

Rep. Monica Bristow

Adopted in House Comm. on Oct 28, 2019

10100SB1711ham001

LRB101 09730 RPS 64116 a

1 AMENDMENT TO SENATE BILL 1711

2 AMENDMENT NO. _____. Amend Senate Bill 1711 by replacing
3 everything after the enacting clause with the following:

4 "Section 1. Short title. This Act may be cited as the
5 Cancer Clinical Trial Participation Program Act.

6 Section 5. Findings. The General Assembly finds that:

7 (1) The ability to translate medical findings from
8 research to practice relies largely on robust subject
9 participation and a diverse subject participation pool in
10 clinical trials.

11 (2) Diverse subject participation in cancer clinical
12 trials depends significantly on whether an individual is
13 able to afford ancillary costs, including transportation
14 and lodging, during the course of participation in a cancer
15 clinical trial.

16 (3) A national study conducted in 2015 found that

1 individuals from households with an annual income of less
2 than \$50,000 were 30% less likely to participate in cancer
3 clinical trials.

4 (4) Direct and indirect costs, including
5 transportation, lodging, and child-care expenses, prevent
6 eligible individuals from participating in cancer clinical
7 trials according to the National Cancer Institute.

8 (5) The disparities in subject participation in cancer
9 clinical trials threaten the basic ethical underpinning of
10 clinical research, which requires the benefits of the
11 research to be made available equitably among all eligible
12 individuals.

13 (6) While the United States Food and Drug
14 Administration recently confirmed to Congress and provided
15 guidance on its website that reimbursement of direct
16 subject-incurred expenses is not an undue inducement, many
17 organizations, research sponsors, philanthropic
18 individuals, charitable organizations, governmental
19 entities, and other persons still operate under the
20 misconception that such reimbursement is an undue
21 inducement.

22 (7) It is the intent of the General Assembly to enact
23 legislation to further define and establish a clear
24 difference between items considered to be an undue
25 inducement for a subject to participate in a cancer
26 clinical trial and the reimbursement of expenses for

1 participating in a cancer clinical trial.

2 (8) Further clarification of the United States Food and
3 Drug Administration's confirmation and guidance is
4 appropriate and important to improve subject participation
5 in cancer clinical trials, which is the primary intent of
6 this legislation.

7 Section 10. Definitions. In this Act:

8 "Cancer clinical trial" means a research study that
9 subjects an individual to a new cancer treatment, including a
10 medication, chemotherapy, adult stem cell therapy, or other
11 treatment.

12 "Cancer clinical trial sponsor" means a person, physician,
13 professor, or researcher who initiates a cancer clinical trial;
14 a government entity or agency that initiates a cancer clinical
15 trial; or an industry, including, but not limited to, a
16 pharmaceutical, biotechnology, or medical device company, that
17 initiates a cancer clinical trial.

18 "Independent third-party organization" means an entity or
19 organization, whether public or private, that is not a sponsor
20 or host of a cancer clinical trial, or in any way directly
21 affiliated with a sponsor or host of a cancer clinical trial,
22 and has experience in patient advocacy and direct patient
23 reimbursement of cancer clinical trial participation costs.

24 "Inducement" means providing a person something of value,
25 including money, as part of participation in a clinical trial.

1 "Program" means the cancer clinical trial participation
2 program established under this Act.

3 "Subject" means an individual who participates in the
4 program.

5 "Undue inducement" means the value of something received by
6 a potential clinical trial research subject, which value is so
7 large that it causes the research subject to take risks that
8 are not in his or her best interests.

9 Section 15. Establishment. An independent third-party
10 organization may develop and implement the cancer clinical
11 trial participation program to provide reimbursement to
12 subjects for ancillary costs associated with participation in a
13 cancer clinical trial, including costs for:

- 14 (1) travel;
15 (2) lodging;
16 (3) parking and tolls; and
17 (4) other costs considered appropriate by the
18 organization.

19 Section 20. Requirements; notice.

20 (a) The program:

- 21 (1) must collaborate with physicians, health care
22 providers, and cancer clinical trial sponsors to notify a
23 prospective subject about the program when:

- 24 (A) the prospective subject consents to a cancer

1 clinical trial; or

2 (B) funding is available to provide the program for
3 the cancer clinical trial in which the prospective
4 subject participates;

5 (2) must reimburse subjects based on financial need,
6 which may include reimbursement to subjects whose income is
7 at or below 700% of the federal poverty level;

8 (3) must provide reimbursement for ancillary costs,
9 including costs described under Section 15, to eliminate
10 the financial barriers to enrollment in a cancer clinical
11 trial;

12 (4) may provide reimbursement for reasonable ancillary
13 costs, including costs described under Section 15, to one
14 family member, friend, or other person who attends a cancer
15 clinical trial to support a subject; and

16 (5) must comply with applicable federal and State laws.

17 (b) The independent third-party organization administering
18 the program shall provide written notice to prospective
19 subjects of the requirements described under subsection (a).

20 Section 25. Reimbursement requirements; notice.

21 (a) A reimbursement under the program at a trial site that
22 conducts cancer clinical trials must:

23 (1) be reviewed and approved by the institutional
24 review board associated with the cancer clinical trial for
25 which the reimbursement is provided; and

1 (2) comply with applicable federal and State laws.

2 (b) The independent third-party organization operating the
3 program is not required to obtain approval from an
4 institutional review board on the financial eligibility of a
5 subject who is medically eligible for a cancer clinical trial.

6 (c) The independent third-party organization operating the
7 program shall provide written notice to a subject on:

8 (1) the nature and availability of the ancillary
9 financial support under the program; and

10 (2) the program's general guidelines on financial
11 eligibility.

12 Section 30. Reimbursement status as undue inducement.
13 Reimbursement to a subject of ancillary costs under the
14 program:

15 (1) does not constitute an undue inducement to
16 participate in a cancer clinical trial;

17 (2) is not considered coercion or the exertion of undue
18 influence to participate in a cancer clinical trial; and

19 (3) is meant to accomplish parity in access to cancer
20 clinical trials and remove barriers to participation in
21 cancer clinical trials for financially burdened subjects.

22 Section 35. Funding. The independent third-party
23 organization that administers the program may accept gifts,
24 grants, and donations from any public or private source to

1 implement this Act.

2 Section 99. Effective date. This Act takes effect upon
3 becoming law.".
