy the public interest criteria
13 described in this paragraph (3) of minimizing carbon
14 dioxide emissions that result from electricity
15 consumed in Illinois and minimizing sulfur dioxide,
16 nitrogen oxide, and particulate matter emissions that
17 adversely affect the citizens of this State;

18 (ii) specifically address how the selection of
19 carbon-free energy resources takes into account the
20 incremental environmental benefits resulting from the
21 procurement, including any existing environmental
22 benefits that are preserved by the procurements held
23 under this amendatory Act of the 102nd General
24 Assembly and would have ceased to exist if the
25 procurements had not been held, such as the
26 preservation of carbon-free energy resources;

1 (iii) quantify the environmental benefit of
2 preserving the carbon-free energy resources procured
3 pursuant to this subsection (d-10), including the
4 following:

5 (I) an assessment value of avoided greenhouse
6 gas emissions measured as the product of the
7 carbon-free energy resources' output over the
8 contract term, using generally accepted
9 methodologies for the valuation of avoided
10 emissions; and

11 (II) an assessment of costs of replacement
12 with other carbon-free energy resources and
13 renewable energy resources, including wind and
14 photovoltaic generation, based upon an assessment
15 of the prices paid for renewable energy credits
16 through programs and procurements conducted
17 pursuant to subsection (c) of Section 1-75 of this
18 Act, and the additional storage necessary to
19 produce the same or similar capability of matching
20 customer usage patterns.

21 (F) The procurements described in this paragraph (3),
22 including, but not limited to, the execution of all
23 contracts procured, shall be completed no later than
24 December 3, 2021. The procurement and plan approval
25 processes required by this paragraph (3) shall be
26 conducted in conjunction with the procurement and plan

1 approval processes required by Section 16-111.5 of the
2 Public Utilities Act, to the extent practicable. However,
3 the Agency and Commission may, as appropriate, modify the
4 various dates and timelines under this subparagraph and
5 subparagraphs (D) and (E) of this paragraph (3) to meet
6 the December 3, 2021 contract execution deadline.
7 Following the completion of such procurements, and
8 consistent with this paragraph (3), the Agency shall
9 calculate the payments to be made under each contract in a
10 timely fashion.

11 (F-1) Costs incurred by the electric utility pursuant
12 to a contract authorized by this subsection (d-10) shall
13 be deemed prudently incurred and reasonable in amount, and
14 the electric utility shall be entitled to full cost
15 recovery pursuant to a tariff or tariffs filed with the
16 Commission.

17 (G) The counterparty electric utility shall retire all
18 carbon mitigation credits used to comply with the
19 requirements of this subsection (d-10).

20 (H) If a carbon-free energy resource is sold to
21 another owner, the rights, obligations, and commitments
22 under this subsection (d-10) shall continue to the
23 subsequent owner.

24 (I) This subsection (d-10) shall become inoperative on
25 January 1, 2028.

26 (e) The draft procurement plans are subject to public

1 comment, as required by Section 16-111.5 of the Public
2 Utilities Act.

3 (f) The Agency shall submit the final procurement plan to
4 the Commission. The Agency shall revise a procurement plan if
5 the Commission determines that it does not meet the standards
6 set forth in Section 16-111.5 of the Public Utilities Act.

7 (g) The Agency shall assess fees to each affected utility
8 to recover the costs incurred in preparation of the annual
9 procurement plan for the utility.

10 (h) The Agency shall assess fees to each bidder to recover
11 the costs incurred in connection with a competitive
12 procurement process.

13 (i) A renewable energy credit, carbon emission credit,
14 zero emission credit, or carbon mitigation credit can only be
15 used once to comply with a single portfolio or other standard
16 as set forth in subsection (c), subsection (d), or subsection
17 (d-5) of this Section, respectively. A renewable energy
18 credit, carbon emission credit, zero emission credit, or
19 carbon mitigation credit cannot be used to satisfy the
20 requirements of more than one standard. If more than one type
21 of credit is issued for the same megawatt hour of energy, only
22 one credit can be used to satisfy the requirements of a single
23 standard. After such use, the credit must be retired together
24 with any other credits issued for the same megawatt hour of
25 energy.

2 (20 ILCS 3855/1-128 rep.)

3 Section 10. The Illinois Power Agency Act is amended by
4 repealing Section 1-128.

5 Section 15. The Public Utilities Act is amended by adding
6 Section 4-616 as follows:

7 (220 ILCS 5/4-616 new)

8 Sec. 4-616. Regulation of carbon dioxide emissions
9 prohibited. Beginning on the effective date of this amendatory
10 Act of the 104th General Assembly, it is the policy of this
11 State not to regulate carbon dioxide emissions that arise from
12 fossil fuel combustion for the purpose of generating
13 electrical power. Notwithstanding any other provision of this
14 Act, beginning on the effective date of this amendatory Act of
15 the 104th General Assembly, the Commission shall not address
16 or in any manner regulate carbon dioxide emissions that arise
17 from fossil fuel combustion for the purpose of generating
18 electrical power except as otherwise required by federal law.

19 (220 ILCS 5/4-605 rep.)

20 Section 20. The Public Utilities Act is amended by
21 repealing Section 4-605.

1 Section 25. The Environmental Protection Act is amended by
2 changing Section 3.207 and adding Section 9.15a as follows:

3 (415 ILCS 5/3.207)

4 Sec. 3.207. Greenhouse gases. "Greenhouse gases" or "GHG"
5 means the following air pollutants ~~pollutant defined in 40 CFR~~
6 ~~86.1818-12(a) as the aggregate group of 6 greenhouse gases:~~
7 ~~carbon dioxide,~~ nitrous oxide, methane, hydrofluorocarbons,
8 perfluorocarbons, and sulfur hexafluoride.

9 (Source: P.A. 97-95, eff. 7-12-11.)

10 (415 ILCS 5/9.15a new)

11 Sec. 9.15a. Regulation of carbon dioxide emissions
12 prohibited. Beginning on the effective date of this amendatory
13 Act of the 104th General Assembly, it is the policy of this
14 State not to regulate carbon dioxide emissions that arise from
15 fossil fuel combustion for the purpose of generating
16 electrical power. Notwithstanding any other provision of this
17 Act, beginning on the effective date of this amendatory Act of
18 the 104th General Assembly, the Agency shall not address or in
19 any manner regulate carbon dioxide emissions that arise from
20 fossil fuel combustion for the purpose of generating
21 electrical power except as otherwise required by federal law.

22 (415 ILCS 5/9.15 rep.)

23 Section 30. The Environmental Protection Act is amended by

1 repealing Section 9.15.

2 Section 99. Effective date. This Act takes effect upon
3 becoming law.
