HOUSE RESOLUTION

2           WHEREAS, A proposed educational pension cost shift, which  
3 would shift the cost burden from the State of Illinois to local  
4 school districts, community colleges, and institutions of  
5 higher education, is under discussion; this proposal would  
6 require all employers of members in the Teachers' Retirement  
7 System and the State Universities Retirement System to pay the  
8 normal cost of pension benefits earned; and

9           WHEREAS, If this proposal were to become policy, for the  
10 Teachers' Retirement System and the State Universities  
11 Retirement System, it would potentially move \$10.187 billion in  
12 estimated normal costs of pension benefits earned from the  
13 State to local school districts, community colleges, and  
14 institutions of higher learning over a 10-year period;  
15 actuarial changes recently made by these 2 systems will further  
16 increase these numbers; and

17           WHEREAS, This plan would move these spending commitments  
18 from one taxing body, the State, to a group of taxing bodies,  
19 the school districts and community colleges, while additional  
20 pension costs would be shifted to State universities; and

21           WHEREAS, A pension cost shift would lead to a massive  
22 increase in local funding requirements on school districts; the

1 cost shift would exacerbate the problem of adequately funding  
2 our local schools by taking even more when districts, teachers,  
3 and local voters are fighting to simply keep educational  
4 opportunities open to our students; in addition, a pension cost  
5 shift would likely lead to massive property tax hikes or to  
6 classroom cuts that will harm our students; and

7 WHEREAS, According to the Illinois State Board of  
8 Education, 67% of school districts in the State are operating  
9 in the red; and

10 WHEREAS, School districts already bear a large share of the  
11 Teachers' Retirement System pension burden by paying a  
12 statutory share of the System's total contribution costs,  
13 constituting 0.58% of pensionable teacher payroll; districts  
14 also contribute towards any locally-negotiated early  
15 retirement options and for the pension costs of certain  
16 increases in compensation, totaling \$92.5 million in Fiscal  
17 Year 2012; and

18 WHEREAS, Representatives from Northern Illinois University  
19 publicly stated that if the cost shift were to be covered by  
20 increasing tuition on parents and students, each percentage of  
21 payroll cost shifted to the university would translate into a  
22 2% tuition increase; this proposed cost shift would also  
23 increase the liability of State-funded universities and all

1 community colleges, thus making higher education even more  
2 unaffordable for students and their parents; and

3 WHEREAS, This plan would harm the interests of all  
4 taxpayers, especially in downstate and suburban areas and would  
5 sharply increase inequities created by the current school aid  
6 formula between Chicago and the rest of the State; because of  
7 the impact on institutions of higher education, Chicago  
8 taxpayers, parents, and students would also be affected;  
9 therefore, be it

10 RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE  
11 NINETY-NINTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we  
12 state our belief that an educational pension cost shift is  
13 financially wrong and would only serve to shift pension burdens  
14 from the State to the status of an unfunded mandate.
