

1 AN ACT concerning higher education.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 1. Short title. This Act may be cited as the
5 Smoke-Free Campus Act.

6 Section 5. Findings. The General Assembly finds that
7 tobacco smoke is a harmful and dangerous carcinogen to human
8 beings and a hazard to public health. Secondhand tobacco smoke
9 causes at least 65,000 deaths each year from heart disease and
10 lung cancer according to the National Cancer Institute.
11 Secondhand tobacco smoke causes heart disease, stroke, cancer,
12 sudden infant death syndrome, low birth weight in infants,
13 asthma and the exacerbation of asthma, bronchitis, and
14 pneumonia in children and adults. Secondhand tobacco smoke is
15 the third leading cause of preventable death in the United
16 States. Illinois workers exposed to secondhand tobacco smoke
17 are at an increased risk of premature death. An estimated 2,900
18 Illinois citizens die each year from exposure to secondhand
19 tobacco smoke.

20 The General Assembly also finds that the United States
21 Surgeon General's 2006 report has determined that there is no
22 risk-free level of exposure to secondhand smoke; the scientific
23 evidence that secondhand smoke causes serious diseases,

1 including lung cancer, heart disease, and respiratory
2 illnesses such as bronchitis and asthma, is massive and
3 conclusive; separating smokers from nonsmokers, cleaning the
4 air, and ventilating buildings cannot eliminate secondhand
5 smoke exposure; smoke-free policies are effective in reducing
6 secondhand smoke exposure.

7 The General Assembly also finds that a law that prohibits
8 smoking on the campuses of State-supported institutions of
9 higher education will reduce secondhand smoke exposure among
10 nonsmokers as well as prepare students for the workplace and
11 ensure a healthy environment for all campus communities.

12 Section 10. Definitions. In this Act:

23 becoming law.
