1 AN ACT concerning electronic fund transfer terminals.

Be it enacted by the People of the State of Illinois, represented in the General Assembly:

- Section 5. The Electronic Fund Transfer Act is amended by changing Section 50 as follows:
- 6 (205 ILCS 616/50)
- 7 Sec. 50. Terminal requirements.
 - (a) To assure maximum safety and security against malfunction, fraud, theft, and other accidents or abuses and to assure that all access devices will have the capability of activating all terminals established in this State, no terminal shall accept an access device that does not conform to specifications that are generally accepted. In the case of a dispute concerning the specifications, the Commissioner, in accordance with the provisions of Section 20 of this Act, shall have the authority to determine the specifications.
 - (b) No terminal that does not accept an access device that conforms with those specifications shall be established or operated.
 - (c) A terminal shall bear a logotype or other identification symbol designed to advise customers which access devices may activate the terminal.
- 23 (d) When used to perform an interchange transaction, a
 24 terminal shall not bear any form of proprietary advertising of
 25 products and services not offered at the terminal; provided,
 26 however, that a terminal screen may bear proprietary
 27 advertising of products or services offered by a financial
 28 institution when a person uses an access device issued by that
 29 financial institution.
- 30 (e) No person operating a terminal in this State shall 31 impose any surcharge on a consumer for the usage of that 32 terminal, whether or not the consumer is using an access device

issued by that person, unless that surcharge is clearly disclosed to the consumer both (i) by a sign that is clearly visible to the consumer on or at the terminal being used and screen. Following electronically on the terminal presentation of the electronic disclosure on the terminal screen, the consumer shall be provided an opportunity to cancel that transaction without incurring any surcharge or other obligation. If a surcharge is imposed on a consumer using an access device not issued by the person operating the terminal, that person shall disclose on the sign and on the terminal screen that the surcharge is in addition to any fee that may be assessed by the consumer's own institution. As used in this subsection, "surcharge" means any charge imposed by the person operating the terminal solely for the use of the terminal.

- (f) A receipt given at a terminal to a person who initiates an electronic fund transfer shall include a number or code that identifies the consumer initiating the transfer, consumer's account or accounts, or the access device used to initiate the transfer. If the number or code shown on the receipt is a number that identifies the access device, the number must be truncated as printed on the receipt so that fewer than all of the digits of the number or code are printed on the receipt. The Commissioner may, however, modify or waive the requirements imposed by this subsection (f) if the Commissioner determines that the modifications or waivers are necessary to alleviate any undue compliance burden.
- (g) No terminal shall operate in this State unless, with to each interchange transaction initiated at the terminal, the access code entered by the consumer to authorize the transaction is encrypted by the device into which the access code is manually entered by the consumer and is transmitted from the terminal only in encrypted form. Any that the foregoing terminal cannot meet encryption requirements shall immediately cease forwarding information with respect to any interchange transaction or attempted interchange transaction.

- (h) No person that directly or indirectly provides data processing support to any terminal in this State shall authorize or forward for authorization any interchange transaction unless the access code intended to authorize the interchange transaction is encrypted when received by that person and is encrypted when forwarded to any other person.
- (i) A terminal operated in this State may be designed and programmed so that when a consumer enters his or her personal identification number in reverse order, the terminal automatically sends an alarm to the local law enforcement agency having jurisdiction over the terminal location. The Commissioner shall promulgate rules necessary for the implementation of this subsection (i). The provisions of this subsection (i) shall not be construed to require an owner or operator of a terminal to design and program the terminal to accept a personal identification number in reverse order.
- (i) (i) A person operating a terminal in this State may not impose a fee upon a consumer for usage of the terminal if the consumer is using a Link Card or other access device issued by a government agency for use in obtaining financial aid under the Illinois Public Aid Code.
- For the purpose of this subsection (j) (i), the term "person operating a terminal" means the person who has control over and is responsible for a terminal. The term "person operating a terminal" does not mean the person who owns or controls the property or building in which a terminal is located, unless he or she also has control over and is responsible for the terminal.
